1. Application area of your GARDENA Floating Light

Correct use:

GARDENA floating lights are a 12 V low-voltage system for lighting in gardens and terrace ponds and are suitable for use both in and out of water.

2. Safety instructions

→ Please see the safety instructions on the Floating Lights!

Warning! Risk of Injury!
→ Replace broken globes immediately.

Before using the system, visually check to see that the light, the cable and of the transformer are undamaged. A system with damaged components must not be used. If there is any damage, GARDENA Service or a qualified electrician must check the product.

Electrical safety:

DANGER! Electric shock!
Danger to life when the light is connected to 230 V AC (mains supply).
→ Only connect floating lights to the 12 V transformer provided.

The transformer mains cable cannot be replaced if damaged.

The information on the model plate of the transformer must match the mains power supply.

Use only original GARDENA spare parts, otherwise correct operation cannot be guaranteed.

Never carry the light or transformer by the cable. Do not pull on the cable to unplug the plug from the socket.

The light may only be operated with the accompanying transformer.

Protect the cable from heat, oil and sharp edges.

For storage, when out of use and before maintenance work, unplug it from the mains.

For safety reason, the power to each light must only be supplied through the suitable transformer. Two transformers must not be connected in parallel.

Do not expose the transformer to direct sunlight.

The transformer must be operated via a fault current circuitbreaker (FI-switch) with a nominal fault current ≤ 30 mA (DIN VDE 0100-702).

→ If in doubt please consult a qualified electrician.

The transformer is approved for outdoor use.

Do not expose the transformer to direct rain or mechanical damage.

The total wattage of the connected lights must not exceed the rated power of the transformer.

Caution! Risk of burns!

→ **Do not touch halogen lights when they are on.**

In Switzerland:

In Switzerland mobile appliances which are used outdoors, must be connected via a residualcurrent device.

3. Operation

Connecting floating lights to the transformer:

We recommend that connection is made only at temperatures $> 0^{\circ}\text{C}$. This will ensure that the cable has the necessary degree of elasticity.

1. Place the floating light in the water.
2. Place the transformer in a dry place not subject to flooding. (The transformer can be bolted to a solid surface using the holes ① ($\varnothing 4$ mm).
3. Plug the light connecting cable into the socket ② on the transformer and tighten the locking nut ③ on to the connection.
4. **Switch on light:** Insert the transformer mains plug into a 230 V mains socket.

→ **Switch off light:** Unplug the transformer from the mains.

4. Storage

Storage:

The Flating Light must be stored out of the reach of children.

1. Prior to frosty conditions, remove the light from the water and clean.
2. Store the light and the transformer in a protected place away from frost.

Disposal:

(in accordance with
RL 2002/96/EC)

The product must not be added to normal household waste and must be disposed of in line with local environmental regulations.

5. Cleaning

Cleaning the globe:

DANGER! Electric shock!

→ Before cleaning the lamp, unplug the transformer from the mains.

Do not use any corrosive or abrasive cleaning media.

1. Unscrew the globe ④ from the screw socket ⑤.
2. Clean the globe ④ with a damp cloth.
3. Clean the sealing ring in the screw socket ⑤ and allow to dry.
4. Screw the globe ④ in again.

6. Troubleshooting

Changing the bulb:

DANGER! Electric shock!

→ Before rectifying any faults, disconnect the transformer at the mains.

Only 12 V halogen lamps with 5 W power (socket G4) may be used. Replacement lamps are available on request from GARDENA Service.

1. Unscrew globe ④ (see 5. Cleaning).
2. Remove protective cap ⑥.
3. Remove lamp ⑦ and place the new lamp ⑦ in the screw socket ⑤.
