## Drill Pump

### 1. Applications and Media to be Pumped

The GARDENA Drill Pump is designed for private use in the house and garden. This includes draining of small containers, such as aquariums, paddling pools, defective washing machines, as well as pumping fuel oil, and temporary aeration of small garden pools.

 **Acids, easy combustible or explosive substances like petrol, kerosene, nitro, or food must not be pumped. The temperature of the liquid must not exceed 40 °C.**

In case of doubt, please contact your GARDENA GARDENA Service Department.

### 2. Use of Operating Instructions

Read the operating instructions carefully.

 **For safety reasons, people who are not familiar with the operating instructions must not operate the pump. Children under 16 years must not operate the pump and have to be kept away from plugged-in unit.**

### 3. Operation and Maintenance

For intermittent or short time use a drill rated 450 Watt minimum is required. For runs of 30 minutes or more a rating of 600 Watt is needed.

Fit the drive shaft (8 mm Ø) to the drill chuck.

 **Make sure that the pump cannot twist, wobble or tilt, with the GARDENA Holder, Art. No. 1495, for example.**

Connect suction and pressure hoses (using GARDENA hose fittings). The **direction of flow** is shown by the white arrows on the pump top.

Connect suction and pressure hoses (using GARDENA hose fittings). The **direction of flow** is shown by the white arrows on the pump top.

Check that the **drill rotates clockwise**, corresponding with the direction shown by the arrows on the pump side.

**The suction hose should not be more than 3 m (9 ft.) long.** Please make certain that it is leak proof when connected. The hose should be of **non-collapsing type** (hose with woven reinforcement, e.g. GARDENA Flex Hose or Cord Hose).

Place the suction hose inlet into fluid to be pumped. **Prime pump at max.** drill speed. The **outlet side** should be open during priming. Pump output can be regulated by drill speed.

The pump is self-priming. **If it does not start pumping within 12 seconds, switch off at once** and locate the cause (probably a leaking, blocked or collapsed inlet hose). The pump should not operate against a closed outlet side for too long a period.

**When liquid no longer flows switch off the electric drill immediately.**

After use, or after pumping of fuel oil, clean the pump out thoroughly with clean water.

#### 4. Technical data

Max. performance	
with 13 mm (1/2") hose	1.7 m <sup>3</sup> /h (6.24g.p.m.)
with 19 mm (3/4") hose (8.81g.p.m.)	2.4 m <sup>3</sup> /h
Max. pressure	approx. 3 bar (42 p.s.i.)
Max. pumping height	approx. 30 m (98.43 ft.)
Max.suction height	approx. 3 m (9ft.)
Max. permissible r.p.m.	3,400 r.p.m.
Max. permissible temperature of the liquid to be pumped	40 °C
Drive shaft	Ø 8 mm
Max. dry running time	12 seconds

**We expressly point out that, in accordance with the product liability law, we are not liable for any damage caused by our units if it is due to improper repair or if parts exchanged are not original GARDENA parts or parts approved by us, and if the repairs were not carried out by a GARDENA Service Centre or an authorised electrician. The same applies to spare parts and accessories.**

## **EU Certificate of Conformity**

The undersigned,  
GARDENA Manufacturing GmbH  
Hans-Lorensen-Str. 40  
D-89079 Ulm

hereby certifies that, when leaving our factory, the unit indicated below is in accordance with the harmonised EU guidelines, EU standards of safety and product specific standards.

This certificate becomes void if the unit is modified without our approval.

**Description of the unit:** Drill Pump

**Art. no.:** 1494

**EU directives:** Machinery Directive 98/37/EC

**Year of CE marking:** 1994

Ulm, 02.12.1998
