# GARDENA Submersible Pump 7000 / Dirty Water Pump 7500

Welcome to the garden of GARDENA ...

Translation of the original instructions from German.  
Please read these operating instructions carefully and observe  
the notes given. Use the instructions to familiarise yourself with  
the pump, its correct use, and the notes on safety.

For safety reasons, children under 16 as well as persons not  
familiar with these operating instructions should not use this  
pump.

→ Keep these operating instructions in a safe place.

## 1. Applications Range of Your GARDENA Pump

### Intended use

GARDENA Pumps have been designed for private use around your house and garden. They are predominantly destinated for drainage after flooding, transfer of liquids, draining containers, taking water from wells and shafts, draining boats and yachts as well as for water aeration and circulation for a limited period of time.

### Liquids to be pumped

Liquids which can be handled by the GARDENA Pump are the following: clean and contaminated water (max. particle size submersible pump 7000 = 5 mm / dirty water pump 7500 = 25 mm), swimming pool water (prerequisite is the recommended dosage of additives) and soapy water.

The pumps are fully submersible (waterproof sealed) and can be immersed in the liquid down to a depth of 8 m.

### Please note

The GARDENA Pumps are not designed for continuous operation (e.g. continuous circulating operation) in a pond. Your pump's life will be shortened correspondingly by such operation.

Corrosive, easily combustible or explosive substances (e.g. gasoline, petroleum, nitro thinner), fats, oils, salt-water and waste water of toilets and urinals must not be pumped. The temperature of the liquid handled should not exceed 35 °C.

## 2. Safety Instructions

### Electrical Safety

According to DIN VDE (German Electrical Engineers' Association) 0100, submersible pumps and dirty water pumps may only be used in swimming pools, garden ponds, and fountains if the pump is operated via a residual-current device with a residual-current rating of  $\leq 30$  mA.

The pump must not be operated when there are persons in the swimming pool or garden pond.

For safety reasons we recommend that you always operate the pump via a residual-current device (DIN VDE 0100-702 and 0100-738).

→ Please contact your electrician.

According to DIN VDE (German Electrical Engineers' Association) 0620, mains power cables must not have a smaller cross-section than the rubber-sheathed cables of the designation H05 RNF.

The cable length must be at least 10 m.

Data indicated on the type plate must match technical data of the mains supply.

→ Take care that the electrical connections are made within dry area, protected from flooding.

→ Keep mains plug dry.

Protect plug and power cable from heat, oil and sharp edges.

### DANGER! Electric shock!

With a cut off mains plug, moisture can get into electrical parts via the mains cable and cause a short circuit.

→ **Never cut the mains plug off (e.g. to feed through wall).**

→ Don't use the power cable for plugging off.

The power cable or the float switch must not be used for mounting or relocating the pump. For submerging or lifting/securing the pump, fix a rope to the pump's carrying handle.

Extension cables must meet the requirements of DIN VDE 0620.

### In Austria

In Austria, according to ÖVE B/EN 60 555 part 1 to 3, pumps which are used in swimming pools and garden ponds, and equipped with firm power cable should be fed via an ÖVE approved isolating transformer – rated voltage must not exceed 230 V.

### In Switzerland

In Switzerland mobile appliances which are used outdoors, must be connected via a residual-current device.

### Visual check

- Before operating the pump, first make a visual check, if there is any damage of the pump (esp. regarding power cable and plug).
- Observe the minimum water level and the max. delivery height (see 8. Technical Data).

### DANGER! Electric shock!

### A damaged pump must not be used.

- In case of damage, please have the pump checked by our GARDENA Service Centre.

### Manual operation

During manual operation, the pump must be switched off as soon as all the liquid has been pumped away.

- Observe the pump at all times during manual operation.

### Notes on use

Dry-running operation causes increased wear and is to be avoided. Therefore, in manual operation the pump must be immediately unplugged when water fails to flow.

Avoid running of the pump for more than 10 min. against closed delivery side of the pump.

Sand and other abrasive substances cause increased wear and reduce the pump's output.

Take care that the pump is located where the inlet openings at the suction base are obstructed neither completely nor partly.

Stand the pump on a brick if using in a pond.

## Instructions for submersible pump 7000

**When you purchase** your pump the swivel feet are set to the **flat suction position** (1 mm).

→ For normal operation, turn the feet 180° to 5 mm.

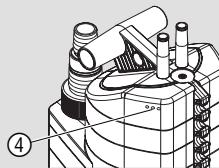

*The pump is lifted 5 mm.*

→ Clear the outlet line before use.

### Thermal protection switch

The pump is automatically switched off on overheating by the built-in thermal motor protector. After having cooled down, the motor automatically switches on again (see 7. Trouble Shooting).

## Automatic deaerating valve

The automatic deaerating valve eliminates any air pockets in the pump.

If the pump is half submersed, water may come out of the ventilation holes ④.

This is not a defect of your pump, but serves to deaerate the pump.

## 3. Initial Operation

Hose diameter	13 mm (1/2") 16 mm (5/8") 19 mm (3/4")	25 mm (1")	38 mm (1 1/2")
<b>Hose connection of universal fitting ⑦</b>			
<b>Hose connection</b>	Cut off topmost nipple at ⑧.  <b>The following connection kits are required for 13 mm to 19 mm connections:</b>	Do not cut off any nipples.	Cut off top two nipples at ⑨.

Cut off topmost nipple at ⑧.

Do not cut off any nipples.

Cut off top two nipples at ⑨.

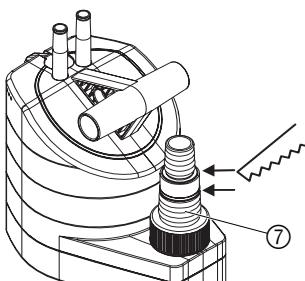

**The following connection kits are required for 13 mm to 19 mm connections:**

13 mm (1/2"): GARDENA Pump Connection Set, Art. No. 1750

16 mm (5/8"): GARDENA Tap Connector, Art. No. (2)902,  
**and** GARDENA Standard Hose Connector,  
Art. No. (2)916

19 mm (3/4"): GARDENA Pump Connection Set, Art. No. 1752

Best results in delivery capacity are achieved when using 38 mm (1 1/2") hoses.

**Connecting the hose:**

The universal fitting (7) allows you to connect all the hoses listed in the previous table.

1. Cut off nipples of the universal fitting (7), which are not needed, to match the hose connection.
2. Screw the universal fitting (7) onto the pump.
3. Connect the hose to the universal fitting (7).

We recommend 38 mm (1 1/2") 25 mm (1") hoses, in addition to be fixed with a **GARDENA Hose Clamps Art. No. 7192** (for 25 mm) and **Art. No. 7193** (for 38 mm).

**Only for the submersible pump 7000:**

For flat suction we recommend using a 13 mm (1/2") or 16 mm (5/8") hose.

**Only for 13 mm (1/2") hose:**

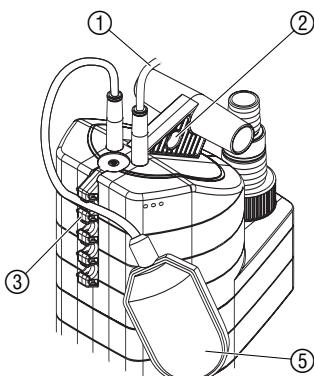

The universal fitting (7) can also be equipped with a **GARDENA Regulator Valve Art. No. 977** so that the contents of the outlet line do not flow back through the pump after pumping. The Regulator Valve can be ordered from your GARDENA dealer.

## 4. Operation

**Automatic operation:**

The float switch (5) turns the pump on automatically when the water level exceeds the cut-in height and the water is pumped out.

The float switch (5) turns the pump off again as soon as the water level falls below the cut-out height.

1. Stand the pump on a firm surface

**— or —**

use a rope attached through the bore hole in the carrying handle (2) to immerse the pump in a well or shaft.

*During automatic operation, ensure that the float switch (5) can move freely.*

2. Plug the power cable (1) into a mains socket.

**Adjusting the Cut-in and Cut-out Height:**

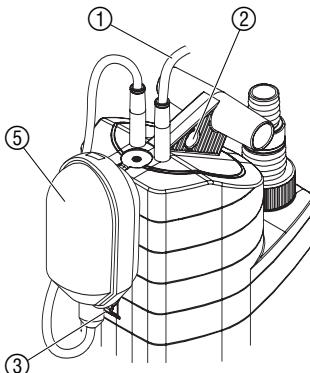

The maximum cut-in height and minimum cut-out height (see 8. Technical Data) can be adjusted.

→ Press the cable of the float switch (5) into an opening in the float switch lock (3).

*Do not select a cable length that is too long or short to ensure that the float switch can turn on and off properly.*

- The higher the opening of the float switch lock (3), the higher the cut-in and cut-out height.
- The shorter the length of cable between the float switch (5) and the float switch lock (3), the lower the cut-in height and the higher the cut-out height.

The cable length between the float switch (5) and the float switch lock (3) must always be at least 10 cm.

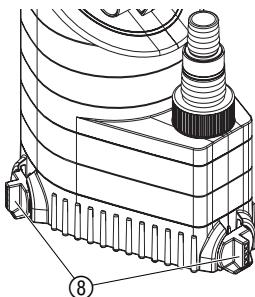

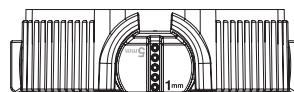

**Manual operation:**

The pump remains in constant operation because the float switch is bypassed.

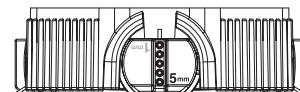

1. Push the float switch ⑤ onto the float switch lock ③ with the cable downward.
2. Stand the pump on a firm surface  
— or —  
use a rope attached through the bore hole in the carrying handle ② to immerse the pump in a well or shaft.
3. Plug the power cable ① into a mains socket.

The residual water height is only reached during manual operation since the float switch turns off the pump during automatic operation before this water level is reached.

**Only for the submersible pump 7000:**  
**Flat suction / Normal operation**

**Flat suction:**

- Turn the 3 swivel feet ⑧ 180° to **1 mm**.

**Normal operation:**

- Turn the 3 swivel feet ⑧ 180° to **5 mm**.

The residual water level of approx. 1 mm is only reached during flat suction in the manual operation mode.

## 5. Putting into Storage

**Frost-free storage:**

- Store the pump away from frost before the first frost sets in.

**Disposal:**  
(in accordance with RL2002/96/EC)

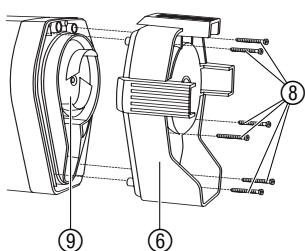

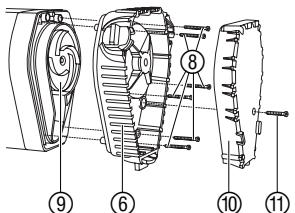

The product must not be added to normal household waste. It must be disposed of in line with local environmental regulations.

- Important: Make sure that the unit is disposed of via your municipal recycling collection centre.

## 6. Maintenance

### Flushing the Pump:

### Cleaning the suction base and impeller:

The pumps are virtually maintenance-free.

After having pumped chlorinated swimming pool water or other liquids leaving residues, the pump should be rinsed with clear water.

**Warning! Electric shock!**

Risk of injury due to electric shock.

Disconnect the pump from the mains before cleaning the suction base and impeller.

1. **Only for Submersible Pump 7000:** Unscrew the Phillips screw (11) and pull the suction base cover (10) off the suction base (6).
2. Unscrew the 6 Phillips screws (8) (Dirty Water Pump 7500: 4 Phillips screws) and pull the suction base (6) off the pump.
3. Clean suction base (6) and impeller (9).
4. Reinstall the suction base (6) and screw in the Phillips screws (8).
5. **Only for Submersible Pump 7000:** Insert the suction base cover (10) into the suction base (6) and screw in the Phillips screw (11).

#### Note for Submersible Pump 7000:

It is often sufficient to simply remove the suction base cover (10) and clean the suction base cover (10) and suction base (6).

**For safety reasons a damaged impeller (9) can only be exchanged by the GARDENA Service Centre.**

## 7. Troubleshooting

Problem	Probable cause	Remedy
Pump is running, but doesn't deliver	Air cannot escape, since pressure line is closed. Air locks in the suction base.	→ Open pressure line (e.g. kinked pressure pipe). → Wait for max. 60 seconds until the pump deaerates automatically over the vent valve. If necessary, switch off and start it again.
	Impeller clogged.	→ Disconnect plug and clean impeller (see 6. Maintenance).
	When starting the pump, water height falls below the min. water level.	→ Submerge pump deeper.
Pump doesn't start or suddenly stops during operation	Thermal overload switch has switched the pump off due to overheating.	→ Disconnect plug and clean impeller (see 6. Maintenance). Observe max. media temperature of 35 °C.

Problem	Probable cause	Remedy
<b>Pump doesn't start or suddenly stops during operation</b>	No power.	→ Check fuses and electric connections.
	Dirt particles are jammed in the suction base.	→ Disconnect plug and clean suction base (see 6. Maintenance).
<b>Pump runs, but output suddenly decreases</b>	Suction base is clogged.	→ Disconnect plug and clean suction base (see 6. Maintenance).
<b>Only for the submersible pump 7000:</b>		
<b>Pump does not reach residual water height of 1 mm during flat suction</b>	The suction base cover is missing in the suction base.	→ Disconnect the plug from the mains and install the suction base cover (see 5. Cleaning).

In the event of other faults please contact GARDENA Service.  
Repairs should only be carried out by GARDENA service centres or dealers authorised by GARDENA.

## 8. Technical Data

	Submersible Pump	Dirty Water Pump
<b>Type</b>	<b>7000 (Art. 1780)</b>	<b>7500 (Art. 1795)</b>
<b>Rated power</b>	250 W	340 W
<b>Max. delivery capacity</b>	7,000 l/h	7,500 l/h
<b>Max. pressure</b>	0.6 bar	0.6 bar
<b>Max. delivery height</b>	6 m	6 m
<b>Max. submersion depth</b>	8 m	8 m
<b>Residual water level</b>	1 mm	30 mm
<b>Contaminated water with particle size of max.</b>	5 mm	25 mm
<b>Power cable</b>	10 m H05 RNF	10 m H05 RNF
<b>Pump connection</b>	universal (G 1 1/4" M) / universal nipple	
<b>Min. water level for operation</b>	35 mm	55 mm
<b>Weight approx. (without cable)</b>	4.3 kg	4.3 kg
<b>Max. media temperature</b>	35 °C	35 °C
<b>Mains voltage / mains frequency</b>	230 V / 50 Hz	230 V / 50 Hz
<b>Min./max. cut-in height</b>	180 mm / 680 mm	200 mm / 690 mm
<b>Min./max. cut-out height</b>	70 mm / 140 mm	65 mm / 150 mm
<b>Noise level L<sub>WA</sub><sup>1)</sup></b>	48 dB(A)	55 dB(A)

1) Measuring method according to EN 60335-1

The cut-in and cut-out height varies.

**Only for the submersible pump 7000:**

The residual water height (flat suction down to approx. 1 mm) is only reached during manual operation with the swivel feet ⑧ turned to 1 mm (see 4. Operation).

## 9. Service / Warranty

GARDENA guarantees this product for 2 years (from date of purchase). This guarantee covers all serious defects of the unit that can be proved to be material or manufacturing faults. Under warranty we will either replace the unit or repair it free of charge if the following conditions apply:

- The unit must have been handled properly and in keeping with the requirements of the operating instructions.
- Neither the purchaser or a non-authorised third party have attempted to repair the unit.

The impeller is a wearing part and is not covered by the guarantee.

This manufacturer's guarantee does not affect the user's existing warranty claims against the dealer/seller.

If you have any problems with your submersible pump or dirty water pump, please contact our Service or return the defective unit together with a short description of the problem – in case of guarantee, with a copy of the receipt – postage paid to one of the GARDENA Service Centres listed on the back of this leaflet.

<b>D</b> <b>Produkthaftung</b>	Wir weisen ausdrücklich darauf hin, dass wir nach dem Produkthaftungsgesetz nicht für durch unsere Geräte hervorgerufene Schäden einzu-stehen haben, sofern diese durch unsachgemäße Reparatur verursacht oder bei einem Teileaustausch nicht unsere Original GARDENA Teile oder von uns freigegebene Teile verwendet werden und die Reparatur nicht vom GARDENA Service oder dem autorisierten Fachmann durchgeführt wird. Entsprechendes gilt für Ergänzungsteile und Zubehör.
<b>GB</b> <b>Product Liability</b>	We expressly point out that, in accordance with the product liability law, we are not liable for any damage caused by our units if it is due to improper repair or if parts exchanged are not original GARDENA parts or parts approved by us, and, if the repairs were not carried out by a GARDENA Service Centre or an authorised specialist. The same applies to spare parts and accessories.
<b>F</b> <b>Responsabilité</b>	Nous vous signalons expressément que GARDENA n'est pas responsable des dommages causés par ses appareils, dans la mesure où ces dommages seraient causés suite à une réparation non conforme, dans la mesure où, lors d'un échange de pièces, les pièces d'origine GARDENA n'auraient pas été utilisées, ou si la réparation n'a pas été effectuée par le Service Après-Vente GARDENA ou l'un des Centres SAV agréés GARDENA. Ceci est également valable pour tout ajout de pièces et d'accessoires autres que ceux préconisés par GARDENA.
<b>NL</b> <b>Productaansprakelijkheid</b>	Wij wijzen er nadrukkelijk op, dat wij op grond van de wet aansprakelijkheid voor producten niet aansprakelijk zijn voor schade ontstaan door onze apparaten, indien deze door onvakkundige reparatie veroorzaakt zijn, of er bij het uitwisselen van onderdelen geen gebruik gemaakt werd van onze originele GARDENA onderdelen of door ons vrijegeven onderdelen en de reparatie niet door de GARDENA technische dienst of de bevoegde vakman uitgevoerd werd. Ditzelfde geldt voor extra-onderdelen en accessoires.
<b>S</b> <b>Produktansvar</b>	Tillverkaren är inte ansvarig för skada som orsakats av produkten om skadan beror på att produkten har reparerats felaktigt eller om, vid reparation eller utbytte, andra än Original GARDENA reservdelar har använts. Samma sak gäller för kompletteringsdelar och tillbehör.
<b>I</b> <b>Responsabilità del prodotto</b>	Si rende espressamente noto che, conformemente alla legislazione sulla responsabilità del prodotto, non si risponde di danni causati da nostri articoli se originati da riparazioni eseguite non correttamente o da sostituzioni di parti effettuate con materiale non originale GARDENA o comunque da noi non approvato e, in ogni caso, qualora l'intervento non venga eseguito da un centro assistenza GARDENA o da personale specializzato autorizzato. Lo stesso vale per le parti complementari e gli accessori.
<b>E</b> <b>Responsabilidad de productos</b>	Advertimos que conforme a la ley de responsabilidad de productos no nos responsabilizamos de daños causados por nuestros aparatos, siempre y cuando dichos daños hayan sido originados por arreglos o reparaciones indebidas, por cambios con piezas que no sean piezas originales GARDENA o bien piezas autorizadas por nosotros, así como en aquellos casos en que la reparación no haya sido efectuada por un Servicio Técnico GARDENA o por un técnico autorizado. Lo mismo es aplicable para las piezas complementarias y accesorios.
<b>P</b> <b>Responsabilidade sobre o produto</b>	Queremos salientar que segundo a lei da responsabilidade do fabricante, nós não nos responsabilizaremos por danos causados pelo nosso equipamento, quando estes ocorram em decorrência de reparações inadequadas ou da substituição de peças por peças não originais da GARDENA, ou peças não autorizadas. A responsabilidade tornar-se-á nula também depois de reparações realizadas por oficinas não autorizadas pela GARDENA. Esta restrição valerá também para peças adicionais e acessórios.
<b>DK</b> <b>Produktansvar</b>	Vi gør udtrykkeligt opmærksom på at i henhold til produktansvarsloven er vi ikke ansvarlige for skader forårsaget af vores udstyr, hvis det skyldes uautoriserede reparationer eller hvis dele er skiftet ud og der ikke er anvendt originale GARDENA dele eller dele godkendt af os, eller hvis reparationerne ikke er udført af GARDENA-service eller en autoriseret fagmand. Det samme gælder for ekstra udstyr og tilbehør.
