1. Where to use Your GARDENA Fountain Pump Set

Intended Use

GARDENA Fountain Pumps have been designed for private use. They are not designed for operating watering tools and systems. The pumps may be used indoors as well as outdoors.

Please note

GARDENA Fountain Pumps have not been designed for constant use in the industrial sector. Corrosive, easily combustible, aggressive or explosive substances (e.g. petrol, petroleum, nitro thinner) as well as salt-water or food and drinking water must not be pumped.

2. Safety instructions

Electrical Safety:

The pump should be operated via a residual current device with a residual current rating of ≤ 30 mA (DIN VDE 0100-702 and 0100-738). The pump must be placed on solid, even ground.

→ Please ask your electrician for his advice.

Always disconnect the pump from the mains before undertaking any work on it.

Mains power cables should not have a smaller cross-section than a rubber sheathed cable of the designation H05 RN-F 3G0,75. Extension cables must meet the requirements of DIN VDE 0620.

Check line voltage. Data indicated on the type plate must match technical data of the mains supply.

Please unplug the pump after operation and before carrying out any maintenance works.

The pump must not be operated when there are people in the water. Swimming pools and garden ponds should be designed according to international and national design regulations.

→ Please consult a professional electrician.

For Austria:

Pumps for use on swimming pools and on ponds may only be operated via an isolating transformer.

→ Please consult a professional electrician.

For Switzerland:

In Switzerland mobile appliances which are used outdoors, must be connected via a residual-current device.

Note:

Do not allow the pump to run without water because dry-running leads to an

undesirable build up of heat and will destroy the pump.

Before operating the pump, look to see if there is any damage to the pump (esp. regarding power cable and plug). The connection cable of the pump cannot be replaced. If the cable is damaged the pump must be scrapped.

Do not use the power cable to carry the pump or to pull the plug out of the socket. Protect the power cable from heat, oil and sharp edges.

The temperature of the liquid used must not be below 4 °C or above 35 °C.

Sand and other abrasive substances in the liquid cause increased wear and reduce the output of the pump.

Please observe the local noise prevention regulations.

3. Assembly

Fit the pump:

The filter housing can be mounted on a firm surface (e.g. a flag stone) for more secure positioning.

1. Clip nozzle pipe ① into the ball and socket joint ②.
2. Screw the water feature insert you require a) / b) / c) into the nozzle pipe ①.

Side outlet:

Additional consumers (e.g. gargoyles) can be connected to the side outlet ⑦ [9 mm / 13 mm (1/2")]. The quantity of water can be adjusted via the regulator ⑧.

Note: The ball joint ② can be used to compensate for uneven ground.

7. Storing your Fountain Pump Set

Overwintering:

The pump should be stored out of the reach of children.

1. Remove the pump from the pond before frost is expected and clean.
2. To avoid difficulties when starting up in the spring, we recommend storing the pump in a frost-free location in a container filled with water.

The mains plug must not be submerged.

RL 2002/96/EC)

The product must not be added to normal household waste. It must be disposed of in line with local environmental regulations.
