GARDENA UVC-pond filter F 12000 / F 16000

Welcome to GARDENA aquamotion...

Translation of the original instructions from German.

Please read these operating instructions carefully and follow the instructions. Use these instructions to get to know the UVC-pond filter, using it correctly and the safety instructions.

For safety reasons, children and young people under 16 years of age and people who are not acquainted with these operating instructions should not use this UVC-pond filter.

→ Please keep these operating instructions in a safe place.

1. Range of Uses for Your GARDENA UVC-pond filter

Intended Use

The GARDENA UVC-pond filter is intended for private use in domestic gardens and allotments and should only be used out of doors for cleaning garden ponds with and without fish.

The GARDENA UV Pond Filter cleans the pond water biologically and mechanically and reduces the growth of algae. Algae is bound together and pathogens (particularly in fish ponds) are destroyed.

Please note

The GARDENA UVC-pond filter is not suitable for industrial use or in combination with chemicals, food, easily combustible and explosive substances.

2. Safety instructions

→ Comply with the safety instructions on the UVC unit.

WARNING !
Read the operating instructions before using the equipment for the first time!

DANGER !
Protect eyes from flash.
DANGER !
This radiation is harmful to eyes and skin.

→ Never operate the UV unit when the housing has been removed.

Mains connection

The pump and the UVC unit must be operated via a residual-current device (FI-switch) with a nominal fault current $\leq 30\text{ mA}$ (DIN VDE 0100-702 and 0100-738).

→ Please ask your electrician for his advice.

Mains power cables should not have a smaller cross-section than a rubber sheathed cable of the designation H05 RNF.

Extension cables must meet the requirements of DIN VDE 0620.

The information on the model plate of the UVC unit must match the power supply.

The connection cable of the UVC unit cannot be replaced. If the cable is damaged the UV unit must be scrapped.

Do not use extension leads, connection leads or adapters without a protective contact.

For Austria

In Austria power cables should correspond to ÖVE-EM 42, T 2 (2000)/1979 § 22 according to § 2022.1. According to this standard units used in swimming pools and ponds should only be operated via an isolating transformer.

→ Please contact your electrician.

For Switzerland

In Switzerland mobile appliances which are used outdoors, must be connected via a residual-current device.

Visual inspection and notes

→ Inspect the equipment before use to ensure that the pump and the UVC unit, especially the power cable and plug, are undamaged.

Do not use a damaged UVC unit.

Do not use the light if the connection lead, glass tube or the housing of the UVC unit appear to be defective.

If the pump or UVC unit are damaged, please have them checked by our GARDENA Service Centre or an authorised electrician.

Swimming pools and garden ponds should be designed according to international and national design regulations.

→ Please consult a professional electrician.

Never carry the UVC unit by the cable. Do not pull on the cable to unplug the plug from the socket.

Please protect the cable from heat, oil and sharp edges. Make sure that connection points remain dry.

The temperature of the liquid used must not be below 4 °C or above 35 °C.

Sand and other abrasive substances in the liquid cause increased wear and reduce the output of the pump.

Putting your pump out of operation

Always unplug the equipment when dismantling the set, when it is not in use and before maintenance.

→ Always disconnect the UVC unit and the pump from the mains before undertaking any work on them.

→ Please follow the safety and assembly instructions in these operating instructions.

Safety switch

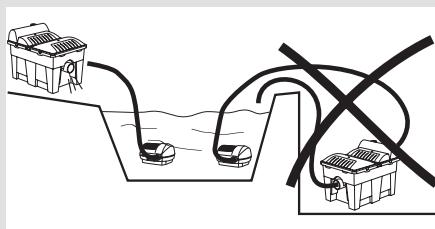

Due to a built-in safety switch, the lamp only lights up when the UVC unit has been fully installed.

If the UVC light overheats, it is switched off by the built-in thermal protection switch. The UVC light switches itself on again automatically when it has cooled down sufficiently.

Positioning the filter

→ Stand or bury the filter housing in a stable position at least 2 m away next to the garden pond.

The filter must be positioned higher than the surface of the pond.

Never operate the UVC unit without water throughput.

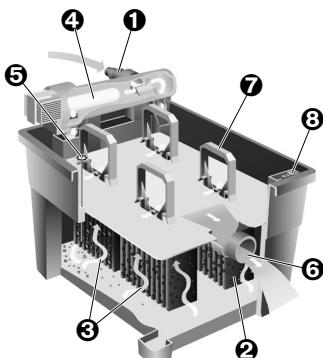

Bacterial Activity

High bacterial activity occurs from a temperature of + 10 °C, which can be read off on the thermometer.

The filter system is a biological system and therefore, when newly installed, needs a few weeks until it is fully effective.

If possible, the filter should be in permanent operation from spring to autumn and should not dry out.

3. Mode of Operation

Example: F 12000

① Water intake

Universal connector for the pump output hose in the pond.

② Mechanical filtering

Dirt in the pond water is retained mechanically by the large outer surface of the foam components in the filter.

③ Biological treatment

The biological treatment of the pond water takes place in two different areas inside the filter foams:

• In zones where the water has a high flow speed (blue filter sponges):

This promotes the growth of micro-organisms which guarantee the conversion of ammonia into nitrate via nitrite (nitrification).

• In zones where the water has a low flow speed (black filter sponges):

This supports the growth of anaerobic micro-organisms which promote denitrification (reduction of nitrate to nitrogen).

In both areas the inner surface of the filter sponges forms a large breeding ground for micro-organisms.

④ UVC-radiation

The pond water, which has already undergone preliminary treatment, is subjected to short wave UVC-light (ultraviolet rays). During this process, the algal growth is reduced and germs which cause disease in fish ponds are killed.

⑤ Thermometer

Displays the bioactivity in the filter:

> 10 °C = High bacterial activity. The biological cleaning effect begins.

< 10 °C = Low bacterial activity. Insufficient biological cleaning effect.

⑥ Water discharge

Pipe connection DN 70 through which the treated water flows back.

⑦ Water discharge

Pipe connection DN 70 through which the treated water flows back.

⑧ Contamination indicator and overflow protection

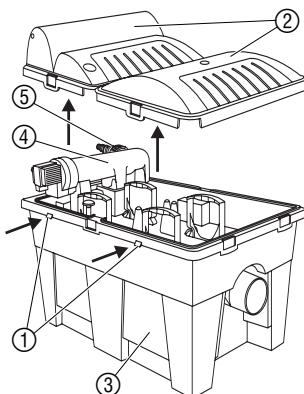

Contamination indicator for simple detection of the need to clean the filter. Degree of contamination of the foam in the filter: 25%, 50%, 75%. If the contamination is even more severe, the water flows through untreated (overflow protection).

⑨ Separate Drainage of Water and Dirt

Drain for sludge and water.

4. Assembly

Fit UVC-filter:

1. Release the catches ① and remove the filter cap ② from the filter housing ③.
2. Fit UVC-bulb ④ (see **8. Troubleshooting “Replace UVC lamp”**).
3. Screw the universal fitting ⑤ on to the UVC-unit ④.

5. Initial Operation

Establish pump type:

For the table to establish pump type, see page 2.

Example:

- 4000 l pond with fish (medium contamination)
- Water inlet of the filter 2 m above pond surface

Low contamination	Medium contamination	High contamination	Pumping height	Filter	Hose	Pump
8000 l	4000 l	2000 l	1 - 3 m	F 12000	1 ½"	8000 l

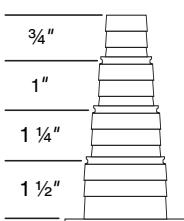

→ 1 x GARDENA UVC pond filter **F 12000** (art. 7900)

→ 1 ½" hose (e.g. GARDENA pond ribbed hose art. 7833)

→ Pump with **8000 l** capacity (e.g. GARDENA FSP 8000 Duo art. 7881).

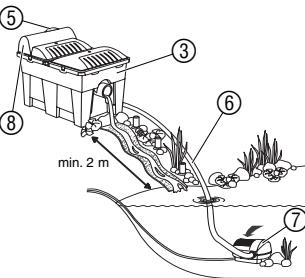

When the correct pump is selected, the water in the intermediate cover of the UVC pond filter is approx. 1 cm deep.

Start up UVC-pond filter:

1. Determine pump to be used from the table on page 2.
2. Depending on the hose, cut away the parts of the universal connector ⑤ you do not need within the guide groove using a saw.
Otherwise loss of performance could occur.
3. Stand or bury the filter housing ③ in a stable position at least 2 m away next to the garden pond.
The outlet must be above the surface of the pond.

Set up the UVC-pond filter horizontally so that the filter cannot overflow.

4. Define lengths of the filter supply hose ⑥ and cut to required length.
5. Connect filter supply hose ⑥ to the pump ⑦ and secure with hose clips.
6. Place the pump ⑦ in a stable position within the garden pond so that the pump are completely covered with water.
7. Connect the filter supply hose ⑥ of the pump ⑦ to the universal fitting ⑤ of the UVC-unit and secure with a hose clamp.
8. Plug the mains plug of the pump ⑦ into a 230 V AC socket.
Warning: The pump will start immediately!
9. Plug the mains plug of the UVC unit into a 230 V AC socket.
The UVC control lamp ⑧ is lit blue (more visible at dusk / in darkness).

**Return
flow tip:**

We recommend that you lay the return flow in such a way that the purified water is reintroduced indirectly e.g. via a short stream. This enriches the purified water with additional oxygen.

6. Putting into Storage

**Storage/
Overwintering:**

1. Before frosts commence, remove the pump from the pond, take the hose off the pump and empty the filter completely.
2. Clean filter, UVC unit and pump thoroughly and dry it (see **7. Maintenance**).
3. Store filter, UVC unit and pump in a frost-free place.

The storage location must not be accessible to children.

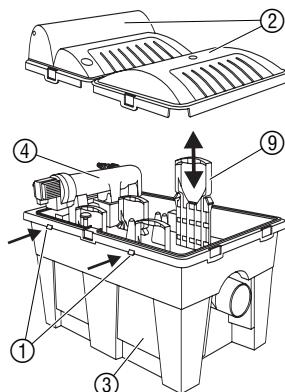

Disposal:
(in accordance with
RL2002/96/EC)

The product must not be added to normal household waste. It must be disposed of in line with local environmental regulations.
→ Important: Make sure that the unit is disposed of via your municipal recycling collection centre.

7. Maintenance

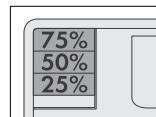

Cleaning the filter:

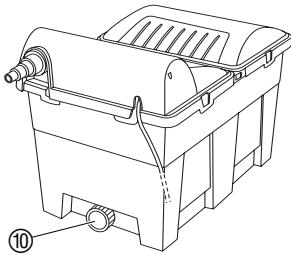

DANGER! Electric shock!

→ Before undertaking maintenance, unplug the UVC-unit and the pump from the mains!

If the water level in the contamination display is more than 50 %, the coarse dirt in the filters should be removed.

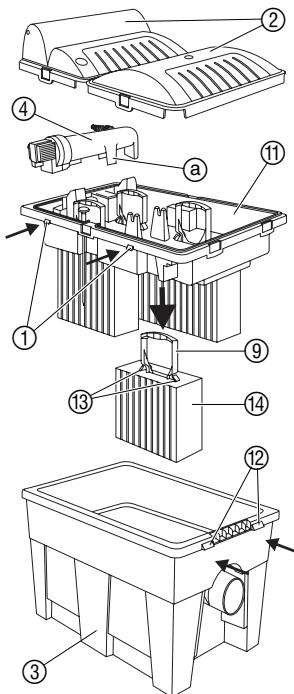

1. Unplug mains plug of the UVC-unit ④ and the pump.
2. Release the catches ① and remove the filter cap ② from the filter housing ③.
3. Pull the cleaning handles ⑨ of all the filter sponges several times. *The filter sponges are pressed together and cleaned mechanically.*

4. Unscrew sealing cap ⑩ of the dirt discharge and allow the dirty water to run out of the filter.
5. Screw sealing cap ⑩ on again and start up the filter again (see **5. Initial Operation: "Starting up the UVC pond filter"**).
6. If necessary, repeat cleaning process.

GB

Removing fine dirt:

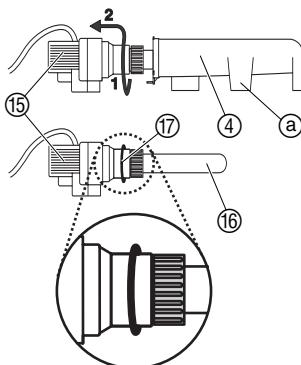

The pieces of filter foam can be removed for even more thorough cleaning.

Do not use any chemical cleaning agents so that the bacteria are not killed.

1. Unplug the UVC-unit ④ and the pump from the mains.
2. Release the catches ① and remove the filter caps ② from the filter housing ③.
3. Release the catches ⑫ and remove the intermediate cover ⑪.
4. Push in the 2 catches ⑬ on each cleaning handle ⑨ and pull the cleaning handles ⑨ with the filter sponges ⑭ downwards out of the intermediate cover ⑪.
5. Clean all the pieces of filter foam ⑯ under running water.
6. Empty the filter container completely and clean under running water.
7. Reassemble filter in reverse order.
8. Start the filter up again (see **5. Initial Operation "Start up UVC-pond filter"**).

Cleaning the UVC unit:

1. Unplug the mains plug of the UVC unit and pump.
2. Push in catches ⑧ and remove the UVC unit ④ from the intermediate cover ⑪.
3. Turn the top ⑮ of the UVC unit anticlockwise ① and carefully remove ⑯ (bayonet socket).
4. Clean glass bulb ⑯ (for example with liquid glass cleaner) and clean the housing under running water.
5. Fit the UVC unit again in reverse order.

When installing, ensure that the O-ring ⑰ is correctly mounted on the head of the UVC unit ⑮.

8. Trouble-Shooting

DANGER ! Electric shock!

→ Before undertaking Trouble-Shooting, unplug the UVC-unit and the pump from the mains!

The UVC bulb should be replaced after approximately 8,000 operating hours since the UVC performance decreases dramatically after this time.

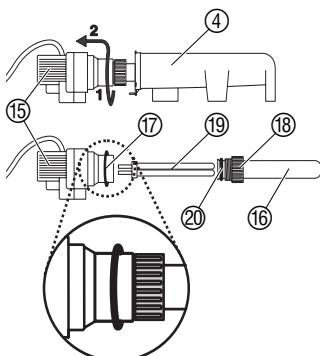

Changing the UVC bulb:

Only bulbs of the type TC-S (UV-C) may be used (e. g. Radium, Philips or Sylvania). The appropriate GARDENA UVC lamp **art. 5390** can be purchased from dealers or from GARDENA Service.

CAUTION !

→ Due to the integrated safety switch the lamp only comes on when the UVC unit ④ is properly installed.

1. Unplug the mains plug of the UVC unit ④ and pump.
2. Turn the top ⑮ of the UVC unit anticlockwise 1 and carefully remove 2 (bayonet socket).
3. Carefully unscrew the ring ⑮.
4. Pull off the glass tube ⑯ (It may be relatively difficult to remove the glass tube due to mineral deposits.)
5. Take out faulty bulb ⑲ and insert new bulb.
6. Reassemble the UVC unit in reverse order.

During installation, ensure that the O-ring ⑳ sits on the glass bulb ⑯ and the O-ring ⑰ is correctly mounted on the head of the UVC unit ⑮.

Fault	Possible Cause	Remedy
The water is not clear	Filter or delivery capacity of the pump not suitable. Too many fish and creatures in the pond.	→ Check filter and pump according to table on page 2. → Add up the estimated length of the fish. There should only be "80 cm fish" per m ³ water in the pond.
	The glass tube of the UVC unit is dirty.	→ Clean UVC unit (see 7. Maintenance).
The quantity conveyed has decreased	The foam filters are dirty.	→ Remove coarse and fine dirt (see 7. Maintenance).
UVC control lamp is no longer lit blue.	UVC lamp defective. Electrical connections defective.	→ Replace UVC lamp. → Check electrical connections.

In the event of other faults please contact GARDENA Service.
Repairs should only be carried out by GARDENA service centres or dealers authorised by GARDENA.

GB

GARDENA ribbed pond hose 1 ½"	To connect the pump to the pond filter.	Art. 7833
GARDENA - Dirt Disposal Kit	For carrying the dirty water to areas away from the pond (e.g. for fertilising plants or if the filter is buried) Hose and hose clips required.	Art. 7926-00.901.00 (available from GARDENA Service).

11. Service

Guarantee

GARDENA guarantees this product for 2 years (starting from the date of purchase). This guarantee covers all serious defects of the unit that can be proved to be material or manufacturing faults. Under warranty we will either replace the unit or repair it free of charge if the following conditions apply:

- The unit must have been handled properly and in keeping with the requirements of the operating instructions.
- Neither the purchaser or a non-authorised third party have attempted to repair the unit.

The UV lamp and filter sponges are wearing parts and are therefore not covered by the warranty.

This manufacturer's guarantee does not affect the user's existing warranty claims against the dealer/seller.

If you have any problems with your UVC-pond filter, please contact our Service or return the defective unit together with a short description of the problem – in case of guarantee, with a copy of the receipt – postage paid to one of the GARDENA Service Centres listed on the back of this leaflet.

D Produkthaftung	Wir weisen ausdrücklich darauf hin, dass wir nach dem Produkthaftungsgesetz nicht für durch unsere Geräte hervorgerufene Schäden einzu-stehen haben, sofern diese durch unsachgemäße Reparatur verursacht oder bei einem Teileaustausch nicht unsere Original GARDENA Teile oder von uns freigegebene Teile verwendet werden und die Reparatur nicht vom GARDENA Service oder dem autorisierten Fachmann durchgeführt wird. Entsprechendes gilt für Ergänzungsteile und Zubehör.
GB Product Liability	We expressly point out that, in accordance with the product liability law, we are not liable for any damage caused by our units if it is due to improper repair or if parts exchanged are not original GARDENA parts or parts approved by us, and, if the repairs were not carried out by a GARDENA Service Centre or an authorised specialist. The same applies to spare parts and accessories.
F Responsabilité	Nous vous signalons expressément que GARDENA n'est pas responsable des dommages causés par ses appareils, dans la mesure où ces dommages seraient causés suite à une réparation non conforme, dans la mesure où, lors d'un échange de pièces, les pièces d'origine GARDENA n'auraient pas été utilisées, ou si la réparation n'a pas été effectuée par le Service Après-Vente GARDENA ou l'un des Centres SAV agréés GARDENA. Ceci est également valable pour tout ajout de pièces et d'accessoires autres que ceux préconisés par GARDENA.
NL Productaansprakelijkheid	Wij wijzen er nadrukkelijk op, dat wij op grond van de wet aansprakelijkheid voor producten niet aansprakelijk zijn voor schade ontstaan door onze apparaten, indien deze door onvakkundige reparatie veroorzaakt zijn, of er bij het uitwisselen van onderdelen geen gebruik gemaakt werd van onze originele GARDENA onderdelen of door ons vrijegeven onderdelen en de reparatie niet door de GARDENA technische dienst of de bevoegde vakman uitgevoerd werd. Ditzelfde geldt voor extra-onderdelen en accessoires.
S Produktansvar	Tillverkaren är inte ansvarig för skada som orsakats av produkten om skadan beror på att produkten har reparerats felaktigt eller om, vid reparation eller utbytte, andra än Original GARDENA reservdelar har använts. Samma sak gäller för kompletteringsdelar och tillbehör.
I Responsabilità del prodotto	Si rende espressamente noto che, conformemente alla legislazione sulla responsabilità del prodotto, non si risponde di danni causati da nostri articoli se originati da riparazioni eseguite non correttamente o da sostituzioni di parti effettuate con materiale non originale GARDENA o comunque da noi non approvato e, in ogni caso, qualora l'intervento non venga eseguito da un centro assistenza GARDENA o da personale specializzato autorizzato. Lo stesso vale per le parti complementari e gli accessori.
E Responsabilidad de productos	Advertimos que conforme a la ley de responsabilidad de productos no nos responsabilizamos de daños causados por nuestros aparatos, siempre y cuando dichos daños hayan sido originados por arreglos o reparaciones indebidas, por cambios con piezas que no sean piezas originales GARDENA o bien piezas autorizadas por nosotros, así como en aquellos casos en que la reparación no haya sido efectuada por un Servicio Técnico GARDENA o por un técnico autorizado. Lo mismo es aplicable para las piezas complementarias y accesorios.
P Responsabilidade sobre o produto	Queremos salientar que segundo a lei da responsabilidade do fabricante, nós não nos responsabilizaremos por danos causados pelo nosso equipamento, quando estes ocorram em decorrência de reparações inadequadas ou da substituição de peças por peças não originais da GARDENA, ou peças não autorizadas. A responsabilidade tornar-se-á nula também depois de reparações realizadas por oficinas não autorizadas pela GARDENA. Esta restrição valerá também para peças adicionais e acessórios.
DK Produktansvar	Vi gør udtrykkeligt opmærksom på at i henhold til produktansvarsloven er vi ikke ansvarlige for skader forårsaget af vores udstyr, hvis det skyldes uautoriserede reparationer eller hvis dele er skiftet ud og der ikke er anvendt originale GARDENA dele eller dele godkendt af os, eller hvis reparationerne ikke er udført af GARDENA-service eller en autoriseret fagmand. Det samme gælder for ekstra udstyr og tilbehør.
