1. General comments on the operating instructions

These instructions will help you to put your system into operation easily, quickly and correctly.

Please read these instructions carefully to make yourself familiar with the products and the safety instructions.

2. Proper use

GARDENA *lightline* is a 12 V low-voltage system for illuminating your garden and terrace.

 **Attention! The GARDENA *lightline* lamps, cables, control units and connectors are only manufactured for use with 12 V low voltage. Connection to 240 V can cause fatal injuries.**

3. System units (Ill. A)

1. Transformers (ST 30/1, ST 60/2, ST 100/2)
2. Installation cable 15 m (49 ft.)/ 25 m (82 ft.), fitted with plug and socket
3. Lamps
4. Connection cable for lamps
5. Plug for connection cable
6. Socket
7. Spike
8. Lamp wall holder (accessories)
9. Extension (accessories)

4. Installation and initial operation

Before installing your GARDENA *lightline* system you should make a sketch in which you mark the area to be illuminated. For optimal installation please see examples (Ill. A 1, A 2).

- If possible, locate the transformer in the middle of the cable run (Ill. A 1).
- Avoid long cable runs (Ill. A 3); and branch off the installation cable, are preferable (Ill. A 2).
- Due to voltage drop it is not recommended that you group several lamps at the end of the cable.
- Whilst planning the different lamps to be used, take into account that using different types means achieving different light effects.
- When planning the installation, please consider the different lamp fixing options:
 - with screws on solid ground (wood, concrete, etc.)
 - with spike (Art. No. 4317) directly into the soil
 - on the wall with special Lamp Wall Holder (Art. No. 4313).
- To ensure adequate cable elasticity, we recommend to install the GARDENA *lightline* system only at temperatures above 0° C.

Transformer installation (Ill. B)
GARDENA *lightline* transformers are suitable for outdoor use.

- Transformers can be installed on the ground or on the wall.
- When mounting on the wall please make sure that connection socket (3) points downwards.
- When mounting on the ground please make sure that the transformer is not exposed to direct rain or mechanical dangers.

Do not expose transformers to direct sunlight.

When using Transformers ST 60/2 + ST 100/2 it is possible to connect 1 or 2 cable lines. If necessary, installation cable can be branched off, as shown in ill. B.

- Now, lay installation cable.
- Install the lamps so that the connection cable of the lamp reaches the installation cable.

Connection of lamps to the installation cable (Ill. C)

- Release coupling's connection socket from plug and unscrew socket.
- Locate and press down installation cable on both cutting contacts (1). As the GARDENA *lightline* system operates with alternating current the cable can be inserted in the socket on either side.
- Press firmly and screw socket cover back up.
- Now, connect the plug of the lamp cable to the socket of the installation cable.

Proceed the same way when installing the other lamps.

Cable can be installed above and below ground.

After finishing the installation insert the plug of the installation cable into the socket of the transformer. Then, connect power plug to the mains.

5. Transformers

low-voltage, safety transformers with integrad thermal relay for protection against damage caused by overloading or short circuit.

5.1 Technical data

Transformers ST 30/1, ST 60/2 and ST 100/2 are sealed

	ST 30/1	ST 60/2	ST 100/2
Voltage:	240 V/12 V, 50 Hz	240 V/12 V, 50 Hz	240 V/12 V, 50 Hz
Power:	30 W	60 W	100 W
No. of low-voltage outputs:	1	2	2
Max. Surrounding temperature:	+ 40° C	+ 40° C	+ 40° C
Safety class:	II	II	II
Mains calbe:	2 m H 05 RNF	2 m H 05 RNF	2 m H 05 RNF
Area of use:	for indoor and outdoor installation	for indoor and outdoor installation	for indoor and outdoor installation
Max. connectable cable length:	30 m	50 m	1 lane: max. 100 m 2 lanes: max. 100 m in total

5.2. Operating parts

1. 2 m mains cable
2. Sealed housing
3. Connection socket for installation cable

the transformer, the power demand of the lamps and the cable length.

GARDENA *lightline* lamps are fitted with a 10 W halogen bulb, Spotlight 50 W (Art. No. 4208) with a 50 W halogen bulb, GARDENA *lightline* Path Lights with a 3 W light bulb.

5.3. Connecting capacity

The connecting capacity depends on the performance of

Examples of calculation:

Transformer	ST 30/1	ST 60/2	ST 100/2
Power:	30 W	60 W	100 W
Max. no. of connectable			
50 W spotlights:	-	1	2

Examples of calculation:

Transformer	ST 30/1	ST 60/2	ST 100/2
10 W lamps:	3	6	10
3 W path lights:	10	20	33
Max. cable length:	30 m	50 m	100 m
Examples for combinations of GARDENA <i>lightline</i> -lamp types:	1 x 10 W 5 x 3 W total 25 W	3 x 10 W 10 x 3 W total 60 W or 3 x 10 W 5 x 3 W total 45 W	7 x 10 W 10 x 3 W total 100 W or 8 x 10 W 5 x 3 W total 95 W or 1 x 50 W 5 x 10 W total 100 W

Rate the number of max. connectable lamps by simply adding the Watt values.

⚠ Attention! The total Watt value of the lamps to be connected must not exceed the total Watt value of the transformer.

The lights are fully fitted with bulb, plug, socket and connection cable.

6.2. Operating parts (III. D)

- 1) Lampshade or reflector
- 2) Half shade or reflector head
- 2a) Pivot for adjustable reflector head
- 3) 10 W/50 W halogen bulb
- 4) Lamp holder
- 5) Plug
- 6) Connection socket
- 7) 90 cm connection cable
- 8) Screws for fixing lampshade
- 9) Shade receptacle
- 10) Screw for fixing shade receptacle
- 11) Lamp stand
- 12) Cable clamp
- 13) Plug
- 14) Socket for connection to GARDENA installation cable

5.4. Maintenance and care

Your GARDENA *lightline* transformer is maintenance-free.

Check the connection of the transformer output/installation cable regularly for dirt accumulations and clean, if necessary.

6. *lightline* Lamps

6.1. Technical data

Voltage: 12 V
Halogen bulbs:
10 W with G 4 base or
50 W with GY 6,35 base
(only Spotlight, Art. No. 4208)

6.3. Extending the lamps (III. D)

The lights can be extended by means of GARDENA Extension (Art. No. 4311).

Procedure holding:

- Release screws (8) the lampshade.
- Remove lampshade.
- Take off lamp holder (4) and disconnect connection socket (6).
- Release screw (10) from lamp stand (11).
- Pass cable through extension.
- Plug extension onto lamp stand (11).
- Screw extension on lamp stand.
- Pull cable through shade receptacle.
- Insert shade receptacle into extension and secure.
- If necessary release cable clamp (12) and tighten up cable as required.
- Fit connection socket (6) on lamp holder (4).
- Insert lamp holder into shade receptacle and screw up lampshade.

Mounting with spike

With the accessory 4317 you have the choice of fixing the lights directly into the ground.

Proceed as follows:

Stick the spike into the lamp stand and insert the connection cable into the cable run. Fasten spike on to the lamp stand with the screw supplied.

6.4. Changing bulbs (III. D)

The GARDENA *lightline* lamps are provided with common 10 W or 50 W halogen bulbs. See point 6.1.

Defective halogen bulbs are replaced by first releasing screws (8) and then removing lampshade (1). Now take the defective bulb off the lamp holder (4) and replace it with a new halogen bulb. Ask your dealer for GARDENA Replacement Bulbs.

⚠ Make sure that only bulbs with max. 12 Volt/10 W are used. (Except for Art. No. 4208 where a 12 Volt/50 W bulb is required).

⚠ Do not touch the halogen bulbs with your bare hands. Do not expose the halogen bulbs to dirt or moisture before installation.

⚠ Make sure that the bulb socket is located correctly in the lamp holder.

⚠ Do not touch lighted halogen bulbs as they can inflict serious burns.

6.5 Maintenance and care

The GARDENA *lightline* lamps are maintenance-free.

In summer insects may gather on the lamp shades and produce dirt. If so, please clean your lamps regularly with a damp cloth. Do not use corrosive or scouring cleansing agents.

7. Troubleshooting

Problem	Possible Cause	Remedy
Complete lighting system fails, that means that the thermal relay of the transformer has been activated due to overload.	Too many lamps are connected	Disconnect power plug from the mains and reduce number of lamps. The total Watt value of connected lights must not exceed the total Watt value of the transformer.
	Transformer has been exposed to intense sunlight.	Disconnect power plug from the mains and let transformer cool down before new operation.
	Short circuit, caused by defective cable, defective halogen bulb or improperly installed connections.	Disconnect power plug from the mains and, starting with the transformer, check all couplings, connections and halogen bulbs to locate the source of the short circuit.

After rectification connect power plug again to the mains.

With all other malfunctions, please contact a GARDENA service centre or a dealer authorized by GARDENA.

⚠ Check mains cable and power plug regularly for defects. Plug and cable may only be used if they are in perfect condition. If the power cable is faulty, disconnect it immediately from the mains.

8. Safety and operating instructions

⚠ The GARDENA *lightline* system is proof against water jets and frost-resistant. It can be installed outside the whole year round.

⚠ Only use Original GARDENA *lightline* parts, otherwise we cannot guarantee sound operation.

⚠ In sealed transformers it is not possible to replace defective mains cables.

⚠ Use all GARDENA *lightline* products exclusively for 12 volt low voltage. Connection to 240 V would be very dangerous and may cause fatal injuries.

⚠ For safety reasons supply each *lightline* system with one transformer only. A parallel connection of two transformers is inadmissible!

⚠ Damaged power cables cannot be exchanged.

We expressly point out that, in accordance with the product liability law, we are not liable for any damage caused by our units if it is due to improper repair or if parts exchanged are not original GARDENA parts or parts approved by us, and, if the repairs were not carried out by a GARDENA Service Centre or an authorised specialist. The same applies to spare parts and accessories.

EU Certificate of Conformity

The undersigned

GARDENA Manufacturing GmbH · Hans-Lorenser-Str. 40 · 89079 Ulm

hereby certifies that, when leaving our factory, the units indicated below are in accordance with the harmonised EU guidelines, EU standards of safety and product specific standards.

This certificate becomes void if the units are modified without our approval.

Description of the units: Transformers
Types: ST 60/2 ; ST 30/1; ST 100/2
Art. No.: 4274; 4273; 4275
EU directives: Electromagnetic Compatibility
2004/108/EC
Low Voltage Directive 2006/95/EC
Directive 93/68/EC

Year of CE marking: 1994

Ulm, 1. 7. 1999

Thomas Heini
Technical Dept. Manager

Disposal:
(in accordance with
directive 2002/96/EC)

Unit may not be disposed of with normal household waste but must be disposed of in accordance with environmental regulations.

9. Guarantee

GARDENA grants a 10 year guarantee for these products (from the date of purchase). This guarantee refers to all significant defects of the unit which can be proven to be caused by material or manufacturing flaws.

Illuminants (bulbs) are excluded from this regulation. We would like to point out that the GARDENA *lightline* products may fade if exposed to intense sunlight. This also applies to the lampshade or reflector. But this in no way affects the function of the products and is, therefore, not part of the standard warranty.

This guarantee covers, within our discretion, either replacement delivery of a unit in perfect working order or repair of the unit sent in, if the following prerequisites have been fulfilled:

- The unit has been operated properly and according to the recommendations in the instructions. Neither the buyer nor a third party has tried to repair the unit.
- The guarantee becomes void unless – in case of exchange or in need of supplementary parts and accessories – Original GARDENA units were used.
- The unit is sent directly to one of the GARDENA service centres with paid postage along with the attached, completely filled out guarantee card or invoice.

This manufacturer's guarantee does not affect the existing claim to guarantee against the dealer/seller and does not affect in any way the buyer's statutory rights.

D

Im Reklamationsfall die Garantiekarte ausschneiden und mit dem Gerät einsenden.

GB

In case of claim cut out the warranty card and send it together with the unit to the GARDENA Service Centre.

F

En cas de réclamation, découpez la carte de garantie et retournez-la avec l'appareil au Service Après-Vente de GARDENA France.

NL

In geval van reclamatie de garantie-kaart uitknippen en tezamen met het apparaat opsturen.

S

Klipp ut garantikort et och sänd det tillsammans med produkten till GARDENA Service.

FIN

Mikäli kyseessä on takuutoimenpide, täytä takuukortti ja lähetä se laitteen kanssa maahantuojalle.

I

In caso di reclamo ritagliare il certificato di garanzia e spedirlo insieme al prodotto.

E

En el caso de reclamación, rogamos enviar la presente Tarjeta de Garantía con el aparato.

P

Em caso de reclamação destaque a carta de garantia e envie-a junto com o aparelho.

TR

Bir şikayetiniz olduđu takdirde aleti garanti kartı ile birlikte yetkili GARDENA servisine gönderiniz.

GR

Σε περίπτωση βλάβης εντός του χρόνου της εγγύησης, κόψτε την κάρτα εγγύησης και φέρτε τη πλήρως συμπληρωμένη μαζί με το είδος στο σέρβις της GARDENA.

DK

Vær venlig i tilfælde af reklamation at klippe garantikortet ud og sende den ind sammen med produktet.

N

I tilfelle reklamasjon, vær vennlig og klipp ut garantikortet, og send det sammen med produktet til GARDENA Norge A/S.
