GARDENA

Submersible Pump 9000 / 13000 aquasensor / Dirty Water Pump 8500 / 13000 aquasensor

Welcome to the garden of GARDENA ...

Translation of the original instructions from German.
Please read these operating instructions carefully and observe
the notes given. Use the instructions to familiarise yourself with
the pump, its correct use, and the notes on safety.

For safety reasons, children under 16 as well as persons not
familiar with these operating instructions should not use this
pump.

→ Keep these operating instructions in a safe place.

1. Applications Range of Your GARDENA Pump

Intended use

GARDENA Pumps have been designed for private use around
your house and garden. They are predominantly destinatated for
drainage after flooding, transfer of liquids, draining containers,
taking water from wells and shafts, draining boats and yachts
as well as for water aeration and circulation for a limited period
of time.

Liquids to be pumped

Liquids which can be handled by the GARDENA Pump are the
following: clean and contaminated water (max. particle size
submersible pumps = 5 mm / dirty water pumps = 30 mm),
swimming pool water (prerequisite is the recommended dosage
of additives) and soapy water. So that the pump turns off safely
when pumping waste water from washing machines, the off sensor
must be at least 10 mm from the floor.

The pumps are fully submersible (waterproof sealed) and can be
immersed in the liquid down to a depth of 8 m.

Please note

**GARDENA Pumps are not designed for continuous
operation (e.g. continuous circulating operation) in a pond.
Your pump's life will be shortened correspondingly by such
operation. Corrosive, easily combustible or explosive
substances (e.g. gasoline, petroleum, nitro thinner), fats,
oils, saltwater and waste water of toilets and urinals must
not be pumped. The temperature of the liquid handled
should not exceed 35 °C.**

2. Safety Instructions

Electrical Safety

According to DIN VDE (German Electrical Engineers' Association) 0100, submersible pumps and dirty water pumps may only be used in swimming pools, garden ponds, and fountains if the pump is operated via a residual-current device with a residual-current rating of $\leq 30\text{ mA}$.

The pump must not be operated when there are persons in the swimming pool or garden pond.

For safety reasons we recommend that you always operate the pump via a residual-current device (DIN VDE 0100-702 and 0100-738).

→ Please contact your electrician.

According to DIN VDE (German Electrical Engineers' Association) 0620, mains power cables must not have a smaller cross-section than the rubber-sheathed cables of the designation H05 RNF H05 RNF (for Art. Nos. 1783 / 1797) or H07 RNF (for Art. Nos. 1785 / 1799).

The cable length must be at least 10 m.

Data indicated on the type plate must match technical data of the mains supply.

→ Take care that the electrical connections are made within dry area, protected from flooding.

→ Keep mains plug dry.

Protect plug and power cable from heat, oil and sharp edges.

DANGER! Electric shock!

With a cut off mains plug, moisture can get into electrical parts via the mains cable and cause a short circuit.

→ **Never cut the mains plug off (e.g. to feed through wall).**

→ Don't use the power cable for plugging off.

The power cable or the float switch must not be used for mounting or relocating the pump. For submerging or lifting/securing the pump, fix a rope to the pump's carrying handle.

Extension cables must meet the requirements of DIN VDE 0620.

In Austria

In Austria, according to ÖVE B/EN 60 555 part 1 to 3, pumps which are used in swimming pools and garden ponds, and equipped with firm power cable should be fed via an ÖVE approved isolating transformer – rated voltage must not exceed 230 V.

In Switzerland

In Switzerland mobile appliances which are used outdoors, must be connected via a residual-current device.

Visual check

- Before operating the pump, first make a visual check, if there is any damage of the pump (esp. regarding power cable and plug).
- Observe the minimum water level and the max. delivery height (see 8. Technical Data).

DANGER! Electric shock!

A damaged pump must not be used.

→ In case of damage, please have the pump checked by our GARDENA Service Centre.

Manual operation

During manual operation, the pump must be switched off as soon as all the liquid has been pumped away.

→ Observe the pump at all times during manual operation.

Notes on use

Dry-running operation causes increased wear and is to be avoided. Therefore, in manual operation the pump must be immediately unplugged when water fails to flow.

Avoid running of the pump for more than 10 min. against closed delivery side of the pump.

Sand and other abrasive substances cause increased wear and reduce the pump's output.

Take care that the pump is located where the inlet openings at the suction base are obstructed neither completely nor partly.

Stand the pump on a brick if using in a pond.

Instructions for submersible pumps

When you purchase your pump the swivel feet are set to the **flat suction position** (1 mm).

→ For normal operation, turn the feet 180° to 5 mm.

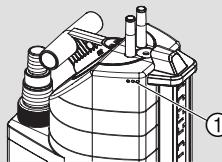

The pump is lifted 5 mm.

→ Clear the outlet line before use.

Thermal protection switch

The pump is automatically switched off on overheating by the built-in thermal motor protector. After having cooled down, the motor automatically switches on again (see 7. Troubleshooting).

Automatic deaerating valve

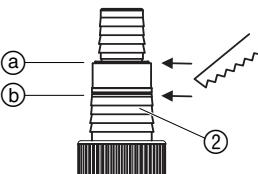

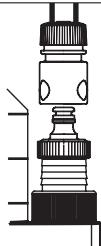

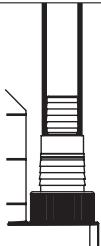

The automatic deaerating valve eliminates any air pockets in the pump.

If the pump is half submersed, water may come out of the ventilation holes ①.

This is not a defect of your pump, but serves to deaerate the pump.

3. Initial Operation

Hose diameter	13 mm (1/2") 16 mm (5/8") 19 mm (3/4")	25 mm (1")	38 mm (1 1/2")
Hose connection of universal fitting ②	 Hose connection of universal fitting ②	 Cut off topmost nipple at ④.	 Do not cut off any nipples.

Hose connection	Cut off topmost nipple at ④.	Do not cut off any nipples.	Cut off top two nipples at ⑥.
-----------------	------------------------------	-----------------------------	-------------------------------

The following connection kits are required for 13 mm to 19 mm connections:

13 mm (1/2"): GARDENA Pump Connection Set, Art. No. 1750

16 mm (5/8"): GARDENA Tap Connector, Art. No. (2)902, **and** GARDENA Standard Hose Connector, Art. No. (2)916

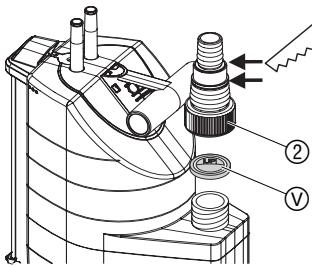

19 mm (3/4"): GARDENA Pump Connection Set, Art. No. 1752

Best results in delivery capacity are achieved when using 38 mm (1 1/2") hoses.

Connecting the hose:

The universal fitting ② allows you to connect all the hoses listed in the previous table.

1. Cut off nipples of the universal fitting ②, which are not needed, to match the hose connection.

2. **Only for the submersible pumps Art. No. 1783 / 1785:**
Insert the non-return valve (V) supplied into the universal connector (2) with the word UP pointing upwards.
3. Screw the universal fitting (2) onto the pump.
4. Connect the hose to the universal fitting (2).

We recommend 38 mm (1 1/2") 25 mm (1") hoses, in addition to be fixed with a **GARDENA Hose Clamps Art. No. 7192** (for 25 mm) and **Art. No. 7193** (for 38 mm).

Only for the submersible pumps Art. No. 1783 / 1785:

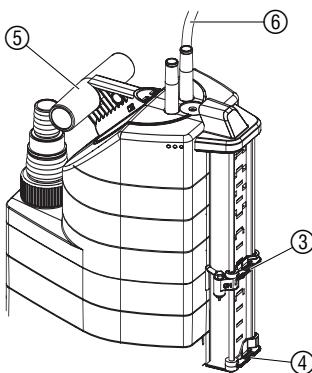

For flat suction we recommend using a 13 mm (1/2") or 16 mm (5/8") hose. The non-return valve (V) prevents the water flowing back through the hose. The max. delivery height will only be achieved without the non-return valve.

Only for 13 mm (1/2") hose:

The universal fitting (2) can also be equipped with a **GARDENA Regulator Valve Art. No. 977** so that the contents of the outlet line do not flow back through the pump after pumping. The Regulator Valve can be ordered from your GARDENA dealer.

4. Operation

Automatic operation:

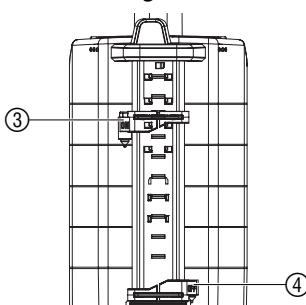

If the water level reaches the **ON** sensor (3), the pump automatically switches on and the water is pumped off.

As soon as the water level falls below the **OFF** sensor (4), the pump is automatically switched off (the pump continues to run for approx. 10 seconds).

1. Stand the pump on a firm surface
– or –
use a rope attached through the bore hole in the carrying handle (5) to immerse the pump in a well or shaft.
2. Plug the power cable (6) into a mains socket.

Adjust switch-on and switch-off height:

The switch-on and switch-off height (see 8. Technical Data) can be adjusted for automatic mode. The relevant sensor pin defines the height of the water level.

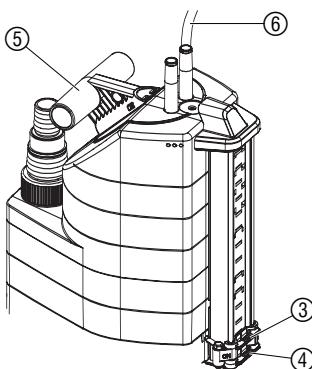

Set switch-on height ON:

- Push **ON** sensor (3) to the required switch-on height.
Switch-on height of the pump in automatic mode.

Set switch-off height OFF:

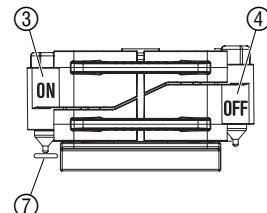

- Push **OFF** sensor (4) to the required switch-off height.
Switch-off height of the pump in automatic mode.

Manual operation:

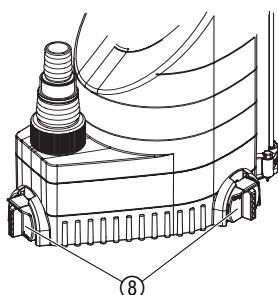

The pump remains in operation continuously. The **ON** sensor (3) is locked in manual position and bridged via the contact (7).

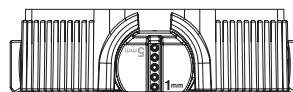

1. Push **OFF** sensor (4) and **ON** sensor (3) right down so that the **ON** sensor (3) touches the contact (7).
2. Stand the pump on a firm surface
— or —
use a rope attached through the bore hole in the carrying handle (5) to immerse the pump in a well or shaft.
3. Plug the power cable (6) into a mains socket.

Only for the submersible pumps: Flat suction / Normal operation

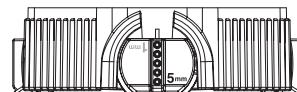

Flat suction:

- Turn the 3 swivel feet (8)
180° to 1 mm.

Normal operation:

- Turn the 3 swivel feet (8)
180° to 5 mm.

The residual water level of approx. 1 mm is only reached during flat suction in the manual operation mode.

5. Putting into Storage

Frost-free storage:

- Store the pump away from frost before the first frost sets in.

Disposal: (in accordance with RL2002/96/EC)

The product must not be added to normal household waste. It must be disposed of in line with local environmental regulations.

- Important: Make sure that the unit is disposed of via your municipal recycling collection centre.

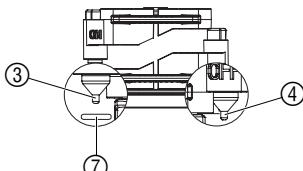

6. Maintenance

Flushing the Pump:

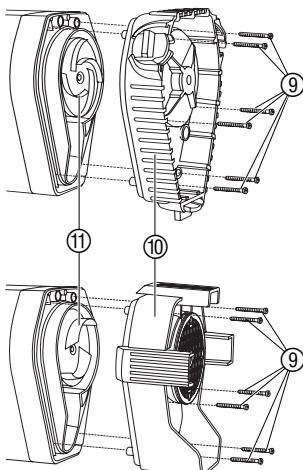

The pumps are virtually maintenance-free.

After having pumped chlorinated swimming pool water or other liquids leaving residues, the pump should be rinsed with clear water.

Clean sensors:

Cleaning the suction base and impeller:

The sensors will only work reliably if they are cleaned regularly (at least every 2 months)!

- Clean the sensors ③ / ④ and contact ⑦ regularly with a dry cloth (do not use hard or sharp objects).

DANGER! Electric shock!

Risk of injury due to electric shock.

→ Disconnect the pump from the mains before cleaning the suction base and impeller.

1. Unscrew the 6 Phillips screws ⑨ and pull the suction base ⑩ off the pump.
2. Clean suction base ⑩ and impeller ⑪.
3. Reinstall the suction base ⑩ and screw in the Phillips screws ⑨.

For safety reasons a damaged impeller ⑪ can only be exchanged by the GARDENA Service Centre.

7. Troubleshooting

Problem	Probable cause	Remedy
Pump is running, but doesn't deliver.	Air cannot escape.	→ Open pressure line. → Remove the non-return valve.
	Non-return valve inserted wrongly.	→ Insert the non-return valve with the word UP on top.
	Air locks in the suction base.	→ Wait for max. 60 seconds until the pump deaerates automatically over the vent valve. If necessary, switch off and start it again.
	Impeller clogged.	→ Disconnect plug and clean impeller (see 6. Maintenance).

Problem	Probable cause	Remedy
Pump is running, but doesn't deliver.	When starting the pump, water height falls below the min. water level.	→ Submerge pump deeper.
The pump does not switch on or off. Pump switches off although the OFF sensor is in the water.	Sensors ③/④ and contacts ⑦ are dirty.	→ Clean sensors (see 6. Maintenance).
Pump doesn't start or suddenly stops during operation.	Thermal overload switch has switched the pump off due to overheating. No power.	→ Disconnect plug and clean impeller (see 6. Maintenance). Observe max. media temperature of 35 °C. → Check fuses and electric connections.
	Dirt particles are jammed in the suction base.	→ Disconnect plug and clean suction base (see 6. Maintenance).
Pump runs, but output suddenly decreases.	Suction base is clogged.	→ Disconnect plug and clean suction base (see 6. Maintenance).

In the event of other faults please contact GARDENA Service.
 Repairs should only be carried out by GARDENA service centres or dealers authorised by GARDENA.

8. Technical Data

	Submersible pumps aquasensor		Dirty water pumps aquasensor	
Type	9000 (Art. 1783)	13000 (Art. 1785)	8500 (Art. 1797)	13000 (Art. 1799)

Max. delivery capacity	9,000 l/h	13,000 l/h	8,300 l/h	13,000 l/h
Max. pressure	0.7 bar	0.8 bar	0.6 bar	0.9 bar
Max. delivery height	7 m	8 m	6 m	9 m
Max. submersion depth	8 m	8 m	8 m	8 m
Residual water level	1 mm	1 mm	35 mm	35 mm
Contaminated water with particle size of max.	5 mm	5 mm	30 mm	30 mm
Power cable	10 m H05 RNF	10 m H07 RNF	10 m H05 RNF	10 m H07 RNF
Pump connection	universal (G 1 1/4" M) / universal nipple			
Min. water level for operation	5 mm	5 mm	45 mm	45 mm
Weight approx. (without cable)	3.8 kg	5.4 kg	4.0 kg	5.6 kg
Max. media temperature	35 °C	35 °C	35 °C	35 °C
Mains voltage/ mains frequency	230 V / 50 Hz	230 V / 50 Hz	230 V / 50 Hz	230 V / 50 Hz

Type	9000	13000	8500	13000
Min./max. cut-in height	5 mm / 175 mm	5 mm / 210 mm	65 mm / 230 mm	70 mm / 265 mm
Min./max. cut-out height	3 mm / 170 mm	3 mm / 205 mm	40 mm / 225 mm	40 mm / 260 mm
Noise level L_{WA}¹⁾	48 dB(A)	55 dB(A)	55 dB(A)	55 dB(A)

1) Measuring method according to EN 60335-1

Cut-in / Cut-out height

The cut-in and cut-out height varies.

Only for the submersible pumps Art. No. 1783 / 1785:

The residual water height (flat suction down to approx. 1 mm) is only reached during manual operation with the swivel feet ⑧ turned to 1 mm (see 4. Operation).

9. Service / Warranty

GARDENA guarantees this product for 2 years (from date of purchase). This guarantee covers all serious defects of the unit that can be proved to be material or manufacturing faults. Under warranty we will either replace the unit or repair it free of charge if the following conditions apply:

- The unit must have been handled properly and in keeping with the requirements of the operating instructions.
- Neither the purchaser or a non-authorised third party have attempted to repair the unit.

The impeller is a wearing part and is not covered by the guarantee.

This manufacturer's guarantee does not affect the user's existing warranty claims against the dealer/seller.

If you have any problems with your submersible pump or dirty water pump, please contact our Service or return the defective unit together with a short description of the problem – in case of guarantee, with a copy of the receipt – postage paid to one of the GARDENA Service Centres listed on the back of this leaflet.

D Produkthaftung	Wir weisen ausdrücklich darauf hin, dass wir nach dem Produkthaftungsgesetz nicht für durch unsere Geräte hervorgerufene Schäden einzu-stehen haben, sofern diese durch unsachgemäße Reparatur verursacht oder bei einem Teilaustausch nicht unsere Original GARDENA Teile oder von uns freigegebene Teile verwendet werden und die Reparatur nicht vom GARDENA Service oder dem autorisierten Fachmann durchgeführt wird. Entsprechendes gilt für Ergänzungsteile und Zubehör.
GB Product Liability	We expressly point out that, in accordance with product liability law, we are not liable for any damage caused by our units if it is due to improper repair or if parts exchanged are not original GARDENA parts or parts approved by us, and, if the repairs were not carried out by a GARDENA Service Centre or an authorised specialist. The same applies to spare parts and accessories.
F Responsabilité	Nous vous signalons expressément que GARDENA n'est pas responsable des dommages causés par ses appareils, dans la mesure où ces dommages seraient causés suite à une réparation non conforme, dans la mesure où, lors d'un échange de pièces, les pièces d'origine GARDENA n'auraient pas été utilisées, ou si la réparation n'a pas été effectuée par le Service Après-Vente GARDENA ou l'un des Centres SAV agréés GARDENA. Ceci est également valable pour tout ajout de pièces et d'accessoires autres que ceux préconisés par GARDENA.
NL Productaansprakelijkheid	Wij wijzen er nadrukkelijk op, dat wij op grond van de wet aansprakelijkheid voor producten niet aansprakelijk zijn voor schade ontstaan door onze apparaten, indien deze door onvakkundige reparatie veroorzaakt zijn, of er bij het uitwisselen van onderdelen geen gebruik gemaakt werd van onze originele GARDENA onderdelen of door ons vrijegeven onderdelen en de reparatie niet door de GARDENA technische dienst of de bevoegde vakman uitgevoerd werd. Ditzelfde geldt voor extra-onderdelen en accessoires.
S Produktansvar	Tillverkaren är inte ansvarig för skada som orsakats av produkten om skadan beror på att produkten har reparerats felaktigt eller om, vid reparation eller utbytte, andra än Original GARDENA reservdelar har använts. Samma sak gäller för kompletteringsdelar och tillbehör.
I Responsabilità del prodotto	Si rende espressamente noto che, conformemente alla legislazione sulla responsabilità del prodotto, non si risponde di danni causati da nostri articoli se originati da riparazioni eseguite non correttamente o da sostituzioni di parti effettuate con materiale non originale GARDENA o comunque da noi non approvato e, in ogni caso, qualora l'intervento non venga eseguito da un centro assistenza GARDENA o da personale specializzato autorizzato. Lo stesso vale per le parti complementari e gli accessori.
E Responsabilidad de productos	Advertimos que conforme a la ley de responsabilidad de productos no nos responsabilizamos de daños causados por nuestros aparatos, siempre y cuando dichos daños hayan sido originados por arreglos o reparaciones indebidas, por cambios con piezas que no sean piezas originales GARDENA o bien piezas autorizadas por nosotros, así como en aquellos casos en que la reparación no haya sido efectuada por un Servicio Técnico GARDENA o por un técnico autorizado. Lo mismo es aplicable para las piezas complementarias y accesorios.
P Responsabilidade sobre o produto	Queremos salientar que segundo a lei da responsabilidade do fabricante, nós não nos responsabilizaremos por danos causados pelo nosso equipamento, quando estes ocorram em decorrência de reparações inadequadas ou da substituição de peças por peças não originais da GARDENA, ou peças não autorizadas. A responsabilidade tornar-se-á nula também depois de reparações realizadas por oficinas não autorizadas pela GARDENA. Esta restrição valerá também para peças adicionais e acessórios.
DK Produktansvar	Vi gør udtrykkeligt opmærksom på at i henhold til produktansvarsloven er vi ikke ansvarlige for skader forårsaget af vores udstyr, hvis det skyldes uautoriserede reparationer eller hvis dele er skiftet ud og der ikke er anvendt originale GARDENA dele eller dele godkendt af os, eller hvis reparationerne ikke er udført af GARDENA-service eller en autoriseret fagmand. Det samme gælder for ekstra udstyr og tilbehør.
