GARDENA Flower Box Watering Set

1. Technical data

Transformer with Timer

Encapsulated low-voltage safety transformer with thermoprotection, which prevents damage from overloading or short circuits, for use indoors and outdoors.

Input voltage	230 V
Frequency	50 / 60 Hz
Output voltage	14 V ---
Power	30 VA
Max. ambient temperature	+ 40 °C
Protection class	II
Power cable (supplied)	2 m, type H05-RNF

Pump

Operating voltage	14 V
Operating current (max.)	1.7 A
Max. pressure	1 bar (14 psi)
Max. flow	180 l/h

2. Notes on operating instructions

Translation of the original instructions from German. Please read these operating instructions carefully and observe the notes given. Use the instructions to familiarise yourself with the operating con-

trols, their correct use and the notes on safety.

For safety reasons, children under 16 as well as persons not familiar with these

operating instructions should not use this Flower Box Watering system.

Keep these operating instructions in a safe place.

3. Proper use

The GARDENA Flower Box Watering system is designed for use in domestic environments.

Gardening tools for domestic applications are not designed for use in public grounds, parks,

sport centres, roads, agriculture or forestry.

Compliance with the instructions provided by the manufacturer is a prerequisite for using the tool correctly.

The operating instructions also include the conditions for operation, repair and maintenance.

4. Equipment and application

4.1 Contents (fig. A)

The Flower Box Watering Set consists of the following components:

- ① 1 Transformer with 13 fixed programmes for selection
- ② 1 Submersible pump (operating voltage 14 V)
- ③ 25 Inline Drip Heads, each 2 l/h
- ④ 10 m Supply Pipe \varnothing 4.6 mm (3/16")

- ⑤ 15 Pipe Pegs \varnothing 4.6 mm (3/16")
- ⑥ 3 Sleeves
- ⑦ 2 End Caps (for water pump)
- ⑧ 1 Cleaning Needle
- ⑨ 3 End Caps (for Inline Drip Heads)

4.2 Flower Box Watering system application

The Flower Box Watering System allows fully automatic watering

of plants without tap connection e. g. in flower boxes.

There are 13 fixed programmes available for selection.

Ideal: One Inline Drip Head for each plant. The set supplied can irrigate up to 25 plants (using one Inline Drip Head per plant), in 5 to 6 flower boxes of 1 m length each including spacing between the boxes (10 m total length for the Supply Pipe).

Note: The system can be extended to supply up to 10 flower boxes by adding matching accessories from the GARDENA Micro-Drip-System (Supply Pipe, Pipe Pegs and Inline Drip Heads).

Important note:
In this case, the Supply Pipe must be connected to the second water tap connection of the pump.

A maximum of 40 Inline Drip Heads can be connected.

5. Assembly preparations

5.1 Water quantity/container

Before starting to assemble the system, establish the water consumption over a given period of time, which subsequently determines the size of the container required.

Example:

You want to water 2 flower boxes each containing 4 plants and 4 Inline Drip Heads 3 minutes per day for 10 days.

Each Inline Drip Head delivers 2 l/h, i.e. 0.1 l in 3 mins.

The quantity of water for our 8 Inline Drip Heads will be 0.8 l per day, 8 l for 10 days. (Information regarding the water consumption of the installation for

the various watering programs which can be selected, can be found in the section entitled "Fixed transformer programmes").

Result:

A 10 l bucket will suffice as a container for this example.

Note: When using a water container of a large capacity (eg: 100-150 l or more), the maximum weight load for your balcony according to DIN 1055 should be taken into account.

Note: If the GARDENA Soil Moisture Sensor (Art. No. 1188) is included in the system, watering is carried out taking the moisture content of the soil

into account. This means that despite programmed watering, no water will be distributed if the Soil Moisture Sensor measures sufficient moisture already in the soil (refer also to the operating instructions for the Soil Moisture Sensor).

If the GARDENA Rain Sensor (Art. No. 1189) is connected, watering is interrupted if it starts to rain. It is only worth connecting the GARDENA Rain Sensor if the flower boxes are exposed to natural rain fall and are not fitted underneath the roof.

6. Assembly of the system (fig. B-D)

6.1 Assembly of the watering system

- Fit the sleeve ⑥ to the Supply Pipe ④; attach the Supply Pipe ④ to one of the three water connections ⑫ of the pump and screw the Supply Pipe with the sleeve in accordance with figure B.
- If the remaining two water connections ⑫ of the pump are not in use, close these by screwing on End Caps ⑦.
- Note: We recommend to install the first Inline Drip Head ③ immediately above the water level in the container. This ensures that the system is vented and prevents any dripping of water when the system is turned off, especially if Inline Drip Heads are installed at a lower height than the water level in the container.**

- Cut the Supply Pipe ④ where you want to insert the Inline Drip Head, push the barb into the pipe until completely covered (fig. C, bottom).
- Push the other barb of the Inline Drip Head ③ into the other end of the Supply Pipe ④ (fig. C, top).
- Mark the installation position of all other Inline Drip Heads and install in the manner described in 4. and 5.
- Place the Pipe Pegs ⑤ in the flower boxes in the chosen positions and attach the Supply Pipe ④ to the Pipe Pegs (fig. D).
Tip: We recommend 3 Pipe Pegs for each flower box of 1 m length.
- When using the GARDENA Soil Moisture Sensor (Art. No. 1188) it must be installed in one of the flower boxes to be

watered. When connecting the GARDENA Rain Sensor (Art. No. 1189) it should be connected so that the sensor (and the flower boxes) are exposed to natural rainfall. Please refer to the operating instructions for the GARDENA Soil Moisture Sensor or GARDENA Rain Sensor.

- Close the open end of the last Inline Drip Head using the End Cap supplied ⑭.

6.2 Positioning the water container / level (fig. D)

Important! When choosing the location for the water container, please ensure that the water level is at a lower height than the flower boxes. This will avoid the water dripping after the irrigation process! However, if the flower

boxes are positioned at a lower height than the water level, we

recommend to install the first Inline Drip Head directly above the water level in the container.

This allows venting of the system and prevents dripping.

7. Operating the system

7.1 Operating the system

(fig. A/E)

1. Fill the container with at least the required quantity of water.
2. Connect the pump to the transformer (fig. E).

 **Use only the GARDENA transformer supplied and never connect the pump directly to the mains supply!**

 **Position the transformer in a safe and dry location.**

3. Place the pump in filled container.

Note: The pump must rest flat on the bottom of the water container.

4. If using the GARDENA Soil Moisture Sensor (Art. No. 1188) or the Rain Sensor (Art. No. 1189), connect the sensor now to the transformer at the socket "Sensor" , fig. A.
5. Set the adjustment knob  to position **0** and insert the mains plug into an outlet socket.
6. Set the selected watering programme with the adjustment

knob . The system will operate as per selected programme (refer also to 7.2).

7. Check that all connections are firmly tightened.

 **The pump should never be operated without water, so as to avoid damage to the pump.**

7.2 Fixed transformer programmes

Select one of the following fixed programmes.

Position	Frequency	Run Time	Description	10 Inline Drip Heads l/day
0	Off/Reset	–	No watering; system turned off.	–
M	On	3 min.	Watering once; duration 3 minutes	1 l (once)
1	3rd day	3 min.	Watering every 3rd day for 3 minutes	1 l / 3rd day
2	2nd day	3 min.	Watering every 2nd day for 3 minutes	1 l / 2nd day
3	3rd day	6 min.	Watering every 3rd day for 6 minutes	2 l / 3rd day
4	2nd day	6 min.	Watering every 2nd day for 6 minutes	2 l / 2nd day
5	24 h	3 min.	Watering every 24 hours for 3 minutes	1 l
6	8 h	1 min.	Watering every 8 hours for 1 minute	1 l
7	24 h	6 min.	Watering every 24 hours for 6 minutes	2 l
8	12 h	3 min.	Watering every 12 hours for 3 minutes	2 l
9	8 h	3 min.	Watering every 8 hours for 3 minutes	3 l
10	12 h	6 min.	Watering every 12 hours for 6 minutes	4 l
11	8 h	6 min.	Watering every 8 hours for 6 minutes	6 l
12	6 h	6 min.	Watering every 6 hours for 6 minutes	8 l
13	4 h	6 min.	Watering every 4 hours for 6 minutes	12 l
14	Automatic	–	When the GARDENA Soil Moisture Sensor is connected – see Chapter "Sensor Operation"	–

7.3 Sensor Operation

By selecting **programs 1-13** when the GARDENA Soil Moisture Sensor (Art. No. 1188) is connected, timer-controlled watering is prevented or interrupted if the soil is sufficiently moist.

Alternatively, by connecting the GARDENA Rain Sensor (Art. No. 1189) watering can be prevented or interrupted if it starts to rain.

By selecting **automatic program 14**, watering can be switched on and off completely automatically

depending on the moisture level of the soil. You must connect the GARDENA Soil Moisture Sensor (Art. No. 1188) and set the control knob on the Soil Moisture Sensor to position **2** (see also the notes in the Soil Moisture Sensor operating instructions).

8. Maintenance, care, storage

⚠ Attention! Disconnect the mains plug before carrying out any work on the system!

Cleaning the filter (fig. F)

The pump is almost maintenance-free.

It has an integrated filter which needs to be cleaned in the following way, after the system has been shut-off:

1. Press both orange locking knobs (11) and remove the base of the pump (fig. F).

2. Take out the filter (10) and rinse in clean water.
3. Replace the filter into the suction base.
4. Re-connect the base to the pump. Ensure that locking knobs snap firmly into position.

⚠ Attention! The housing of the pump is sealed at the thread. Any work on electrical parts must only be carried out by GARDENA Service.

In frost affected areas the pump and transformer must be stored in a dry place.

Disposal:
(in accordance with
RL2002/96/EC)

Device may not be added to normal household refuse but must be disposed of in the technically correct way.

9. Faults

Fault	Possible cause	Remedy
Pump does not run.	Mains connector or pump connector are not plugged in.	Insert the mains plug in the outlet socket, or the pump connector plug in the socket at the transformer.
	Soil Moisture Sensor/Rain Sensor indicates moisture.	Wait until the Soil Moisture Sensor/Rain Sensor has dried out sufficiently.
No water is delivered.	Container is empty.	Fill container with water.
	The pump filter (10) is blocked.	Clean the pump filter (section 8.1).
The watering cycles are incorrect.	The adjustment knob (9) of the transformer is set in between programmes.	Set the adjustment knob exactly onto desired position.
The system still runs after the pump has been turned off.	Inline Drip Heads are installed lower than water level in container.	Choose another location for the container, where the water level is below the Inline Drip Heads. Install an Inline Drip Head to vent the system.

If you have any problem with your Flower Box Watering system, please contact our Customer Service or return the defective unit together with a short description of the problem directly to one of the GARDENA Service Centres listed on the back of this leaflet.

If covered under guarantee, please include the completed and signed warranty card.

We expressly point out that, in accordance with the product liability law, we are not liable for any damage caused by our units if it is due to improper

repair or if parts exchanged are not original GARDENA parts or parts approved by us, and, if the repairs were not carried out by a GARDENA Service Centre or an authorised specialist. The same applies to spare parts and accessories.

10. Notes on correct use, safety notes

 Only use Original GARDENA parts, as the function of the system cannot otherwise be guaranteed.

 Check the power cable for the transformer and the extension cable for the pump at regular intervals for damage. Only connectors and cables in perfect condition should be used. Disconnect the connector from the mains immediately in the event of damage to the power cable

at the transformer or to the connecting cable for the pump.

 Damaged power cables cannot be replaced on encapsulated transformers.

 Damaged connecting cables to the pump can only be replaced by GARDENA Service.

 Disconnect the mains plug of the transformer from the outlet socket for all work on the Flower Box Watering system.

 The pump may only be operated with 14-V protected low-voltage in combination with the GARDENA transformer and timer.

 Risk of fatal injuries if connected directly to 230 V!

 Do not let the pump run dry.

D

Garantie

GARDENA gewährt für dieses Produkt 2 Jahre Garantie (ab Kaufdatum). Diese Garantieleistung bezieht sich auf alle wesentlichen Mängel des Gerätes, die nachweislich auf Material- oder Fabrikationsfehler zurückzuführen sind. Sie erfolgt durch die Ersatzlieferung eines einwandfreien Gerätes oder durch die kostenlose Reparatur des eingesandten Gerätes nach unserer Wahl, wenn folgende Voraussetzungen gewährleistet sind:

- Das Gerät wurde sachgemäß und laut den Empfehlungen in der Betriebsanleitung behandelt.
- Es wurde weder vom Käufer noch von einem Dritten versucht, das Gerät zu reparieren.

Diese Hersteller-Garantie berührt die gegenüber dem Händler / Verkäufer bestehenden Gewährleistungsansprüche nicht.

Im Garantiefall schicken Sie bitte das defekte Gerät zusammen mit einer Kopie des Kaufbelegs und einer Fehlerbeschreibung per Abhol-Service (nur in Deutschland) oder frankiert an die auf der Rückseite angegebene Serviceadresse.

Unfreie Paketeinsendungen werden im Postverteilterzentrum ausgefiltert und erreichen uns nicht.

Nach erfolgter Reparatur senden wir das Gerät frei an Sie zurück.

GB

Guarantee

GARDENA guarantees this product for 2 years (from date of purchase). This guarantee covers all serious defects of the unit that can be proved to be material or manufacturing faults. Under warranty we will either replace the unit or repair it free of charge if the following conditions apply:

- The unit must have been handled properly and in keeping with the requirements of the operating instructions.
- Neither the purchaser nor a non-authorised third party have attempted to repair the unit.

This manufacturer's guarantee does not affect the user's existing warranty claims against the dealer/seller.

If a fault occurs with your GARDENA Flower Box Watering system, please return the faulty unit together with a copy of the receipt and a description of the fault, with postage paid to one of the GARDENA Service Centres listed on the back of these operating instructions.

F

Garantie

Pour mieux vous servir, GARDENA accorde pour cet appareil une garantie contractuelle de 2 ans à compter du jour de l'achat. Elle est assurée par le remplacement gratuit des pièces défectueuses ou de l'appareil. Le choix en étant laissé à la libre initiative de GARDENA.

En tout état de cause s'applique la garantie légale couvrant toutes les conséquences des défauts ou vices cachés (article 1641 et suivants du Code Civil).

Pour que ces garanties soient valables, les conditions suivantes doivent être remplies :

- L'appareil a été manipulé de manière adéquate, suivant les instructions du mode d'emploi.
- Il n'y a eu aucun essai de réparation, ni par le client, ni par un tiers.

Une intervention sous garantie ne prolonge pas la durée initiale de la garantie contractuelle.

Toutes les revendications dépassant le contenu de ce texte ne sont pas couvertes par la garantie, quel que soit le motif de droit.

Pendant la période de garantie, le Service Après-Vente et les Centres SAV agréés effectueront, à titre payant, les réparations nécessaires par suite de manipulations erronées.

En cas de garantie, veuillez envoyer le produit en port payé avec le bon d'achat et une description du problème, à l'adresse du Service Après-Vente figurant au verso.

NL

Garantie

GARDENA geeft op dit product 2 jaar garantie (vanaf de aankoopdatum). Deze garantie heeft betrekking op alle wezenlijke defecten aan het toestel, die aanwijsbaar op materiaal- of fabricagefouten berusten. Garantie vindt plaats door de levering van een vervangend apparaat of door de gratis reparatie van het ingestuurde apparaat, naar onze keuze, indien aan de volgende voorwaarden is voldaan:

- Het apparaat werd vakkundig en volgens de adviezen in de instructies voor gebruik behandeld.
- Noch de koper, noch een derde persoon heeft getracht het apparaat te repareren.

Deze garantie van de producent heeft geen betrekking op de ten aanzien van de handelaar / verkoper bestaande aansprakelijkheid.

Stuur in geval van garantie het defecte apparaat samen met de kassabon en een beschrijving van de storing gefrankeerd op naar het op de achterzijde aangegeven serviceadres.
