Dear user,

Congratulations, you are now the proud owner of a GARDENA Holiday Watering Set.

The Holiday Watering Set has been developed for automatic watering of your pot plants during your absence (e. g. when you are on holiday). But it can also be used for watering plants on patios and terraces.

The following instructions will help you to properly use your Holiday Watering Set. Therefore, please read these operating instructions carefully.

We have split up the operating instructions into two parts. In the first part, you will find instructions for installation and operation. The second part provides technical data as well as important safety instructions.

**Note:** Please keep these instructions in a safe place. Your next holiday is quite certain!

## 1. What will the Holiday Watering Set do for you?

Just imagine an automatic watering can which does your work during your absence. The Holiday Watering Set includes a pump transporting water from a container to the individual plants for one minute per day.

You can water up to 36 plants. It is up to you to determine the amount of water supplied to your plants every day. To get a feeling for the right amount of water, we recommend to you to install and test the system some days before leaving on holidays.

See the photo below for a completely installed system.

## 2. What are the components of the Holiday Watering Set?

Take all the components out of the carton and lay them out in front of you as shown on the photo.

1. Transformer with timer
2. Pump (14 V low-voltage)
3. Distribution pipe ( $\varnothing$  4 mm)
4. Drip distributors 1–3 (light, medium and dark grey) with plugs
5. Drip pipe ( $\varnothing$  2 mm)
6. Pipe pegs
7. Nuts and sealing plugs
8. Container (9 l) only for Art. No. 1266

## 3. What needs to be done before installation?

You have acquired an automatic watering can. Before installing your system, estimate roughly how much water you give regularly to your plants. You will see that there are great differences. So, form three groups of plants corresponding to the watering needs. Just as shown on the photo.

**Note:** When grouping the pots, ensure that they are placed above the water level of the container.

This prevents that the water flow continues after the pump has switched off. Also, ornamental pots and pans should be large enough to catch excessive water.

After having grouped your pot plants, each group is assigned a drip distributor.

The light grey drip distributor 1 has been developed for plants with low water demand and delivers approx. 15 ml **per outlet** every day.

The medium grey drip distributor 2 for plants with normal water demand delivers approx. 30 ml **per outlet** every day.

And for the plants with high water demand, you have the dark grey drip distributor 3. It delivers approx. 60 ml **per outlet** every day.

So, please remember:

**light grey drip distributor 1**  
approx. 15 ml per outlet every day  
for plants with low water demand

**medium grey drip distributor 2**  
approx. 30 ml per outlet every day  
for plants with normal water demand

**dark grey drip distributor 3**  
approx. 60 ml per outlet every day  
for plants with high water demand

**Note:** When grouping together your plants, choose a place which is not too close to the window so the plants are not exposed to direct sunlight. It is best to place them about 1 m away from the window.

In addition, do not forget that the water demand of individual plants can change when they have been moved. At bright, warm places they need more water than at shady, cool places.

## 4. Installation

First, connect the drip distributors to the pump (2) using the 4 mm thick distribution pipe (3).

On closer inspection of your pump you will see that it has three connections, one for each drip distributor.

Cut the distribution pipes to size with a normal pair of scissors. The length of each pipe is the distance between the pump (take into account the location of the water container) and the individual drip distributors for each group of plants.

Now you need the nuts included in the Holiday Watering Set. Put one end of the pipe through the nut so that the thread points to the end (ill. 1). Push the end over the connection on the drip distributor and tighten the nut (ill. 2). Connect the pipe in the same way to the pump.

If not all drip distributors are required, please seal off the unused pump outlets with the plugs supplied (ill. 3).

Now install the drip pipes (5) (pipe with smaller diameter). Cut the drip pipes to size. The length is the distance between the drip distributor and the corresponding plant pot. We recommend to cut the water outlet end diagonally as this will allow a better flow (ill. 4). Click that end onto one of the three fixing devices at the pipe peg (6). Then put the pipe peg into the plant pot (ill. 5).

Cut the other end straight and push it over one outlet of the drip distributor as shown in the picture. Take care that the hose end fits tight (ill. 6).

Use the enclosed plugs to seal those outlets on the drip distributor which are not in use. Simply plug them firmly onto the outlets (ill. 7).

If the enclosed 20 plugs are not sufficient, you can solve the problem by connecting those outlets not in use with a short piece of drip pipe, as shown in ill. 8.

After having installed the drip pipes for one group of plants, you should have a similar configuration as shown in the opposite photo (ill. 9). Now you can continue to connect also the other plant groups to your watering system in the same way.

## 5. Water container

### 5.1. For those who do not have the GARDENA Water Container

You have now almost completed your task. You now need a water container, and for making a test run you need nothing more than a simple bucket.

For your holidays you may need a larger container. It is very easy to calculate the size. When using all 36 outlets of the three drip distributors, you need approx. 1.3 l of water per day.

How many days are you absent?  
Multiply the number of days by 1.3 in order to get the litres of water needed.

Example: 21 days vacation (you're lucky!) means  $21 \times 1.3 = 27.3$  l.

In this example, you could use for instance a washtub.

Remember evaporation will occur and to counteract this you will need to provide a little more water than calculated. This will also prevent damage to the pump caused by dryrunning due to a lack of water.

**Hint:** Reduce the natural formation of algae by protecting the water from light (for instance cover the container with a towel).

## 5.2. For those who have the GARDENA Water Container

The GARDENA Water Container (8) is sufficient for approximately one week if the system is fully used, i. e. if all outlets of the drip distributors are in use. If you are away from home for a longer time, please see point 5.1.

The cover has a small outlet through which the distributor pipes and the pump cable are passed (ill. 10).

## 6. Operation

Now the great moment comes. Fill the container with water and connect the pump to the transformer (1) (ill. 11).

**⚠ Never connect the pump to another transformer or directly to the power mains!  
Place the transformer at a safe, dry place.**

Put the pump into the water (ill. 12). Take care that the pump stands firmly on the bottom of the container. When the plug belonging to the transformer is placed into the socket the pump starts to operate and runs for approximately one minute. Check that all connections are leak-free.

**⚠ To prevent damage of the pump, never operate your pump without water.**

To start your system again, pull the transformer plug from the socket and connect it again. This is also the way to determine the start time of your system.

Every 24 hours the system starts automatically for one minute. You determine the start time by connecting the transformer to the mains.

Example: You activate your system at 4.00 p.m. This means that your plants will be watered every day at 4.00 p.m. for one minute.

**Note:** The pump is activated even when the power supply has been interrupted, e. g. after a power failure during a thunderstorm. In this case, the start time would change but the function of the system would not be affected.

Watch your system for some days. Change the assignment of the plants to the different drip distributors, if necessary.

**Hint:** Plants react better to a lack of watering than to excessive watering. Correct your drip pipe configuration, if one hour after watering there is still water in the pan.

If you have plants with a very low water demand, you can water several plants via one drip pipe. For this, put the plants (which cannot absorb moisture) into a large pan and fix the drip pipe so that the water drips into the pan. See ill. 13.

Of course, you can also water one plant with high water demand via several drip pipes (ill. 14).

## 7. Maintenance

The system is almost maintenance free. When you stop the operation of the system, the foam-plastic filter of the pump should be cleaned. For this, remove the orange base of the pump by pressing the lateral lock, take out the sieve (ill. 15) and rinse it in clear water.

When dismantling the system, remember that there is still some water in the pipes. Simply lift the drip distributors slightly and let the remaining water run into the pots.

## 8. And if ...

... no water is pumped?

... the water flow continues after the pump has switched off?

... you need additional parts for operating your system next time?

... the outlets of a drip distributor are not sufficient for watering the plant group?

Clean the sieve of the pump (see point 7).

In this case, at least one of the drip pipe ends is below the water level of the container. Place the pots in such a way that they are above the water level of the container.

Just contact our Customer Service where can order every single component, including the pipes. (For the address, see last page.)

Use the next smaller drip distributors and connect to your plant pot twice the number of drip pipes planned for the original drip distributor (one outlet of the dark grey distributor 3 corresponds to two outlets of the medium grey drip distributor 2, or to four outlets of the light grey drip distributor 1).

## 9. Safety instructions

 For safety reasons children under the age of 16 or people not familiar with these operating instructions must not use the Holiday Watering Set.

 Always use Original GARDENA parts, otherwise proper function of the system cannot be guaranteed.

 Check regularly if the power cable is damaged or worn. Plug and cable may be used only in faultless condition. If the power cord is damaged, disconnect it immediately.

 On sealed transformers the power cable cannot be replaced if it is damaged.

 Always disconnect the transformer when working on the GARDENA Holiday Watering Set.

 Operate the pump only with 14 V low-voltage in connection with the GARDENA Transformer with Timer.  
**Connecting the system directly to the 230 V power supply will cause serious injury or death!**

 Never operate the pump without water!

With any other problem, please contact the Technical Service of GARDENA or send the defective unit directly to one of the GARDENA Service Centres mentioned on the last page.

## Technical data of the transformer with timer

The transformer is a fully sealed low-voltage safety transformer with thermal protective switch for indoor and outdoor use. The thermal protective switch prevents damage caused by overload or short circuit.

 **Place the transformer at a safe, dry place.**

**Voltage** Input 230 V / 50 Hz A.C. ~  
Output 14 V D.C. ---

**Performance** 30 VA

**Ambient temperature** max. + 40 °C

**Safety class** II

**Power cable** 2 m H05 RNF

**Application** indoor and outdoor use

**Noise level**  $L_{WA} < 40$  dB (A)

### Disposal:

(in accordance with  
RL 2012/19/EU)

The product must not be added to normal household waste. It must be disposed of in line with local environmental regulations.

→ Important: Make sure that the unit is disposed of via your municipal recycling collection centre.

### Warranty:

GARDENA guarantees this product for 2 years (from date of purchase). This guarantee covers all serious defects of the unit that can be proved to be material or manufacturing faults. Under warranty we will either replace the unit or repair it free of charge if the following conditions apply:

- The unit must have been handled properly and in keeping with the requirements of the operating instructions.
- Neither the purchaser or a non-authorized third party have attempted to repair the unit.

This manufacturer's guarantee does not affect the user's existing warranty claims against the dealer/seller.

If you have any problems with this product, please contact our Service or return the defective unit together with a short description of the problem – in case of guarantee, with a copy of the receipt – postage paid to one of the GARDENA Service Centres listed on the back of this leaflet.

**D Produkthaftung**

Wir weisen ausdrücklich darauf hin, dass wir nach dem Produkthaftungsgesetz nicht für durch unsere Geräte hervorgerufene Schäden einzustehen haben, sofern diese durch unsachgemäße Reparatur verursacht oder bei einem Teileaustausch nicht unsere originale GARDENA Teile oder von uns freigegebene Teile verwendet wurden und die Reparatur nicht vom GARDENA Service oder dem autorisierten Fachmann durchgeführt wird. Entsprechendes gilt für Ergänzungssteile und Zubehör.

**GB Product Liability**

We expressly point out that, in accordance with the product liability law, we are not liable for any damage caused by our units if it is due to improper repair or if parts exchanged are not original GARDENA parts or parts approved by us, and, if the repairs were not carried out by a GARDENA Service Centre or an authorised specialist. The same applies to spare parts and accessories.

**F Responsabilité**

Nous vous signalons expressément que GARDENA n'est pas responsable des dommages causés par ses appareils, dans la mesure où ces dommages seraient causés suite à une réparation non conforme, dans la mesure où, lors d'un échange de pièces, les pièces d'origine GARDENA n'auraient pas été utilisées, ou si la réparation n'a pas été effectuée par le Service Après-Vente GARDENA ou l'un des Centres SAV agréés GARDENA. Ceci est également valable pour tout ajout de pièces et d'accessoires autres que ceux préconisés par GARDENA.

**NL Productaansprakelijkheid**

Wij wijzen er nadrukkelijk op, dat wij op grond van de wet aansprakelijkheid voor producten niet aansprakelijk zijn voor schade ontstaan door onze apparaten, indien deze door onvakkundige reparatie veroorzaakt zijn, of er bij het uitwisselen van onderdelen geen gebruik gemaakt werd van onze originele GARDENA onderdelen of door ons vrijgegeven onderdelen en de reparatie niet door de GARDENA technische dienst of de bevoegde vakman uitgevoerd werd. Ditzelfde geldt voor extra-onderdelen en accessoires.

**S Produktansvar**

Tillverkaren är inte ansvarig för skada som orsakats av produkten om skadan beror på att produkten har reparerats felaktigt eller om, vid reparation eller utbyte, andra än Original GARDENA reservdelar har använts. Samma sak gäller för kompletteringsdelar och tillbehör.

**DK Produktansvar**

Vi gør udtrykkeligt opmærksom på, at vi i henhold til produktansvarsloven ikke er ansvarlige for skader forårsaget af vores udstyr, såfremt det sker på grund af uautoriserede reparationer eller hvis dele er skiftet ud og der ikke er anvendt originale GARDENA dele eller dele godkendt af os, eller hvis reparationerne ikke er udført af GARDENA-service eller en autoriseret fagmand. Det samme gælder for ekstra udstyr og tilbehør.

**FI Tuotevastuu**

Korostamme nimenomaan, että tuotevastuulain nojalla emme ole vastuussa laitteistamme johtuneista vahingoista, mikäli nämä ovat aiheutuneet epäasianmukaisesta korjauksesta tai osia vaihdettaessa ei ole käytetty alkuperäisiä GARDENA-varaosia tai hyväksymiämme osia ja korjauksen on suorittanut muu kuin GARDENA-huoltokeskus tai valtuuttamamme ammattihenkilö. Tämä pätee myös lisäosiin ja lisävarusteisiin.

**I Responsabilità del prodotto**

Si rende espressamente noto che, conformemente alla legislazione sulla responsabilità del prodotto, non si risponde di danni causati da nostri articoli se originati da riparazioni eseguite non correttamente o da sostituzioni di parti effettuate con materiale non originale GARDENA o comunque da noi non approvato e, in ogni caso, qualora l'intervento non venga eseguito da un centro assistenza GARDENA o da personale specializzato autorizzato. Lo stesso vale per le parti complementari e gli accessori.
