## 1. Area of application of your GARDENA Turbotrimmer

### Purpose:

The GARDENA Turbotrimmer is designed for trimming and cutting areas of grass and lawns in private house and hobby gardens. The Turbotrimmer must not be used in public facilities, parks, sports grounds, next to roads or in agriculture or forestry.

### Please note:

**For safety reasons, the GARDENA Turbotrimmer must not be used for hedge trimming or for shredding for composting.**

## 2. Safety Instructions

→ Please read the notes on safety on the Trimmer.

### CAUTION!

→ Please read the operating instructions before using this tool.

### DANGER!

→ Keep your Turbotrimmer away from water and rain!

### DANGER!

Risk of injury to other people!

→ Keep bystanders away.

### Switch off!

Remove battery pack before adjusting or cleaning.

**Warning:** The cutting line continues to rotate after the machine has been switched off.

### DANGER! Eye and ear injuries!

→ Wear eye and hearing protection!

### Check your Trimmer before each use

→ Always visually inspect your Trimmer before each use.

→ Check that the ventilation slots are not obstructed in any way.

Do not use the trimmer if it is damaged or if its safety devices (pressure switch, safety cover) and/or the filament cassette are damaged or worn.

→ Never bypass the safety devices.

→ Inspect the area to be cut before you begin work. Remove any foreign objects and look out for foreign objects (such as stones, pieces of wood, strings and wires) while you are working.

→ However, should you encounter an obstacle during work, take the trimmer out of operation and remove the battery. Remove the obstacle; inspect the trimmer for potential damage and arrange for it to be repaired if necessary.

### Use / responsibility

**DANGER! Tool does not stop immediately when turned off!**

→ Keep hands and feet away from the work area until the cutting filament is stationary!

The Trimmer can cause serious injuries.

→ Use the Trimmer only for the purpose specified in these operating instructions.

You are responsible for safety in the work area (2 metre radius).

→ Ensure that no other people (especially children) and animals are in close proximity to the danger area (15 metre radius).

**Warning! When wearing hearing protection, and due to the noise produced by the unit, the operator may not notice persons approaching.**

Remove the battery after use and regularly inspect the trimmer, especially the filament cassette, for damage and arrange appropriate repair if necessary.

→ Always wear an eye shield or safety goggles!

→ Wear sturdy shoes and long trousers to protect your legs. Keep your fingers and feet away from the cutting filament – above all when starting work.

→ Always ensure that you have a secure foothold whilst working and that you keep your balance at all times.

Take extra care when walking backwards. You may stumble!

→ Only work in the daylight or when visibility is good.

→ Do not overreach. In order to prevent overtiredness, alternate working positions and ensure sufficient breaks are taken. This enables better control of the power tool in unexpected situations.

### Interrupting work

→ Never leave the Trimmer unattended where you are working.

→ When stopping work, remove the battery and store the trimmer in a safe place.

→ If you stop work in order to move to another work area, the trimmer must be switched off, wait until the work tool is stationary and remove the battery. Always carry the trimmer at the handle.

### Familiarise yourself with the surroundings

→ Familiarise yourself with the surroundings and look out for possible dangers which you may not hear due to machine noise.

- Never use the Trimmer when there is a risk of thunderstorms, when it is raining or in damp, wet areas.
- Do not use the trimmer in the immediate vicinity of or in water (swimming pool, streams or garden ponds).

### **Battery safety**

- Please observe the safety instructions on the battery.

#### **FIRE RISK! Short-circuit!**

- **Do not bridge the contacts of the battery with metal components.**

#### **FIRE RISK!**

**The battery to be charged must be placed on a non-flammable, heat resistant and non-conductive surface while charging.**

**Keep corrosive, flammable and easily combustible objects clear of the battery charger and the battery. Do not cover the battery charger and the battery while charging.**

**Unplug the battery charger immediately in the event of smoke formation or fire.**

**Only use the original GARDENA Battery Charger for charging. The use of other battery chargers may damage the batteries irreparably and even cause a fire.**

#### **RISK OF EXPLOSION!**

**Protect battery from heat and fire. Do not leave on radiators or expose to strong sunshine for long periods.**

**Do not use the battery charger outdoors.**

- **Protect the the battery charger from damp or wet areas.**

Only use the battery in ambient temperatures

of between 0 °C and 40 °C.

A non-functioning battery must be disposed of correctly. It may not be sent via post. For further details, please contact your local disposal companies.

The battery charger should be checked regularly for signs of damage or ageing (brittleness) and may only be used if it is in perfect condition.

The charger unit provided may only be used to charge the rechargeable batteries supplied with the Turbotrimmer.

Non-rechargeable batteries must not be charged with this battery charger (danger of fire).

The Trimmer must not be operated during charging.

Only charge battery between 0 – 45 °C. After heavy duty service allow battery to cool down first.

Only the original GARDENA battery may be used.

### ***Storage***

The trimmer must not be stored over 35 °C or under direct exposure to sunlight.

Never store the Trimmer with attached battery, this prevents misuse and accidents.

Do not store the trimmer in places with static electricity.

Warning! This unit makes an electromagnetic field while it operates. This field may under some conditions interfere with active or passive medical implants. To decrease the risk of conditions that can possibly injure or kill, we recommend persons with medical implants to speak with their physician and the medical implant manufacturer before operating.

Warning! Keep toddlers away when you assemble the unit. Small parts can be easily swallowed. There is also a risk that the polybag can suffocate toddlers.

## 3. Assembly

### Assembling the trimmer:

#### CAUTION!

The handle may only be assembled if the cable between the handle and the shaft is in a perfect condition. The handle may not be assembled if the cable is damaged. Contact GARDENA customer service in such a case.

#### CAUTION!

The trimmer may only be operated provided that the protective cover (11) is assembled.

1. Carefully remove the handle (1) together with the shaft (2) from the packaging. In doing so, no stress may be exerted upon the cable.
2. Ensure that the threaded collar (15) is in an open position (*padlock symbol open*).
3. Slide the handle (1) onto the shaft (2) until it audibly engages. In doing so, the cable may not become twisted or jammed.
4. By pulling on the handle (1), check whether it is firmly fixed to the shaft (2). Once assembled, the handle (1) and shaft (2) cannot be separated.
5. Close the threaded collar (15) (*padlock symbol closed*).
6. Pull the lock (19) belonging to the additional handle (26), push in both of the snap-fits (25) belonging to the additional handle (26) and, with the grooves (R) pointing forwards, snap them into the holder (27).
7. From the front, push the plant guard (30) into the upper groove (10) of the trimmer head (3). In doing so, ensure that the impeller (26) can rotate freely (i.e. insert the bow with the kink pointing upwards).
8. Place the protective cover (11) on top of the trimmer head (3).
9. Turn the protective cover (11) until it can be pushed over the trimmer head entirely (the two arrows (A1), (A2) are directly across from each other).
10. Rotate the protective cover (11) anti-clockwise until it audibly engages.

## 4. Initial Operation

### Charging the battery:

#### WARNING!

Overvoltage damages batteries and the battery charger.

→ Ensure the correct mains voltage.

Before using for the first time, the battery must be fully charged. Charging time (for uncharged battery) see 10. Technical Data.

The lithium-ion battery can be charged in any state of charge, and the charging process can be interrupted at any time without harming the battery (no memory effect).

1. Depress both locking buttons (4) and remove the battery (5) from the battery holder (6) on the handle.

2. Plug the plug of the charger cable (7) into the battery (5).

3. Plug battery charger (8) into a mains socket.

**Charging indicator lamp (9) at the charger unit flashes green once per second: Battery is being charged.**

**Charging indicator lamp (9) at the charger unit is lit green: Battery is fully charged.**

(For charging time, see 10. Technical Data.)

**Battery charging status indicator during charging:**

100 % charged L1, L2 and L3 lit.

66 – 99 % charged L1 and L2 lit, L3 flashing.

33 – 65 % charged L1 lit, L2 flashing.

0 – 32 % charged L1 flashing.

**Check the charge status regularly while charging.**

4. Once completely charged, disconnect the battery (5) from the battery charger (8). Disconnect the battery (5) from the battery charger (8) first, then unplug the battery charger (8).

5. Slide the battery (5) onto the battery holder (6) on the handle until it audibly engages.

**Avoid exhaustive discharge:**

If the battery is empty, the full discharge protection automatically switches off the device to prevent the battery from discharging fully. To prevent the fully charged battery from self-discharging via the unplugged charger, it should be disconnected from the charger after charging. If the battery was stored for more than 1 year, it must be fully recharged.

If the battery was fully discharged, the charging indicator lamp (9) will flash rapidly at the start of charging (twice per second).

If the charging indicator lamp (9) still flashes rapidly after 10 minutes, a fault has occurred (see 8. Troubleshooting).

If the error-LED (W) on the battery flashes, a fault has occurred (see 8. Troubleshooting). In case of a completely empty battery it will take approx. 20 minutes until the LEDs on the battery will indicate charging. But the charging process is indicated by the flashing LED (9) on the charger.

**Battery charging status indicator during operation:**

→ Press button (B) on the battery.

66 – 99 % charged L1, L2 and L3 lit.

33 – 65 % charged L1 and L2 lit.

10 – 32 % charged L1 lit.

1 – 9 % charged L1 flashing.

0 % charged No indicator.

## 5. Operation

**DANGER!**

**Risk of injury if the Turbotrimmer does not switch off when you release the start button.**

→ Never bypass the safety devices or switches (e.g. by tying the safety lock to the handle).

**Risk of injury!**

→ Remove the battery prior to each adjustment of the working position, to the shaft length, additional handle or plant guard!

**Setting the working position:**

**Working position 1:**  
Standard trimming

**Working position 2:**  
Trimming beneath obstacles

**Working position 1:**  
For standard trimming.

**Working position 2:**

1. Press the foot pedal (16) and lower the shaft downwards into the desired working position.
2. Release the foot pedal (16) and allow the shaft to engage.

**CAUTION!** Avoid contact between the ground and the trimmer head in working position 1 + 2.

**Setting the trimmer to body height:**

**Setting the shaft length:**

→ Loosen the clamping sleeve (15), extend the handle (1) to the desired shaft length and re-tighten the threaded collar (15).

The clamping sleeve (15) must be fastened firmly enough to prevent the shaft from being moved.

**Setting the additional handle:**

→ Pull the lock (19) belonging to the additional handle (26), set the additional handle (26) to the desired incline and release the lock (19).

If the trimmer is correctly set to the body height, the posture is upright and the trimmer head in **working position 1** is tilted forwards slightly.

→ Hold the trimmer by the handle (1) and additional handle (26) in such a manner that the trimmer head is tilted forwards slightly.

## Adjusting the plant guard:

Working position

Parking position

→ Turn plant guard ③⑩ through 90° into the required position until it locks into place.

### Starting the trimmer:

### Switching the trimmer on:

1. Press and hold the safety lock ②⑩ and then press the start button ②⑪ on the handle.
2. Release the safety lock ②⑩ again.

### Switching the trimmer off:

→ Release the start button ②⑪ on the handle.

### Lengthening of the filament (automatic):

A clean cut is achieved only with the maximum filament ③① length.

The cutting filament ③① is **lengthened automatically** when the filament cassette comes to a **standstill** after **switch off**.

As the filament can only be lengthened in small increments, it can be necessary in some cases to repeat the switch-off/ switch-on action several times (up to 6 times). Important is that the filament cassette comes to a complete standstill each time.

The cutting filament has been sufficiently lengthened when, after switch-on, it audibly strikes the filament limiter ③②.

The filament cassette has to be replaced (GARDENA Replacement Filament Cassette Art. No. 5306) when the cutting filament has been used up.

## 6. Storage

### To put into storage:

Store out of the reach of children.

1. Charge battery.
2. Store your Turbotrimmer in a dry place where it is protected from frost.

### Recommendation:

The trimmer can be suspended by the handle.

The trimmer head is not placed upon any unnecessary strain if stored in a suspended manner.

### Disposal:

(in accordance with  
RL 2012/19/EU)

The product must not be added to normal household waste. It must be disposed of in line with local environmental regulations.

→ Important: Make sure that the unit is disposed of via your municipal recycling collection centre.

**Disposal of batteries:**

The GARDENA Trimmer contains lithium-ion batteries that should not be discarded with normal household waste at the end of their life.

**Important:**

Please return the lithium-ion batteries to your GARDENA dealer or dispose of them properly at a public recycling centre.

1. Discharge lithium-ion batteries completely.
2. Dispose of lithium-ion batteries properly.

## 7. Maintenance

**DANGER!**

**There is a risk of injury from the cutting filament!**  
→ Remove the battery immediately before maintenance!

**Risk of injury and risk of damage to property!**  
→ Never clean the trimmer with water or with a water jet (in particular a high-pressure water jet).

**Cleaning the trimmer:**

**The ventilation slots must always be free of dirt.**

→ Clean all moving parts after each use, and especially remove any grass and dirt from the cover (11) and ventilation slots (22).

**Replacing the filament cassette:**

**Risk of injury!**

→ Never use metallic cutting elements or replacement parts and accessories not provided by GARDENA.

**Only use original GARDENA Filament Cassettes. You can order Replacement Filament Cassettes from your GARDENA dealer or directly from the GARDENA Customer Service.**
