1. Area of application of your GARDENA Accu Shrub Shears

Proper use:

The GARDENA Accu Shrub Shears are intended for cutting individual bushes, shrubs and climbing plants in private domestic and hobby gardens.

DANGER!
Risk of injury!

The Accu Shears may not be used for chopping in the sense of composting.
The Accu Shrub Shears are not suited for cutting the lawn/lawn edges.

2. Safety instructions

→ Please note the safety instructions on the Accu Shears.

WARNING!
→ Please read the operating instructions before using this tool.

Save all warnings and instructions for future reference. *The term "power tool" in the warnings refers to your mains operated (corded) power tool or battery-operated (cordless) power tool.*

WARNING!
→ Do not use in rain or wet conditions.

1) Work area safety

- a) Keep work area clean and well lit.** *Cluttered or dark areas invite accidents.*
- b) Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust.** *Power tools create sparks which may ignite the dust or fumes.*
- c) Keep children and bystanders away while operating a power tool.** *Distractions can cause you to lose control.*

General Power Tool Safety Warnings

WARNING! Read all safety warnings and all instructions. *Failure to follow the warnings and instructions may result in electric shock, fire and / or serious injury.*

2) Electrical safety

a) Power tool plugs must match the outlet.

Never modify the plug in any way. Do not use any adaptor plugs with earthed (grounded) power tools. *Unmodified plugs and matching outlets will reduce risk of electric shock.*

b) Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators. *There is an increased risk of electric shock if your body is earthed or grounded.*

c) Do not expose power tools to rain or wet conditions. *Water entering a power tool will increase the risk electric shock.*

d) Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts. *Damaged or entangled cords increase the risk of electric shock.*

e) When operating a power tool outdoors, use an extension cord suitable for outdoor use. *Use of a cord suitable for outdoor use reduces the risk of electric shock.*

f) If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply. *Use of an RCD reduces the risk of electric shock.*

3) Personal safety

a) Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication. *A moment of inattention while operating power tools may result in serious personal injury.*

b) Use personal protective equipment. Always wear eye protection. *Protective equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.*

c) Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source and /or battery pack, picking up or carrying the tool. *Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.*

d) Remove any adjusting key or wrench before turning the power tool on. *A wrench or a key left attached to a rotating part of the power tools may result in personal injury.*

e) Do not overreach. Keep proper footing and balance at all times. *This enables better control of the power tool in unexpected situations.*

f) Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts. *Loose clothes, jewellery or long hair can be caught in moving parts.*

g) If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used. *Use of dust collection can reduce dust-related hazards.*

4) Power tool use and care

a) Do not force the power tool. Use the correct power tool for your application.

The correct power tool will do the job better and safer at the rate for which it was designed.

b) Do not use the power tool if the switch does not turn it on and off.

Any power tool that cannot be controlled with the switch is dangerous and must be repaired.

c) Disconnect the plug from the power source and /or the battery pack from the power tool before making any adjustments, changing accessories, or storing power tools.

Such preventive safety measures reduce the risk of starting the power tool accidentally.

d) Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool. *Power tools are dangerous in the hands of untrained users.*

e) Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool's operation. If damaged, have the power tool repaired before use. *Many accidents are caused by poorly maintained power tools.*

f) Keep cutting tools sharp and clean.

Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.

g) Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed.

Use of the power tool for operations different from those intended could result in a hazardous situation.

5. Battery tool use and care

a) Recharge only with the charger specified by the manufacturer. *A charger that is suitable for one type of battery pack may create a risk of fire when used with another battery pack.*

b) Use power tools only with specifically designated battery packs. *Use of any other battery packs may create a risk of injury and fire.*

c) When battery pack is not in use, keep it away from other metal objects, like paper clips, coins, keys, nails, screws or other small metal objects, that can make a connection from one terminal to another. *Shorting the battery terminals together may cause burns or a fire.*

d) Under abusive conditions, liquid may be ejected from the battery; avoid contact. If contact accidentally occurs, flush with water. If liquid contacts eyes, additionally seek medical help. *Liquid ejected from the battery may cause irritation or burns.*

6. Service

Have your power tool serviced by a qualified repair person using only identical replacement parts. *This will ensure that the safety of the power tool is maintained.*

Hedge trimmer safety warnings:

- **Keep all parts of the body away from the cutter blade. Do not remove cut material or hold material to be cut when blades are moving. Make sure the switch is off when clearing jammed material.**

A moment of inattention while operating the hedge trimmer may result in serious personal injury.

- Carry the hedge trimmer by the handle with the cutter blade stopped. When transporting or storing the hedge trimmer always fit the cutting device cover.

Proper handling of the hedge trimmer will reduce possible personal injury from the cutter blades.

- Hold the power tool by insulated gripping surfaces only, because the cutter blade may contact hidden wiring.

Cutter blades contacting a "live" wire may make exposed metal parts of the power tool "live" and could give the operator an electric shock.

The battery to be charged must be placed on a non-flammable, heat resistant and non-conductive surface while charging.

Keep corrosive, flammable and easily combustible objects clear of the battery charger and the battery. Do not cover the battery charger and the battery while charging.

Disconnect the battery charger immediately in the event of smoke formation or fire.

Only use the original GARDENA Charger to charge the battery. The use of other battery chargers may damage the batteries irreparably and even cause a fire.

If you notice fire: Extinguish the flames with oxygen reducing materials.

RISK OF EXPLOSION!

→ Protect Accu Shears from heat and fire.

Do not leave on radiators or expose to strong sunshine for long periods.

Do not use the battery charger outdoors.

→ Protect the battery charger from damp or wet areas.

Only use your Accu Shears in an ambient temperature between -10°C and $+45^{\circ}\text{C}$.

The charging cable should be checked regularly for signs of damage or ageing (brittleness) and may only be used if it is in perfect condition.

The charger unit provided may only be used to charge the rechargeable batteries supplied with the Accu Shears.

Non-rechargeable batteries must not be charged with this battery charger (danger of fire).

The Accu Shears must not be operated during charging.

After charging, disconnect the charger from the mains. Only charge battery between $10 - 45^{\circ}\text{C}$.

After heavy duty service allow battery to cool down first.

Storage:

The Accu Shears must not be stored over 35 °C or under direct exposure to sunlight.

Do not store the Accu Shears in places with static electricity.

Electrical safety**WARNING! Cardiac arrest!**

This product makes an electromagnetic field while it operates. This field may under some conditions interfere with active or passive medical implants.

To decrease the risk of conditions that can possibly injure or kill, we recommend persons with medical implants to speak with their physician and the medical implant manufacturer before you operate the product.

Personal safety**WARNING! Risk of suffocation!**

Incorrect mains voltage damages batteries and the battery charger.

→ **Ensure the correct mains voltage.**

1. Connect charging cable ① to the jack ② of the Accu Shears.
2. Connect battery charger to an electrical socket.
*During charging, the jack ② flashes green.
The battery is charged.*

When the jack ② **lights up** green, the battery is fully charged.

4. First pull the charging cable ① out of the jack ② and then unplug the battery charger from the electrical socket.

If the battery becomes empty during work, the Accu Shrub Shears switch off automatically and the connector socket ② shines red. The battery is empty and has to be recharged.

If the jack lights up red or yellow during charging then there is an error (see 7. Trouble-Shooting).

After each switch-off of the Accu Shears, the charge level of the battery is shown for approx. 20 sec.

LED lights up green: Accu is fully charged.

LED lights up yellow: Accu is half-full.

LED lights up red: Accu is empty and must be recharged.
