Proper use with Grass and Boxwood Blade:

The GARDENA Accu Grass Shears are suitable for cutting lawn edges, smaller grass areas and for precise shaping of shrubs, in particular boxwood, for the private home or hobby garden.

Proper use with Shrub Blade:

The GARDENA Accu Shrub Shears are intended for cutting individual bushes, shrubs and climbing plants in private domestic and hobby gardens.

DANGER! Risk of injury!

The Accu Shears may not be used for chopping in the sense of composting.

With the Shrub Blade Art. 2342/2343, the Accu Shears are not suited for cutting lawns/lawn edges.

1. Safety instructions

→ Please note the safety instructions on the Accu Shears.

IMPORTANT!

Read the operator's manual carefully before use and keep for future reference.

Symbols on the product:

WARNING!

→ Please read the operating instructions before using this tool.

WARNING!

→ Do not use in rain or wet conditions.

DANGER!

Cutting tool continues to run after switching off!

DANGER!

→ Keep bystanders away.

General Power Tool Safety Warnings

WARNING! Read all safety warnings and all instructions.

Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

Save all warnings and instructions for future reference. The term "power tool" in the warnings

refers to your mains operated (corded) power tool or battery-operated (cordless) power tool.

1) Work area safety

a) Keep work area clean and well lit.

Cluttered or dark areas invite accidents.

b) Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.

c) Keep children and bystanders away while operating a power tool.

Distractions can cause you to lose control.

2) Electrical safety

a) Power tool plugs must match the outlet.

Never modify the plug in any way. Do not use any adaptor plugs with earthed (grounded) power tools. Unmodified plugs and matching outlets will reduce risk of electric shock.

b) Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is earthed or grounded.

c) Do not expose power tools to rain or wet conditions. Water entering a power tool will increase the risk electric shock.

d) Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts. Damaged or entangled cords increase the risk of electric shock.

e) When operating a power tool outdoors, use an extension cord suitable for outdoor use.

Use of a cord suitable for outdoor use reduces the risk of electric shock.

f) If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply.

Use of an RCD reduces the risk of electric shock.

3) Personal safety

a) Stay alert, watch what you are doing and use common sense when operating a power tool.

Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating power tools may result in serious personal injury.

b) Use personal protective equipment. Always wear eye protection. Protective equipment such as dust mask, non-skid safety shoes, hard hat and hearing protection used for appropriate conditions will reduce personal injuries.

c) Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source and /or battery pack, picking up or carrying the tool. Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.

d) Remove any adjusting key or wrench before turning the power tool on.

A wrench or a key left attached to a rotating part of the power tools may result in personal injury.

e) Do not overreach. Keep proper footing and balance at all times. This enables better control of the power tool in unexpected situations.

f) Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts. Loose clothes, jewellery or long hair can be caught in moving parts.

g) If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used. *Use of dust collection can reduce dust-related hazards.*

4) Power tool use and care

a) Do not force the power tool. Use the correct power tool for your application.

The correct power tool will do the job better and safer at the rate for which it was designed.

b) Do not use the power tool if the switch does not turn it on and off.

Any power tool that cannot be controlled with the switch is dangerous and must be repaired.

c) Disconnect the plug from the power source and /or the battery pack from the power tool before making any adjustments, changing accessories, or storing power tools.

Such preventive safety measures reduce the risk of starting the power tool accidentally.

d) Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool. Power tools are dangerous in the hands of untrained users.

e) Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the

power tool's operation. If damaged, have the power tool repaired before use. *Many accidents are caused by poorly maintained power tools.*

f) Keep cutting tools sharp and clean.

Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.

g) Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed.

Use of the power tool for operations different from those intended could result in a hazardous situation.

5. Battery tool use and care

a) Recharge only with the charger specified by the manufacturer. A charger that is suitable for one type of battery pack may create a risk of fire when used with another battery pack.

b) Use power tools only with specifically designated battery packs. Use of any other battery packs may create a risk of injury and fire.

c) When battery pack is not in use, keep it away from other metal objects, like paper clips, coins, keys, nails, screws or other small metal objects, that can make a connection from one terminal to another. Shorting the battery terminals together may cause burns or a fire.

d) Under abusive conditions, liquid may be ejected from the battery; avoid contact. If contact accidentally occurs, flush with water. If liquid contacts eyes, additionally seek medical help. Liquid ejected from the battery may cause irritation or burns.

6. Service

Have your power tool serviced by a qualified repair person using only identical replacement parts. This will ensure that the safety of the power tool is maintained.

Hedge trimmer safety warnings:

- Keep all parts of the body away from the cutter blade. Do not remove cut material or hold material to be cut when blades are moving. Make sure the switch is off when clearing jammed material. *A moment of inattention while operating the hedge trimmer may result in serious personal injury.*
- Carry the hedge trimmer by the handle with the cutter blade stopped. When transporting or storing the hedge trimmer always fit the cutting device cover. Proper handling of the hedge trimmer will reduce possible personal injury from the cutter blades.
- Hold the power tool by insulated gripping surfaces only, because the cutter blade may contact hidden wiring. Cutter blades contacting a "live" wire may make exposed metal parts of the power tool "live" and could give the operator an electric shock.

Additional Safety Recommendations

Work area safety

Only use the product in the manner and for the functions described in these instructions.

The operator or user is responsible for accidents or hazards occurring to other people or their property.

Warning! This machine produces an electromagnetic field during operation. This field may under some circumstances interfere with active or passive

medical implants. To reduce the risk of serious or fatal injury, we recommend persons with medical implants to consult their physician and the medical implant manufacturer before operating this machine. Danger! Small parts could be swallowed during assembly and there is a risk of suffocation from the polybag. Keep infants away during assembly. Do not use the product when a thunderstorm is approaching.

Electrical safety

Use only on AC mains supply voltage shown on the product rating label.
Under no circumstances should an earth be connected to any part of the product.

Personal safety

Always wear suitable clothing, gloves, and stout shoes. Thoroughly inspect the area where the product is to be used and remove all wires and other foreign objects. All adjustments have to be made with the sheath in place, and the Accu Shears must not rest on the blade in the process. Before using the machine and after any impact, check for signs of wear or damage and repair as necessary.

If the device can no longer be switched off in the event of a defect, place the device on a solid surface and monitor it until the battery is empty. Send the defective device to our GARDENA Service Centre. Never attempt to use an incomplete product or one with an unauthorised modification.

Power tool use and care

Know how to stop the product quickly in an emergency. Never hold the product by the guard.

Do not use the Accu Shears if the protection equipment (protection cover, quick blade-stop) are damaged.

Do not use ladders whilst operating the product.

Remove the battery:

- before leaving the product unattended for any period;
- before clearing a blockage;
- before checking, cleaning or working on the appliance;
- if you hit an object. Do not use your product until you are sure that the entire product is in a safe operating condition;
- if the product starts to vibrate abnormally. Check immediately. Excessive vibration can cause injury.
- before passing to another person.

Maintenance and storage

RISK OF INJURY!

Do not touch blades.

→ **When work is finished or interrupted, refit the protective blade cover.**

Keep all nuts, bolts and screws secure to be sure the Accu Shears is in safe working condition.

Battery safety

FIRE RISK!

The battery to be charged must be placed on a non-flammable, heat resistant and non-conductive surface while charging.

Keep corrosive, flammable and easily combustible objects clear of the battery charger and the battery. Do not cover the battery charger and the battery while charging.

Unplug the battery charger immediately in the event of smoke formation or fire.

Only use the original GARDENA Battery Charger for charging. The use of other battery chargers may damage the batteries irreparably and even cause a fire.

RISK OF EXPLOSION!

→ **Protect Accu Shears from heat and fire.**

Do not leave on radiators or expose to strong sunshine for long periods.

Do not use the battery charger outdoors.

→ **Protect the battery charger from damp or wet areas.**

Only use your Accu Shears in an ambient temperature between -10 °C and + 45 °C.

A non-functioning battery must be disposed of correctly. It may not be sent via post. For further details, please contact your local disposal companies.

The battery charger should be checked regularly for signs of damage or ageing (brittleness) and may only be used if it is in perfect condition.

The charger unit provided may only be used to charge the rechargeable batteries supplied with the Accu Shears.

Non-rechargeable batteries must not be charged with this battery charger (danger of fire).

The Accu Shears must not be operated during charging.

After charging, disconnect the charger from the mains and from the battery.

Only charge battery between 10 – 45 °C.

After heavy duty service allow battery to cool down first.

Storage

The Accu Shears must not be stored under direct exposure to sunlight.

Do not store the Accu Shears in places with static electricity.

Charging the Accu:

The battery should be fully charged before using for the first time. Charging time, see 9. Technical Data.

The lithium-ion battery can be re-charged in any state of charge, and the charging process can be interrupted at any time without damaging the battery (no memory effect).

The Accu Shears cannot be started during charging.

WARNING!

Incorrect mains voltage damages batteries and the battery charger.

→ Ensure the correct mains voltage.

1. Connect charging cable ③ to the jack ④ of the Accu Shears.

2. Connect battery charger to an electrical socket.

During charging, the jack ④ flashes green. The battery is charged.

When the jack ④ **lights up** green, the battery is fully charged.

Check the charge status regularly while charging.

3. First pull the charging cable ③ out of the jack ④ and then unplug the battery charger from the electrical socket.

When there is a sharp fall in the power of the Accu Shears, the battery needs to be charged. Do not wait until the blade comes to an absolute stop.

If the jack lights up red or yellow during charging then there is an error (see 7. Trouble-Shooting).

After each switch-off of the Accu Shears, the charge level of the battery is shown for approx. 20 sec.
