Save all warning and instructions for future reference. *The term "power tool" in the warnings refers to your battery operated (cordless) power tool.*

1) Work area safety

- a) **This product is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning the use of the product by a person responsible for their safety. Children should be supervised to ensure that they do not play with the product. Local regulations may restrict the age of the operator. Never allow children or people unfamiliar with these instructions to use the product.**

Power tools are dangerous in the hands of untrained users.

- b) **Never operate the product while people, especially children, or pets are nearby.**
Distractions can cause you to lose control.

Original instructions.

This product may be used under supervision, or if instruction regarding the safe use of the product has been provided and

- c) **Never blow debris in the direction of bystanders.**
The operator or user is responsible for accidents or hazards occurring to other people or their property.
- d) **Keep work area clean and well lit.** *Cluttered or dark areas invite accidents.*
- e) **Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust.**
Power tools create sparks which may ignite the dust or fumes.
- 2) Electrical safety**
- a) **Power tool plugs must match the outlet. Never modify the charger plug in any way. Do not use any adaptor plugs with earthed (grounded) power tools. Use only on AC mains supply voltage shown on the product rating label.**
Unmodified plugs and matching outlets will reduce risk of electric shock.
- b) **Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators.** *There is an increased risk of electric shock if your body is earthed or grounded.*
- c) **Do not expose power tools to rain or wet conditions.**
Water entering a power tool will increase the risk electric shock.

Keep charger and charger cord away from heat, oil, sharp edges or moving parts. Before use, examine for damage. Replace charger and/or charger cord if there are signs of damage or aging. Do not use the product if the charger or charger cord is damaged or worn. Immediately disconnect from the mains electricity supply if the cord is cut, or the insulation is damaged. Do not touch the electric cord until the electrical supply has been disconnected. Do not repair a cut or damaged cord. Replace it with a new one.**
Damaged or entangled cords increase the risk of electric shock.
- e) **The electric cord must be uncoiled.** *Coiled cord can overheat and reduce the efficiency of the product. Always wind cord carefully, avoiding kinks.*
- f) **Only use the charger provided with your unit when charging the battery.** *Use of any other charger could permanently damage the battery, charger and/or the blower unit.*
- g) **If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply with a tripping current of not more than 30 mA. Even with a RCD installed, 100% safety cannot be guaranteed and safe working practices must be followed at all times. Check your RCD every time you use your product.**
Use of an RCD reduces the risk of electric shock.
- 3) Personal safety**

- b) **Use personal protective equipment. Always wear eye protection and hearing protection. To prevent dust irritation, the use of a dust mask is recommended.** *Protective equipment such as eye protection, hearing protection, dust mask, nonskid safety shoes, or hard hat used for appropriate conditions will reduce personal injuries.*
- c) **Prevent unintentional starting. Battery-powered units do not have to be plugged into an electrical outlet to operate; therefore, they are always in operating mode. Ensure the switch is in the off position before connecting to battery charger, picking up or carrying the tool.** *Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.*

- **Never place objects inside the blower tubes; always direct the blowing debris away from people, animals, glass, and solid objects such as trees, automobiles, walls, etc.**
The force of air can cause rocks, dirt, or sticks to be thrown or to ricochet which can hurt people or animals, break glass, or cause other damage.
- **Never use for spreading chemicals, fertilizers, or any other substances.** *This will prevent the spreading of toxic materials.*

Battery safety

DANGER! Fire risk!

The battery to be charged must be placed on a nonflammable, heat resistant and non-conductive surface while charging.

The supply terminals are not to be short-circuited.

Keep corrosive, flammable and easily combustible objects clear of the battery charger and the battery.

Do not cover the battery charger and the battery while charging.

Disconnect the battery charger immediately in the event of smoke formation or fire.

Only use the original GARDENA Charger to charge the battery. The use of other battery chargers may damage the batteries irreparably and even cause a fire.

Only use original GARDENA batteries for the GARDENA battery product.

Do not charge any third-party batteries. There is a risk of fire and explosion!

If you notice fire: Extinguish the flames with oxygen reducing materials.

DANGER! Risk of explosion!

Protect batteries from heat and fire. Do not leave on radiators or expose to strong sunshine for long periods.

Do not operate in explosive atmospheres, such as in the presence of flammable liquids, gases, or dust. Batteries may create sparks which could ignite the dust or fumes.

Check your replacement battery before each use. Visually check the battery before each use. A non-functioning battery must be disposed of correctly. Do not send by post. For further details, please contact your local disposal companies.

For risks of injury do not use the battery as a power source for other products. Only use the battery for the GARDENA product intended.

Only charge and use the battery in ambient temperatures of between 0 °C and 40 °C. Allow battery to cool down after long periods of use.

Check the charging cable regularly for signs of damage or ageing (brittleness). Only use it in perfect condition.

Do not stow or transport the battery above 45 °C or in direct sunlight. Ideally, the battery should be stored below 25 °C so that self-discharge is low.

Do not expose the battery to rain or wet conditions. Water entering a battery will increase the risk of electric shock.

Keep battery in order (clean) especially air vents.

If usage of the battery is not planned for a certain time (winter period) reload the battery to avoid a deep discharge.

Do not store while still attached to a tool, this prevents misuse and accidents.

Do not store the battery in places where static electricity is present.

Do not use the battery charger outdoors.

→ **Protect battery from heat and fire.**

DANGER! This product makes an electromagnetic field while it operates. This field may under some conditions interfere with active or passive medical implants. To decrease the risk of conditions that can possibly injure or kill, we recommend persons with medical implants to speak with their physician and the medical implant manufacturer before you operate the product.

DANGER! Small parts can be easily swallowed. There is also a risk that the polycarbonate can suffocate toddlers. Keep toddlers away when you assemble the product.

Starting the blower [Fig. O1]:

To start:

1. Push the battery onto the handle (see 3. INITIAL OPERATION).
2. Move the ON/OFF switch ⑩ to the ON (I) position.

To stop:

1. Move the ON/OFF switch ⑩ to the OFF (0) position.
2. Remove the battery from the handle (see 3. INITIAL OPERATION).

Work positions [Fig. O2]:

Use your unit as a blower for sweeping debris or grass clippings from driveways, sidewalks, patios, etc. Also, for blowing grass clippings, straw, or leaves into piles, or removing debris from corners, around joints, or between bricks.

Direct air flow by directing the blower tube down or to one side.

Always work away from solid objects such as walks, large stones, vehicles, and fences.

Clean corners by starting in corners and moving outward. This will help prevent an accumulation of debris which could fly into your face. Be careful when working near plants. The force of the air could damage tender plants.

5. STORAGE

To put into storage [Fig. A1]:
