General safety warnings

Electrical safety

DANGER! Electric shock!
Risk of injury due to electric shock.

→ The product must be supplied through a residual current device (RCD) having a rated residual operating current not exceeding 30 mA.

DANGER! Risk of physical injury!
Cut injury when the blade turns or the product starts accidentally.

→ Disconnect the product from the mains before you do maintenance or you replace parts. Thereby the disconnected socket must be in the visual range.

Cables

If extension cables are used, these must comply with the minimum cross-sections in the table below:

Voltage	Cable length	Gross section
230 – 240 V / 50 Hz	Up to 40 m	1.0 mm ²
230 – 240 V / 50 Hz	Up to 60 m	1.5 mm ²
230 – 240 V / 50 Hz	Up to 100 m	2.5 mm ²

Minimum rating: 1.0 mm² size cable, 10 amps 250 volts AC.

- If the supply cord is damaged, it must be replaced by your local Husqvarna UK Ltd. Approved Service Centre or similarly qualified persons in order to avoid a hazard.
- Flymo Extension Cables are available from your local Husqvarna UK Ltd. Approved Service Centre.
- Only use extension cables specifically designed for outdoor use and which conform to one of the following specifications: Ordinary rubber (60245 IEC 53), Ordinary PVC (60227 IEC 53) or Ordinary PCP (60245 IEC 57).

Connectors – Important

- Flymo connectors are suitable for use with 2 core cable only. Under no circumstances should these connectors be used for earthed products.
- All Flymo connectors and cables are of splashproof construction. They are not waterproof and must not be left outside permanently nor should they be submerged or immersed in water. Do not let cable lay or trail through pools of water or splashed with water from hose pipes.

Mains plug replacement – Important

- If the plug supplied is cut off it should be destroyed. There is an electric shock hazard if a cut off plug is inserted into a 13 amp socket.
1. No earth required. Flymo products are double insulated to EN 60335 and under no circumstances should an earth be connected to any part of the product.
 2. Ensure the mains voltage suits your product.
 3. Important! The wires in the mains lead are coloured in accordance with the following code: BLUE – NEUTRAL; BROWN – LIVE. The wire which is coloured BLUE must be connected to the Terminal which is marked with the letter 'N' or coloured BLACK. The wire which is coloured BROWN must be connected to the Terminal which is marked with the letter 'L' or coloured RED.
 4. It is important that the outer sheath is clamped correctly into the 3-pin plug.
 5. If in doubt consult your local Service Repairer or qualified electrician before the machine is used.
 6. A 13 Amp fuse must be fitted to the mains plug.
 7. The normal plug fuse and household fuse only protect the electrical equipment and are not a safeguard against electrocution.

Training

1. Read the instructions carefully. Be familiar with the controls and the correct use of the machine.
2. Never allow children or people unfamiliar with these instructions to use the machine. Local regulations can restrict the age of the operator.
3. Never operate the machine while people, especially children, or pets are nearby.
4. Keep in mind that the operator or user is responsible for accidents or hazards occurring to other people or their property.

Preparation

1. While operating the machine always wear substantial footwear and long trousers. Do not operate the machine when barefoot or wearing open sandals. Avoid wearing clothing that is loose fitting or that has hanging cords or ties.
2. Thoroughly inspect the area where the machine is to be used and remove all objects which can be thrown by the machine.
3. Before using, always visually inspect to see that the blade, blade bolt and the blade assembly are not worn or damaged. Replace worn or damaged components in set to preserve balance. Replace damaged or unreadable labels.

4. Before use check the supply and extension cord for signs of damage or aging. If the cord becomes damaged during use, disconnect the cord from the supply immediately. **DO NOT TOUCH THE CORD BEFORE DISCONNECTING THE SUPPLY.** Do not use the machine if the cord is damaged or worn.

Operation

1. Operate the machine only in daylight or in good artificial light.
2. Avoid operating the machine in wet grass.
3. Always be sure of your footing on slopes.
4. Walk, never run.
5. Mow across the face of slopes, never up and down.
6. Exercise extreme caution when changing direction on slopes.
7. Do not mow excessively steep slopes.
8. Use extreme caution when reversing or pulling the machine towards you.
9. Stop the blade(s) if the machine has to be tilted for transportation when crossing surfaces other than grass, and when transporting the machine to and from area to be used.
10. Never operate the machine with defective guards or shields, or without safety devices, for example defectors and/or grass collector, in place.
11. Switch on the motor carefully according to instructions and with feet well away from the blade(s).
12. Do not tilt the machine when switching on the motor, except if the machine has to be tilted for starting. In this case, do not tilt it more than absolutely necessary and lift only the part, which is away from the operator.
13. Do not start the machine when standing in front of the discharge opening.
14. Do not put hands or feet near or under rotating parts. Keep clear of the discharge opening at all times.
15. Do not transport the machine while the power source is running.
16. Stop the machine, and remove the plug from the socket. Make sure that all moving parts have come to a complete stop
 - whenever you leave the machine,
 - before clearing blockages or unclogging chute,
 - before checking, cleaning or working on the machine,
 - after striking a foreign object. Inspect the machine for damage and make repairs before restarting and operating the machine;

if the machine starts to vibrate abnormally (check immediately)

- inspect for damage,
- replace or repair any damaged parts,
- check for and tighten any loose parts.

Maintenance and storage

1. Keep all nuts, bolts, and screws tight to be sure the machine is in safe working condition.

2. Check the grass collector frequently for wear or deterioration.
3. On machines with multi blade, take care as rotating one blade can cause other blades rotate.
4. Be careful during adjustment of the machine to prevent entrapment of the fingers between moving blades and fixed parts of the machine.
5. Always allow the machine to cool down before storing.
6. When servicing the blades be aware that, even though the power source is switched off, the blades can still be moved.
7. Replace worn or damaged parts for safety. Use only genuine replacement parts and accessories.

Additional safety warnings

Electrical safety

DANGER! Cardiac arrest!

This product makes an electromagnetic field while it operates. This field may under some conditions interfere with active or passive medical implants. To decrease the risk of conditions that can possibly injure or kill, we recommend persons with medical implants to speak with their physician and the medical implant manufacturer before you operate the product.

Immediately disconnect from the mains if the cable is cut, or the insulation is damaged. Do not touch the electric cable until the cable has been disconnected. Do not repair a cut or damaged cable. Replace it with a new one.

The extension cable must be uncoiled. Coiled cables can overheat and reduce the efficiency of your mower.

Keep the extension cable away from product, always work away from the power point mowing up and down, never in circles.

Do not pull cable around sharp objects.

Always switch off at the mains before disconnecting any plug, cable connector or extension cable.

Stop the engine, disconnect the mains and examine the cable for damage or ageing before you wind the cable

for storage. Do not repair a damaged cable, replace it with a new one. Use only genuine replacement cable.

Always wind the cable carefully, avoid kinking.

Do not carry the product by the cable.

Do not pull on the cable to disconnect any of the plugs.

Use only on AC mains supply voltage shown on the product rating label.

Our products are double insulated to EN 60335.

Do not connect an earth to any part of the product.

Check the working area for hidden cables.

Do not use on wet grass.

Do not disassemble the product further than the delivery status.

Only start the mower with an upright standing handle.

Do not use the start levers alternately.

Use the handles carefully.

Safety Cut-Out

The engine is protected by a Safety Cut-Out which is activated when the blade becomes jammed or if the engine is overloaded. When this occurs, stop and disconnect the product from the mains. The Safety Cut-Out will only reset when you release the start/stop lever. Clear any obstruction and wait for a few minutes for the Safety Cut-Out to reset before you continue to use the product.

2. ASSEMBLY

DANGER! Risk of physical injury!

Cut injury when the blade turns or the product starts accidentally.

→ **Wait for the blade to stop, disconnect the product from the mains and use gloves before you do assembly.**

To assemble the lower handle [Fig. A1]:

1. Place the end of the lower handle into the slots.
2. Secure the lower handles to hood by firmly pushing fixing pin through the holes in hood and handle.
3. Repeat on the other side.

NOTE: Should a problem occur when securing the handle to hood with the fixing pin, carefully lever fixing pin out of location and repeat steps **1** to **3** above.

To assemble the upper handle [Fig. A2]:

1. Ensure the upper handle is located correctly with the lock-off button on the switchbox uppermost.
2. Ensure the upper handle and the lower handle are aligned correctly.

3. Insert the nut into the handle knob **1**.
4. Fit the bolts, washers and handle knobs **2**.
5. Fit the cable to the handles with the clips provided. Make sure the cable is not trapped between the upper and lower handles **3**.

3. OPERATION

**DANGER! Risk of physical injury!**

Cut injury when the blade turns or the product starts accidentally.

- Wait for the blade to stop, disconnect the product from the mains and use gloves before you connect or adjust the product.

To connect the Mower [Fig. O1/O2]:**WARNING! Risk of electric shock!**

To avoid damage to the mains cable, the mains cable must be inserted into the cable lock.

- Before you operate insert the mains cable into the cable lock.

1. Connect female extension cable connector to the back of the switchbox.
2. Loop the mains cable, insert the loop into the cable lock and pull tight.
3. Connect the mains cable into a 230 V mains socket.

To start the Mower [Fig. O3]:**DANGER! Risk of physical injury!**

Risk of injury if the product does not stop when you release the start lever.

- Do not bypass the safety devices or switches. For example do not attach the start lever ① to the handle.

To start:

The product is fitted with a two-handed safety device (start lever ① with safety interlock ②) to prevent the product from being turned on by accident.

There are two start levers ① fitted. Either one have to be used to start.

1. Connect the mains cable into a 230 V mains socket.
2. Push the safety interlock ② with one hand and pull the start lever ① with the other hand.
3. Release the safety interlock ②.
The product will start.

To stop:

- Release the start lever ①.

To adjust the cutting height [Fig. O4/O5]:**CAUTION!**

Do not use more than 4 cutting height spacers ③. The cutting height spacers ③ must only be fitted between the blade and the fan. Do not fit the cutting height spacers ③ between the blade ④ and the blade bolt ⑤.

1. Hold the fan ⑥ firmly and loosen the blade bolt ⑤ with the spanner ⑦ provided.
2. Remove the blade bolt ⑤, the blade ④, the cutting height spacers ③ and the fan ⑥.
3. Inspect for damage and clean as necessary.
4. Put the fan ⑥ on the product.
Make sure that the fan ⑥ is fully in place and the hole of the fan is in line up with the threaded hole.
5. Put the cutting height spacers ③ onto the fan ⑥.
Higher Cut – less cutting height spacers
Lower Cut – more cutting height spacers
Make sure that the pegs have located into the holes.
6. Put the blade ④ onto the cutting height spacers ③.
Make sure that the pegs have located into the holes on the blade.
7. Put the blade bolt ⑤ through the centre hole of the blade.
8. Tighten down the blade bolt ⑤ clockwise by hand.
9. Hold the fan ⑥ firmly and tighten the blade bolt ⑤ with the spanner ⑦ provided.

To adjust the handle position [Fig. O6]:

NOTE: Removal of the lower handle fixing pins is not required to adjust the handle.

1. Hold the handle as illustrated.
2. Take the weight of the handle with your right hand.
3. Then grip the lower part of the handle with your left hand and pull the lower handle towards you with your left hand.
4. Move to forward or down position as required.

Handle in forward position:

Push handle forward until it stops.

Handle in down position:

Move handle downward until it stops.

NOTE: The handle does not rest flat on the ground.

Handle in operating position:

Adjustment is not required to move the handle to the operating position. Simply pull down from the forward position

or lift up from the down position until the handle is in the most comfortable operating position.

Tips to use the Mower [Fig. O7]:

1. Mow twice a week during the growing season.
The lawn will suffer if more than a third of its length is cut at one time.
2. For the best results mow the outside edge of the lawn in a clockwise direction first.
3. Start to mow the edge of the lawn nearest to the power point.
So the cable is laid out on the lawn you have already cut.

4. For the best cutting results mow in straight lines with an overlap of approximately 8 – 10 cm on each pass with the mower.
5. Do not overload the mower. To mow long thick grass may cause the motor speed to drop and you will hear a change in the motor sound. If the motor speed drops you may overload the mower which may cause damage. When you mow in long thick grass a first cut with the cutting height set higher will help reduce the load. See "To adjust the cutting height".

4. MAINTENANCE

The product must be stored away from children.

1. Disconnect the product from the mains.
2. Clean the product (see 4. MAINTENANCE).
3. Store the product in a dry, enclosed and frost-free place.

To fold the handle [Fig. O6]:

The handle can be folded to take up the minimum of space.

→ See "To adjust the handle position".

Disposal:
