Pressure Sprayer

**A1****A2****A3****O1****O2****A4****O3****T1**

Always hold the Pressure Sprayer upright before the safety relief valve ⑨ (Fig. O1) is pulled.

When spraying insecticides, herbicides and fungicides or other liquid plant protection products, you must comply with all special precautionary measures specified by the manufacturer of the product you are using.

**Before each opening of the Pressure Sprayer, thoroughly release pressure by pulling the safety relief valve ⑨.**

DANGER! Small parts can be easily swallowed. There is also a risk that the polybag can suffocate toddlers. Keep toddlers away when you assemble the product.

**Operation:**

**CAUTION: The tank may only be filled with a maximum of 5 litres liquid.**

Inspect the Pressure Sprayer visually before each use. Never leave your Pressure Sprayer unattended or for long periods when full and pressurised. Keep the unit out of the reach of children. You are responsible for the safety of others. Keep your Pressure Sprayer away from heat sources and hot environments. Screw on the pump handle ⑩ tightly by hand (do not use tools) and ensure that the O-ring ⑪ (Fig. O1) is positioned correctly. The On/Off switch may only be switched to I when the pump handle is screwed on the container.

Only charge the battery at an ambient temperature which is between 0 °C and +40 °C. If the temperature of the battery is outside the permissible charging temperature range, the battery cannot be charged. As soon as the permitted temperature range is reached, the battery is charged.

**Cleaning:**

Release the pressure after each use, empty the container, clean it carefully and rinse with clear water. Then leave the pressure sprayer open and allow it to dry. Do not dispose of residual fluids in the sewerage system (local disposal systems). Always clean the Pressure Sprayer before using a different product to avoid chemical reactions. When using several Pressure Sprayers, the tanks and spray nozzle may not be exchanged between them. We recommend that you have your Pressure Sprayer thoroughly inspected (preferably at a GARDENA Service Centre) after using it for 5 years.

**Storage:**

Before storing, loosen the tank cap and always empty your Pressure Sprayer completely (also after cleaning with water). Store away from frost. If you use the permanent lock ⑫ (Fig. O3) pay attention that you work very carefully. Never store the Pressure Sprayer using the permanent lock. Carry the pressure sprayer by the carrying strap ⑬ or the handle ⑩. Make sure that the product is protected from direct sunlight. The product may heat up.
