3. INSTALLATION

DANGER! Risk of injury!

Risk of injury when the product starts accidentally.

→ **Disconnect the product from the mains before you install the product.**

To calculate the water quantity:

The Holiday Watering system allows up to 36 plants to be watered (by using one drip pipe per plant). Here, all 3 drip distributors must be used.

Drip distributor:

There are 3 drip distributors with different daily application rates. Each drip distributor has 12 connections for drip pipes.

- **Light grey:** For plants with low water requirements (application rate 15 ml per day = slightly less than a shot glass).
- **Medium grey:** For plants with average water requirements (application rate 30 ml per day = 1.5 shot glasses).
- **Dark grey:** For plants with high water requirements (application rate 60 ml per day = 3 shot glasses).

If a plant has a water requirement of over 60 ml per day, you will need to use more than one drip pipe for the plant.

Calculation example:

- You have:
 - 8 plants with low water requirements (15 ml/day)
 - 6 plants with average water requirements (30 ml/day) and
 - 3 plants with high water requirements (60 ml/day)
- **One drip pipe** should be used to water each plant.
- The water quantity should be sufficient for **14 days**.

Daily requirement

$$= 8 \times 15 \text{ ml} + 6 \times 30 \text{ ml} + 3 \times 60 \text{ ml}$$

$$= 120 \text{ ml} + 180 \text{ ml} + 180 \text{ ml}$$

$$= 480 \text{ ml} \sim 0,5 \text{ litres}$$

Water quantity for 14 days

$$= \text{daily requirement} \times \text{days}$$

$$= 0,5 \text{ litres} \times 14 \text{ days}$$

$$= 7 \text{ litres}$$

→ You will need a container which can hold more than 7 litres (as a certain amount of water will also evaporate from the container in 14 days).

For **Art. 1266 Holiday Watering Set with container**, the 9-litre-capacity reservoir is included in the contents.

Group plants appropriate to the drip distributor

[Fig. O1]:

Tip: When arranging your plants in groups, choose a place that is not too close to the window (and thus

away from direct sunlight). Preferably place them around 1 metre away. Bear in mind that a plant's water requirements may change if its position is changed. If its position is bright and warm, its water requirements will be higher than in a cool, shady position.

CAUTION!

The plants must be positioned above the water level of the reservoir to prevent the water from the reservoir from flowing out via the supply pipes.

1. Group your plants in 3 groups according to their water requirements.
2. Use planters or saucers so that any excess water will be collected.
3. Allocate the individual drip distributors to the groups.

To connect the supply pipes to the pump

[Fig. I1/I2]:

The pump has 3 connections ⑩ for supply pipes ③.

1. Slide the sleeve ④ onto the supply pipe ③.
2. Slide the supply pipe ③ onto one of the three connections ⑩.
3. Screw the sleeve ④ onto the connection ⑩.
4. If you do not use all 3 drip distributors, screw the end caps ⑤ onto the unused connections ⑩.

Connecting the drip distributors to the supply pipes [Fig. I3]:

1. Cut the supply pipe perpendicular to its length ③ at the position where you are setting up the drip distributor ⑥.
2. Slide the sleeve ④ onto the supply pipe ③.
3. Push the supply pipe ③ onto the connection on the drip distributor ⑥ until it reaches the stop.
4. Screw the threaded collar ④ onto the connection on the drip distributor ⑥.

Connecting the drip pipe to the drip distributor

[Fig. I4]:

1. Cut the drip pipe ⑧ perpendicular to its length.
2. Push the drip pipe ⑧ onto the connection on the drip distributor ⑥ until it reaches the stop.
3. Cut the drip pipe ⑧ at an angle at the position where you want to water.
This ensures that the water will drip more efficiently.
4. Close unused connections of the drip distributor ⑥ with the plugs ⑦.

Fitting the drip pipe to the pipe peg [Fig. I5]:

1. Place the pipe peg ⑨ into the soil of the plant at the desired position.
2. Clip the drip pipe ⑧ into one of the 3 holding fixtures on the pipe peg ⑨ in such a way that the drip pipe is facing downwards.

If a plant has higher water requirements, several drip pipes can be fitted to a hose bracket.

4. OPERATION

DANGER! Risk of injury!

Risk of injury when the product starts accidentally.

→ **Disconnect the product from the mains before you fill the container.**

To start the watering [Fig. O1]:

CAUTION!

Damage to the pump if it runs dry.

→ **Make sure that the container is always sufficiently filled with water.**

1. Fill the container with the previously calculated amount of water (make sure that the container stands in a secure position).
2. Place the pump in the container filled with water (make sure that the pump is level with the bottom of the container).
3. Connect the pump ② to the power adapter ①.
4. Plug the power adapter ① into an electrical socket.
The watering will start for 1 minute and the control indicator ⑬ will illuminate green.
5. During the first watering, check all connections for leaks.
The watering will be repeated daily at the same time as the power adapter was plugged in.

5. MAINTENANCE

DANGER! Risk of injury!

Risk of injury when the product starts accidentally.

→ **Disconnect the product from the mains before you maintain the product.**

To clean the pump:

DANGER! Risk of injury!

Risk of injury and risk of damage to the product.

- **Do not clean the product with a water jet (in particular high-pressure water jet).**
- **Do not clean with chemicals including petrol or solvents. Some can destroy critical plastic parts.**

→ Clean the pump with a damp cloth.

To clean the filter [Fig. M1]:

In order to ensure continuous trouble-free operation, the filter (14) should be cleaned at regular intervals.

1. Push in the two locks (12) and pull off the foot (13) downwards.
2. Clean the filter (14) and the foot (13) under running water.
3. Reassemble all parts in reverse order. Make sure that the two locks (12) are correctly engaged.

The pump must not be operated without the filter (14).

Cleaning the Holiday Watering system:

Ensure that the Holiday Watering system's surface and contacts are always clean and dry before connecting the Holiday Watering system.

Do not use running water.

→ Clean the contacts and the plastic parts with a soft and dry cloth.

6. STORAGE

To put into storage:

The product must be stored away from children.

1. Unplug the Holiday Watering system.
2. Clean the pump and the Holiday Watering system (see 5. MAINTENANCE).
3. Store the pump and the Holiday Watering system in a dry, enclosed space which is free of frost.

Disposal:

(in accordance with RL2012/19/EC)

The product must not be disposed of to normal household waste. It must be disposed of in line with local environmental regulations.

IMPORTANT!

Dispose of the product through or via your municipal recycling collection centre.

7. TROUBLESHOOTING

DANGER! Risk of injury!
Risk of injury when the product starts accidentally.

→ Disconnect the product from the mains before you troubleshoot the product.
