GARDENA Water Control Easy

Translation of the original instructions.

For safety reasons, children and young people under 16 as well as anyone who is not familiar with these operating instructions should not use the product. Persons with reduced physical or mental abilities may use the product only if they are supervised or instructed by a responsible person. Children must be supervised to ensure that they do not play with the product. Never operate the product when you are tired, ill or under the influence of alcohol, drugs or medicine.

Intended use:

The GARDENA Water Control is intended for private use in domestic and hobby gardens, exclusively for outdoor use, to control sprinklers and watering systems. The Water Control can be used for automatic watering during holidays.

DANGER! The GARDENA Water Control must not be used for industrial purposes or in conjunction with chemicals, foodstuffs, easily flammable and explosive materials.

1. SAFETY

Important!

Read the operator's manual carefully before use and keep for future reference.

Battery:

To ensure the Water Control runs safely, only a 9V alkaline manganese battery (alkaline) type IEC 6LR61 must be used!

In order to prevent the Water Control from failing because of a weak battery if you are away for a long time, the battery must be replaced when the LED flashes red once. When the light flashes red 3 times the battery must be replaced immediately as the valve cannot open anymore.

Setting up:

The Water Control may only be set up vertically with the sleeve nut to the top to prevent water penetrating into the battery compartment.

The minimum water output to ensure that the Water Control functions correctly is 20 – 30 l/h. For example, at least 10 x 2-litre Drip Heads are required to control the Micro-Drip-System. The max. temperature for the water flow is 40 °C.

Avoid tensile strain.

→ Do not pull the hose connected to the Water Control.

CAUTION! If the control section is removed when the valve is open, the valve remains open until the control section is reattached.

**DANGER! Cardiac arrest!**

This product makes an electromagnetic field while it operates. This field may under some conditions interfere with active or passive medical implants. To decrease the risk of conditions that can possibly injure or kill, we recommend persons with medical implants to speak with their physician and the medical implant manufacturer before you operate the product.

**DANGER! Risk of suffocation!**

Small parts can be easily swallowed. There is also a risk that the polybag can suffocate toddlers. Keep toddlers away when you assemble the product.

2. INITIAL OPERATION → (Fig. A–C)

A video of the setting processes is available here:

3. FUNCTION AND SETTING

→ (Fig. E)

Once the duration and frequency have been set, the values will be applied 5 seconds later. The green LED will flash three times to confirm this. The first watering operation commences. This will be the watering start time from now on. If you want watering to commence later than this, press the +1h button repeatedly within the 5-second time window until the desired start time has been set. All settings are deleted once the setting dial is turned again and new settings are made.

4. MAINTENANCE → (Fig. D)

5. STORAGE

To put into storage:

- The product must be stored away from children.
- To preserve the battery, it should be removed (Fig. B).
- Store the controller and the valve unit in a dry, enclosed and frost-free place.

Disposal: (in accordance with RL2012/19/EC)

The product must not be disposed of to normal household waste. It must be disposed of in line with local environmental regulations.

IMPORTANT!

Dispose of the product through or via your municipal recycling collection centre.

Disposal of the battery:

- Please return a flat battery to a GARDENA dealer or dispose of it properly at your nearest recycling centre.

Dispose of the battery only when discharged.
