Original instructions.

Intended use:

The **FLYMO Trimmer** is intended to trim and to cut lawn and areas of grass in private domestic gardens and allotments.

The product is not intended for long term use.

DANGER! Risk of injury!

→ **Do not use the product to cut hedges, to chop up material or to make compost.**

1. SAFETY INSTRUCTIONS

Important! Read the operator's manual carefully before use and keep for future reference.

Symbols on the product:

Read operator's manual.

Keep bystanders away.

Always wear approved hearing protection.
Always wear approved eye protection.

Do not expose to rain.

For the charger:
Remove plug from the mains immediately if the cable is damaged or cut.

General safety warnings

Electrical safety

DANGER! Electric shock!

Risk of injury due to electric shock.

→ **The product must be supplied through a residual current device (RCD) having a rated residual operating current not exceeding 30 mA.**

Do not overreach and keep the balance at all times. Always be sure of the footing on slopes. Walk, never run.

Do not touch moving hazardous parts before the machine is disconnected from the mains and the moving hazardous parts have come to a complete stop.

Always wear substantial footwear and long trousers while operating the machine.

Safe operating practices

1 Training

- Read the instructions carefully. Be familiar with the controls and the correct use of the machine.
- Never allow children or people unfamiliar with these instructions to use the machine. Local regulations can restrict the age of the operator.
- Keep in mind that the operator or user is responsible for accidents or hazards occurring to other people or their property.

2 Preparation

- Before use check the supply and extension cord for signs of damage or aging. If the cord becomes damaged during use, disconnect the cord from the supply immediately.
DO NOT TOUCH THE CORD BEFORE DISCONNECTING THE SUPPLY.
Do not use the machine if the cord is damaged or worn.
- Before use, always visually inspect the machine for damaged, missing or misplaced guards or shields.
- Never operate the machine while people, especially children, or pets are nearby.

3 Operation

- Keep supply and extension cords away from cutting means.
- Wear eye protection and stout shoes at all times while operating the machine.
- Avoid using the machine in bad weather conditions especially when there is a risk of lightning.
- Use the machine only in daylight or good artificial light.
- Never operate the machine with damaged guards or shields or without guards or shields in place.
- Switch on the motor only when the hands and feet are away from the cutting means.
- Always disconnect the machine from the power supply (i.e. remove the plug from the mains, remove the disabling device or removable battery):
 - whenever the machine is left unattended;
 - before clearing a blockage;
 - before checking, cleaning or working on the machine;
 - after striking a foreign object;
 - whenever the machine starts vibrating abnormally.
- Take care against injury to feet and hands from the cutting means.
- Always ensure that the ventilation openings are kept clear of debris.

4 Maintenance and storage

- Disconnect the machine from the power supply (i.e. remove the plug from the mains, remove the disabling device or removable battery) before carrying out maintenance or cleaning work.
- Use only the manufacturer's recommended replacement parts and accessories.
- Inspect and maintain the machine regularly. Have the machine repaired only by an authorized repairer.
- When not in use, store the machine out of the reach of children.

Additional safety warnings

Safety warning for batteries and battery chargers

Read all safety warnings and instructions.

Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

- **Keep these instructions in a safe place.** Only use the battery charger if you are familiar with all of its functions and are able to perform these without limitation or have received appropriate instructions.
- **Do not use the product in explosive atmospheres.**
- **Supervise children during use, cleaning and maintenance.**
This is to ensure that children do not play with the battery charger.
- **Only charge lithium-ion batteries of the POWER FOR ALL system type PBA 18V with a capacity of 1.5 Ah or more (5 battery cells or more). The battery voltage must match the battery charging voltage of the battery charger. Do not charge non-rechargeable batteries.**
Otherwise there is a risk of fire and explosion.
-  **Only use the battery charger in closed rooms and keep it away from moisture.** The ingress of water into a battery charger increases the risk of electric shock.
- **Keep the battery charger clean.** Dirt poses a risk of electric shock.
- **Always check the battery charger, including cable and plug, before use. Do not use the battery charger if you notice any damage. Do not open the battery charger yourself, ensure that any repairs are performed only by qualified personnel using only original spare parts.**
Damaged battery chargers, cables and plugs increase the risk of electric shock.
- **Do not operate the battery charger on easily combustible surfaces (e.g. paper, textiles etc.) or in combustible environments.**
There is a risk of fire because the battery charger heats up during charging.
- **If a replacement of the connecting cable is necessary, let this be carried out by GARDENA or an authorised service centre for GARDENA power tools in order to avoid safety hazards.**

Products sold in GB only: Your product is fitted with an BS 1363/A approved electric plug with internal fuse (ASTA approved to BS 1362). If the plug is not suitable for your socket outlets, it should be cut off and an appropriate plug fitted in its place by an authorised customer service agent. The replacement plug should have the same fuse rating as the original plug. The severed plug must be disposed of to avoid a possible shock hazard and should never be inserted into a mains socket elsewhere.

- **These safety warnings only apply to 18V Li-Ion batteries of the POWER FOR ALL system.**
- **Do not cover the battery charger's ventilation slots.** The battery charger may otherwise overheat and no longer function properly.
- **Only charge the batteries with battery chargers recommended by the manufacturer.** A battery charger that is suitable for one type of battery may cause a fire hazard if used with other batteries.
- **Vapours may also escape if the battery is damaged or used improperly. Ensure that the area is well ventilated and seek medical attention should you experience any adverse effects.** The vapours may irritate the respiratory tract.
- **If the battery is defective, liquid may leak out and wet adjacent objects. Check affected parts.**
Clean them or replace them if necessary.

- If used incorrectly or if the battery is damaged, flammable liquid may escape from the battery; avoid contact. If contact accidentally occurs, flush with water. If the liquid gets in your eyes, seek additional medical attention. Liquid ejected from the battery may cause irritation or burns.
- Only use the battery in POWER FOR ALL system partner products. POWER FOR ALL-marked 18V batteries are fully compatible with the following products: all 18V POWER FOR ALL system partner products.
- Observe the battery recommendations in the operator's manual for your product. This is the only way to operate the battery and the product safely and to protect the batteries from dangerous overloading.
- Only charge the batteries with battery chargers recommended by the manufacturer or by partners of the POWER FOR ALL system. A battery charger that is suitable for a certain type of battery poses a fire hazard when used with other batteries (battery type: PBA 18V etc./ Compatible battery chargers: AL 18 etc.).
- The battery is supplied partially charged. To ensure full performance of the battery, fully charge the battery in the battery charger before using it for the first time.
- Keep batteries out of the reach of children.
- Do not open the battery. There is a risk of a short circuit.
- Do not short-circuit the battery. When the battery is not in use, keep it away from paper clips, coins, keys, nails, screws or other small metal objects that could cause bridging of the contacts. Shorting the battery terminals together may cause burns or a fire.
- The battery contacts may be hot after use. Be careful of the hot contacts when removing the battery.
- The battery can be damaged by sharp objects such as a nail or screwdriver or by external force. An internal short circuit may occur and the battery may burn, smoke, explode or overheat.
- Never service damaged batteries. All maintenance of batteries should only be carried out by the manufacturer or authorised service centres.
-  Protect the battery from heat, including prolonged exposure to sunlight, fire, dirt, water and moisture. There is a risk of explosion and short circuit.
- Only operate and store the battery at an ambient temperature between -20 °C and +50 °C. Do not leave the battery in a car in summer, for example. At temperatures <0 °C, performance may be reduced depending on the device.
- Charge the battery only at ambient temperatures between 0 °C and +35 °C. Charging outside the temperature range can damage the battery or increase the risk of fire.
- After use, allow the battery to cool down for at least 30 minutes before charging or storing it.

Electrical safety

DANGER! Cardiac arrest!

This product makes an electromagnetic field while it operates. This field may under some conditions interfere with active or passive medical implants. To decrease the risk of conditions that can possibly injure or kill, we recommend persons with medical implants to speak with their physician and the medical implant manufacturer before you operate the product.

Check the area of hidden cables before trimming. Secure the working area before using.

Only use the battery product between 0 °C and 40 °C.

Disconnect the battery in case of emergency.

Do not use the product nearby a water, or for pond care.

Protect the battery contacts from moisture.

Personal safety

DANGER! Risk of suffocation!

Small parts can be easily swallowed. There is also a risk that the poly-bag can suffocate toddlers. Keep toddlers away when you assemble the product.

If the trimmer vibrates heavily, replace the filament cassette and check the filament cassette holder for damage.

Use the front handle to transport the trimmer.

Use personal protective equipment.

Wear gloves for cleaning the cutting device.

Always wear eye protection.

Protective equipment such as gloves, non-skid safety shoes, or hearing protection used for appropriate conditions will reduce personal injuries.

Be careful during adjustment of the product to prevent entrapment of the fingers between moving and fixed parts of the machine, or while assembling the protective cover.

Don't use water, or chemical substances for cleaning the guard or other parts of the trimmer.

Keep all nuts, bolts and screws tight to be sure the product is in a safe working condition.

Do not disassemble the product further than the delivery status.

Warning! When wearing hearing protection, and due to the noise produced by the product, the operator may not notice persons approaching.

While operation and transport pay special attention to the hazard for other people.

Stay alert, watch what you are doing and use common sense when operating a power tool.

Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication.

A moment of inattention while operating power tools may result in serious personal injury.

2. ASSEMBLY

DANGER! Risk of injury!

Cut injury when the product starts accidentally.

- Wait for the trimmer line to stop and remove the battery before you assemble the product.

To assemble the shaft [Fig. A1]:

DANGER!

The shaft may only be assembled if the cable between the lower shaft and the upper shaft is in a perfect condition. The shaft may not be assembled if the cable is damaged. Contact FLYMO customer service in such a case.

1. Carefully remove the lower shaft ① together with the upper shaft ② from the packaging. In doing so, no stress may be exerted upon the cable ③.
2. Slide the lower shaft ① into the upper shaft ② until it audibly engages. In doing so, the cable may not become twisted or jammed. The shaft is correctly assembled when the gap between the upper shaft and the lower shaft has been closed.
3. By pulling on the upper shaft ①, check whether it is firmly fixed to the lower shaft ②. Once assembled, the shaft cannot be separated.

To assemble the wheel [Fig. A2]:

1. Attach the wheel ④ to the trimmer head ⑤. Make sure that it is located into the groove ⑥ on the trimmer head ⑤.
2. Clip the wheel ④ together on each side. Make sure that it is secure.
3. Check that the wheel ④ turns freely.

To assemble the protective cover [Fig. A3 /A4]:

DANGER!

The product may only be used when the protective cover is assembled.

1. Locate the protective cover ⑦ over the trimmer head ⑤ and feed the trimmer line through the hole in the protective cover ⑦.
2. Push the protective cover ⑦ onto the trimmer head ⑤.
3. Turn the trimmer head ⑤ anticlockwise until it audibly engages.
4. By turning the protective cover ⑦, check whether it is firmly fixed to the trimmer head ⑤.

3. OPERATION

DANGER! Risk of injury!

Cut injury when the product starts accidentally.

- Wait for the trimmer line to stop and remove the battery before you adjust or transport the product.

To charge the battery [Fig. O1 /O2 /O3]:

CAUTION!

- Note the mains voltage! The voltage of the power source must match the voltage specified on the rating plate of the charger.

For the FLYMO Battery Trimmer Art. 9705441-xx there is no battery and no charger in the scope of delivery.

Thanks to the intelligent charging process, the charge condition of the battery is automatically detected and then charged up with the optimal charge current depending on battery temperature and voltage.

In this way, the battery is treated with care and remains permanently fully charged when it is stored in the charger.

1. Push the locking button (A) and remove the battery (B) from the battery holder (D).
2. Connect the battery charger (C) into a mains socket.
3. Slide the battery charger (C) onto the battery (B).

When the battery charge indicator (L) at the charger flashes green the battery is being charged.

When the battery charge indicator (L) at the charger illuminates permanently green the battery is completely charged (Charging time, see 7. TECHNICAL DATA).

4. Examine the charge status regularly while you charge.
5. When the battery (B) is completely charged, you can disconnect the battery (B) from the charger (C).

Meaning of the Indication Elements:

Indication on the charger [Fig. O3]:

Flashing of the Battery Charge Indicator (L) The charging procedure is indicated by **flashing** of the battery charge indicator (L).

Note: The charging procedure is only possible when the battery temperature is within the allowable charging temperature range, see 7. TECHNICAL DATA.

Continuous Lighting of the Battery Charge Indicator (L)

Continuous lighting of the battery charge indicator (L) indicates that the battery is fully charged or that the temperature of the battery is not within the allowable charging temperature range and can therefore not be charged.

When the battery is not inserted, **continuous lighting** of the battery charge indicator (L) indicates that the mains plug is inserted in the socket outlet and that the battery charger is ready for operation.

Battery charge status indication (P) on the product [Fig. O4/O9]:
After starting the product, the battery charge status indication (P) is displayed for 5 seconds.

Battery charge status	Battery charge status indication
67 – 100 % charged	(L), (L) and (L) illuminate green
34 – 66 % charged	(L) and (L) illuminate green
11 – 33 % charged	(L) illuminates green
0 – 10 % charged	(L) flashes green

If the LED (L) flashes green, the battery must be charged.

If the error LED (M) is illuminated or flashing, see 6. TROUBLESHOOTING.

To set the working position:

Working position 1 [Fig. O5]:

For standard trimming.

Working position 2 [Fig. O6/O7/O8]:

Cutting at lawn edges.

CAUTION!

The trimmer may only be used when the trimmer head is locked at 0° or 90°.

To rotate the trimmer head to 90°, the tube must be in standard position 1.

1. Hold the trimmer by the tube (1) with both hands so that you can push the unlock button (9) with one finger.
2. Push the unlock button (9) and rotate the trimmer head (5) from 0° to 90° until it audibly engages.
3. Release the unlock button (9) and let the tube (1) engage again.
4. Place the trimmer head (5) with the wheel (4) on the lawn edge so that the trimmer line (8) cuts on the path. **(The wheel must not stand on the path.)**

To start the trimmer [Fig. O1/O9]:

DANGER! Risk of injury!

Risk of injury if the product does not stop when you release the start lever.

→ **Do not bypass the safety devices or switches. For example do not attach the start lever to the handle.**

The product is provided with a two-switch safety device (start lever with starting lockout) to prevent the product from being turned on by accident.

To start:

1. Put the battery (B) into the battery holder (D) until it audibly engages.
2. Hold the additional handle (10) with one hand.
3. Hold the main handle (2) with the other hand, push the starting lockout (11) forward and pull the start lever (12).
The trimmer starts and the battery charge status indication (P) is displayed for 5 seconds.
4. Release the starting lockout (11) again.

CAUTION!

→ **Avoid contact of the trimmer line with hard objects (walls, stones, fences etc.) to prevent the trimmer line from wearing or breaking.**

To stop:

1. Release the start lever (12).
The trimmer stops.
2. Push the locking button (A) and remove the battery (B) from the battery holder (D).

Trimmer line extension (automatic) [Fig. A10]:

A clean cut is achieved only with the maximum trimmer line (8) length.

The trimmer line (8) is lengthened automatically when the spool comes to a standstill after switch off.

As the trimmer line can only be lengthened in small increments, it can be necessary in some cases to repeat the switch-off/switch-on action several times (up to 6 times). Important is that the spool comes to a complete standstill each time.

The trimmer line (8) has been sufficiently lengthened when, after switch-on, it audibly strikes the line limiter (13).

The FLYMO Spool and Line **Art. FLY047/599431990** or the FLYMO Trimmer line **Art. NLO011/577616311** have to be replaced when the trimmer line has been used up.

4. MAINTENANCE

DANGER! Risk of injury!

Cut injury when the product starts accidentally.

→ **Wait for the trimmer line to stop and remove the battery before you maintain the product.**

To clean the trimmer [Fig. M1/M2]:

DANGER! Risk of injury!

Risk of injury and risk of damage to the product.

- **Do not clean the product with water or with a water jet (in particular high-pressure water jet).**
- **Do not clean with chemicals including petrol or solvents. Some can destroy critical plastic parts.**

The airflow slots must always be clean.

1. Clean the airflow slots (14) with a soft brush (do not use a screwdriver).
2. Clean all movable parts after each operation. Especially remove any grass and dirt from the protective cover (7).
3. Remove the wheel (4) by pressing one of the buttons (15) to clean it.

To replace the spool and line [Fig. M3]:

DANGER! Risk of injury!

Do not use metallic cutting elements or replacement parts and accessories not provided by FLYMO.

Only use original FLYMO Spool and Line. You can order Replacement Spool and Line from your FLYMO dealer or directly from the FLYMO Customer Service.

• FLYMO Spool and Line

Art. FLY047/599431990

1. Release the spool cover ⑯ by pressing both locking clips ⑰ and remove the cover.
 2. Remove the spool ⑱.
 3. Clean the automatic lever ⑲. The automatic lever ⑲ must move freely.
 4. Feed the trimmer line ⑧ of the new spool ⑱ through the hole ⑳ and pull out about 10 cm.
 5. Insert the spool ⑱. Do not trap the trimmer line ⑧ when you do this.
 6. Fit the spool cover ⑯ so that both locking clips ⑰ audibly engage.
- If the spool cover ⑯ cannot be touched down, turn the spool ⑱ to and fro, until the spool ⑱ is completely in the spool holder.

The trimmer may only be used when the spool cover ⑯ is engaged.

To replace the trimmer line [Fig. M4]:

Only use original FLYMO Trimmer line. You can order the replacement trimmer line from your FLYMO dealer or directly from the FLYMO Customer Service.

- **FLYMO Trimmer Line** Art. NLO011/577616311

1. Remove the spool ⑱ (see 4. MAINTENANCE To replace the spool and line).
2. Remove the rest of the trimmer line ⑧.
3. Clean the spool ⑱ and the automatic lever ⑲. The automatic lever ⑲ must move freely.
4. Take approximately 10 m of the new trimmer line ⑧ and insert 15 mm of the trimmer line ⑧ into the hole in the spool ⑱.
5. Wind the trimmer line ⑧ in the direction of the arrows on the top of the spool ⑱. Make sure that the trimmer line ⑧ is neatly coiled on the spool ⑱. (Failure to do so will impair the efficiency of the automatic trimmer line extension).
6. Leave approximately 10 cm of the trimmer line ⑧ unwound and push it into the cleat ㉑.
7. Insert the spool ⑱ again (see 4. MAINTENANCE To replace the spool and line).

To clean the battery and the battery charger:

Make sure that the surface and the contacts of the battery and the battery charger always are clean and dry before you connect the battery charger.

Do not use running water.

→ **Battery charger:** Clean the contacts and the plastic parts with a soft and dry cloth.

→ **Battery:** Occasionally clean the ventilation slots and the terminals on the battery using a soft brush that is clean and dry.

5. STORAGE

To put into storage:

The product must be stored away from children.

1. Remove the battery.
2. Charge the battery.
3. Clean the trimmer, the battery and the battery charger (see 4. MAINTENANCE).
4. Store the trimmer, the battery and the battery charger in a dry, enclosed and frost-free place.

Disposal of the product:

(in accordance with RL2012/19/EC/S.I. 2013 No. 3113)

The product must not be disposed of to normal household waste. It must be disposed of in line with local environmental regulations.

IMPORTANT!

→ Dispose of the product through or via your municipal recycling collection centre.

Disposal of the battery:

The FLYMO battery contains lithium-ion cells that should not be disposed of with normal household waste at the end of its life.

Li-ion

IMPORTANT!

→ Dispose of the batteries through or via your municipal recycling collection centre.

1. Discharge the lithium-ion cells completely (contact the FLYMO Service).
2. Protect the contacts on the lithium-ion cells against short circuits.
3. Dispose of the lithium-ion cells properly.

6. TROUBLESHOOTING

DANGER! Risk of injury!

Cut injury when the product starts accidentally.

→ **Wait for the trimmer line to stop and remove the battery before you troubleshoot the product.**

To pull the trimmer line out of the spool manually [Fig. T1]:

A trimmer line ⑧ that is too short or no longer extends automatically when the trimmer is turned on can be pulled out manually.

→ Hold down the automatic lever ⑲ and pull the trimmer line ⑧ at the same time.

To release retracted or welded trimmer line:

If the trimmer line ⑧ has disappeared into the spool ⑱ or if the automatic trimmer line extension still doesn't work after pulling the trimmer line ⑧ it may be welded in the spool ⑱.

1. Remove the spool ⑱ (see 4. MAINTENANCE To replace the trimmer line).
2. Unwind the trimmer line ⑧.
3. Clean the spool ⑱, the automatic lever ⑲ and the trimmer line ⑧. The automatic lever ⑲ must move freely.
4. Wind the trimmer line ⑧ onto the spool ⑱ again (see 4. MAINTENANCE To replace the trimmer line).
5. Insert the spool ⑱ again (see 4. MAINTENANCE To replace the spool).

Problem	Possible Cause	Remedy
Trimmer does not cut	Trimmer line is worn or too short.	→ Extend the trimmer line.
	Trimmer line is empty.	→ Replace the spool or the trimmer line.
	Trimmer line is pulled into the spool or welded.	→ Pull the trimmer line out of the spool.
Trimmer line cannot be extended or is used quickly	Trimmer line became too dry and brittle (e.g. during the winter).	→ Put the spool in water for approx. 10 hours.
	Trimmer line frequently touched hard objects.	→ Prevent the trimmer line from touching hard objects.
	Automatic lever is dirty.	→ Clean the automatic lever.
Continuous clattering noise	Too much trimmer line was fed out.	→ Wind the trimmer line onto the spool.
	Trimmer line limiter is missing.	→ Contact the FLYMO Service.
Wheel stops turning	Wheel is dirty.	→ Clean the wheel.
Trimmer can no longer be stopped	Start lever is stuck.	→ Remove the battery and loosen the start lever.
Trimmer does not start or stops. LED ① is flashing green [Fig. 04]	Battery is empty.	→ Charge the battery.
Trimmer does not start or stops. Error-LED ② is illuminated red [Fig. 04]	Battery temperature is outside the permissible temperature range.	→ Wait until the battery temperature is between 0 °C and + 45 °C again.
	There are drops of water or moisture between the battery contacts on the trimmer.	→ Remove the water drops/ moisture with a dry cloth.
	Engine is blocked.	→ Remove the obstacle. Start again.
Trimmer does not start or stops. Error-LED ③ is flashing red [Fig. 04]	Product is defective.	→ Contact the FLYMO Service.
Trimmer does not start or stops. Error-LED ④ is not illuminated [Fig. 04]	Battery is not put completely into the battery holder.	→ Put the battery completely into the battery holder until it audibly engages.
	Battery is defective.	→ Replace the battery.
	Product is defective.	→ Contact the FLYMO Service.

Problem	Possible Cause	Remedy
Charging is not possible. Battery charge indicator  is continuously illuminated [Fig. 03]	The battery is not connected (correctly).	→ Connect the battery to charger correctly.
	Battery contacts are dirty.	→ Clean the battery contacts (e.g. by connecting and disconnecting the battery several times. Replace the battery if necessary.
	Battery temperature is outside the permissible charging temperature range.	→ Wait until the battery temperature is between 0 °C and + 45 °C again.
	Battery is defective.	→ Replace the battery.
Battery charge indicator  is not illuminated [Fig. 03]	Mains plug of the charger is not (correctly) plugged in.	→ Insert the mains plug into the mains socket (completely).
Battery charge indicator  is not illuminated [Fig. 03]	Socket outlet, mains cable or charger is defective.	→ Check the mains voltage. Let the charger be checked if necessary by an authorised specialist dealer or the FLYMO Service.

For any other malfunctions please contact the Husqvarna UK Ltd. Customer Service. Repairs must only be done by Husqvarna UK Ltd. service departments or specialist dealers approved by FLYMO.

7. TECHNICAL DATA
