Original operator's manual

For safety reasons, children and young people under 16 as well as anyone who is not familiar with this operator's manual should not use the product. Persons with reduced physical or mental abilities may use the product only if they are supervised or instructed by a responsible person. Children must be supervised to ensure that they do not play with the product. Never use the product if you are tired, ill or under the influence of alcohol, drugs or medication.

1. SAFETY INSTRUCTIONS

1.1 General safety instructions

Important!

- Read the operator's manual carefully before use and keep for future reference.
- The product can be operated outdoors at temperatures between +5 °C and +55 °C.
- Check the product for damage before each start-up.
- Keep damaged parts away from children.
- Check the batteries regularly for damage.
- Do not use damaged batteries. Dispose of used batteries in accordance with regulations (see chapter 6. STORAGE "Disposal/Disposing of used batteries").
- Keep damaged batteries away from children.
- Do not use the product in explosive atmospheres.
- Check the product for leaks before each start-up.
- The product heats up in direct sunlight. Touching the product can cause minor burns on contact.
- Ensure that the product is only used within the specified temperature range (see chapter 1. SAFETY: between +5 °C and +55 °C).

1.1.1 Intended use

The **GARDENA smart Water Control** is intended for private use in domestic and hobby gardens and is only to be used outdoors to control sprinklers and irrigation systems. The **smart Water Control** can be used for automatic irrigation while you are away on holiday. The **smart Water Control** can only be programmed together with the **GARDENA smart Gateway**.

DANGER!

Risk of injury

→ The GARDENA smart Water Control must not be used in industrial applications or in combination with chemicals, foodstuffs or flammable or explosive substances.

1.1.2 Handling the batteries safely

DANGER!

Risk of explosion

There is a risk of explosion if batteries are not replaced in the proper manner.

→ For information on how to dispose of used batteries, see chapter 6. STORAGE.

- For reasons of functional reliability, only **three alkaline batteries of type LR6 (AA) (Mignon) may** be used in the Water Control for the **approved temperature range of +5 °C to +55 °C**.
- Do not use rechargeable batteries.
- To prevent the Water Control from failing due to a low battery during a longer absence, the battery must be replaced when the battery indicator flashes yellow.
- The batteries must not be removed during irrigation (this results in continuous irrigation).

1.1.3 Starting up safely

WARNING!

The Water Control is not approved for indoor use.

→ Only use the Water Control outdoors.

- The Water Control must only be installed vertically and with the union nut facing upwards to prevent water from entering the battery compartment.
- The minimum water delivery rate for a safe switching function of the Water Control is 20–30 l/h. For example, at least 10–15 2 litre drip heads are required to control the Micro-Drip-System.
- The temperature of the water flowing through must not exceed 3+5 °C.
- **Only use clear fresh water.**
- The minimum operating pressure is 0.5 bar, the maximum operating pressure is 12 bar.
- Avoid tensile stress.
- **Do not pull on the hose while it is connected.**

1.2 Additional safety instructions

DANGER!

Risk of cardiac arrest

This product makes an electromagnetic field while it operates. This electromagnetic field may affect the functionality of active or passive medical implants (e.g. pacemakers), which may result in serious injury or death.

- Consult your doctor and the manufacturer of your implant before using this product.
- After using the product, disconnect the mains plug from the mains socket.

1.2.1 Additional personal safety instructions

DANGER!

Risk of suffocation

- Small parts can be easily swallowed. Keep toddlers away when you assemble the product.

2. FUNCTION

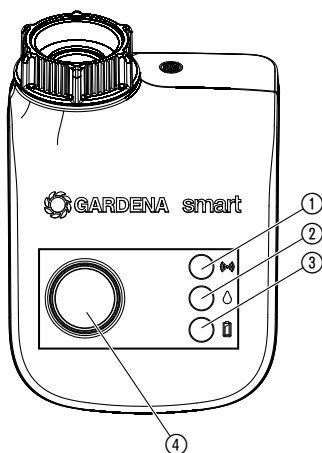

2.1 Water Control:

The Water Control is automatically controlled via the GARDENA smart App. Sprinklers, a sprinkler system or a drip head watering system can be used for watering.

The Water Control carries out irrigation fully automatically according to the set schedule and can therefore also be used while you are on holiday.

In the early morning or late evening, evaporation and therefore water consumption are the lowest.

2.2 Operating elements/displays:

① **Connection LED:**

Flashing green:	During linking
Flashing yellow:	Detecting the product
Green for 10 sec.:	High signal strength
Yellow for 10 sec.:	Medium signal strength
Red for 10 sec.:	Low signal strength

② **Active irrigation LED:**

Green for 10 sec.:

③ **Battery indicator LED:**

Green for 20 sec.: High capacity

Flashing yellow: Medium capacity

Flashing red: Low capacity

Illuminated red: Battery flat

If the LED is lit up red, the valve will no longer open.

A valve opened according to a schedule will always be closed again.

The battery indicator is reset when the battery is replaced.

→ Replace the batteries (see chapter 3. COMMISSIONING “Inserting batteries”).

④ **Man. button:**

Manually open or close the water flow.

3. COMMISSIONING

3.1 Inserting batteries:

The batteries are not included in the scope of delivery.

The Water Control may only be operated with three alkaline batteries of type LR6 (AA) (Mignon).

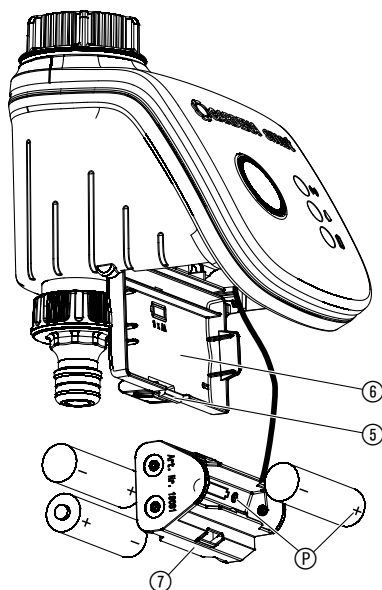

The battery life is approx. six months. The battery life can vary depending on ambient temperature and frequency of use.

WARNING!

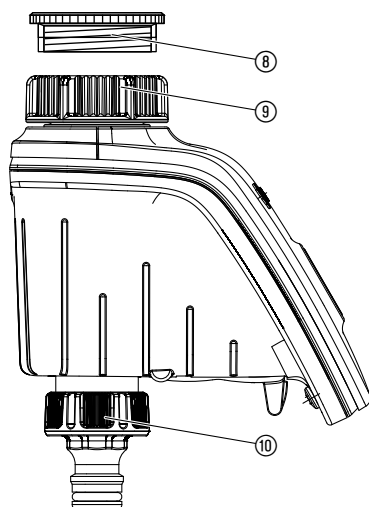

Damage to property

→ Do not use rechargeable batteries!

1. Press the tab ⑤ and open the cover ⑥.
2. Remove the battery bracket ⑦.
3. Insert the batteries into the battery bracket ⑦. When doing so, → ensure the polarity ⑨ is correct.
4. Fit the battery bracket ⑦ onto the cover ⑥.
5. Close the cover ⑥.

3.2 Connecting the Water Control:

The Water Control is equipped with a union nut ⑨ for taps with a 33.3 mm (G 1") thread. The supplied adapter ⑧ is used to connect the Water Control to taps with a 26.5 mm (G 3/4") thread.

1. For 26.5 mm (G 3/4") threads:

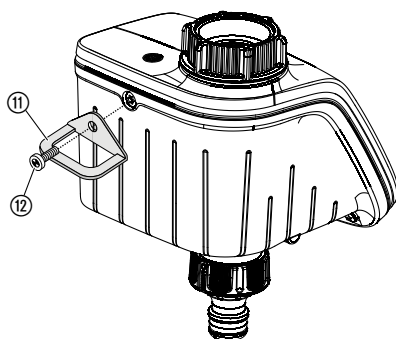

→Screw the adapter ⑧ onto the tap by hand (do not use pliers).

2. Screw the union nut ⑨ on the Water Control onto the thread of the tap by hand (do not use pliers).

3. Screw the tap connector ⑩ onto the Water Control.

3.3 Install the anti-theft device (optional):

In order to protect the Water Control against theft, the GARDENA Anti-Theft Device (Art. No. 1815-00.791.00) can be obtained from GARDENA Service.

1. Screw the clamp ⑪ to the rear of the Water Control using the screw ⑫.
2. Use the clamp ⑪ to secure a chain, for example.

→ **The screw cannot be removed after it has been screwed in once.**

4. OPERATION

4.1 Operation with the GARDENA smart App:

You can use the GARDENA smart App to control all GARDENA smart system products from anywhere, at any time. The free GARDENA smart App is available from the App Store (Apple) or Google Play. A GARDENA smart Gateway, which must be connected to the Internet, is required for connection.

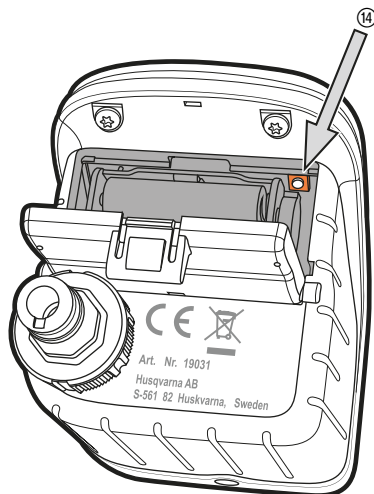

All GARDENA smart products are integrated via the app. Follow the instructions inside the App.

4.2 The following options are available for operating the smart Water Control:

- According to the smart App schedule: Watering days, start, duration
- As required in the smart App: Start and finish
- Manual operation on the product

4.3 Factory Reset:

The smart Water Control will be reset to the factory settings.

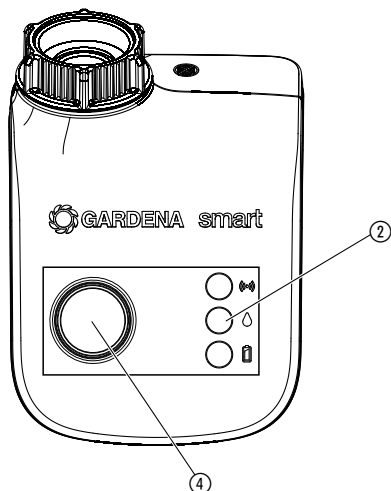

→ Briefly press the Reset button ⑭.
New connection.

– or –

→ Press and hold down the Reset button ⑭ for at least five seconds.
Cancels the existing connection and allows a new connection to be established, e.g. with a different gateway.

4.4 Manual watering with the Water Control:

The valve can be opened or closed manually at any time (manual watering is only not possible in connection mode).

A valve opened according to a schedule can also be closed ahead of schedule without changing the schedule information.

1. Press the Man. button (4) to open the valve manually (or close an open valve).

*The **active irrigation LED** ② lights up green for 10 seconds.*

2. Press the Man. button to close the valve ahead of schedule.

The duration of manual watering is set to 30 minutes by default. The GARDENA smart app can be used to change the duration and disable the **Man.** button.

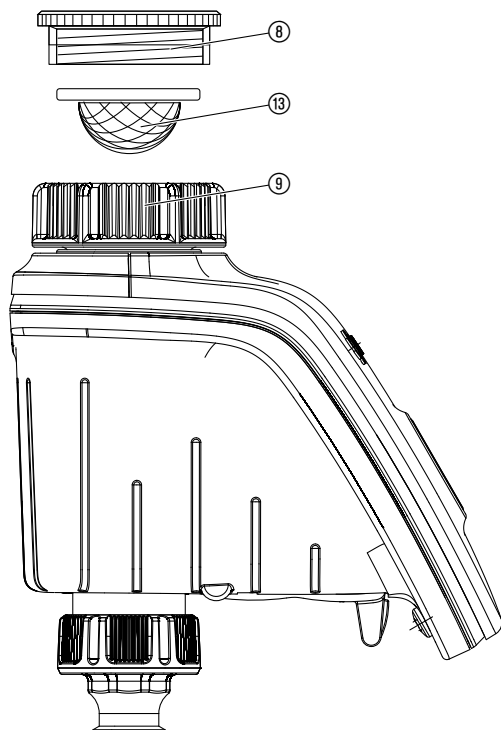

If irrigation according to a schedule has been stopped manually, the schedule-controlled irrigation cannot be continued.

If you have manually opened the valve and a programmed watering start time coincides with the manual watering duration, the programmed start time is overridden.

Example:

You open the valve manually at 9:00 a.m. and the manual watering duration is 30 minutes. A schedule with a start time (**START**) between 9:00 am and 9:30 am is not carried out in this case.

5.1 Cleaning the filter:

The filter ⑬ should be checked regularly and cleaned if necessary.

1. Unscrew the union nut ⑨ on the Water Control from the thread of the tap by hand (do not use pliers).
2. If necessary, unscrew the adapter ⑧.
3. Remove the filter ⑬ from the union nut ⑨ and clean.
4. Refit the Water Control (see chapter 3. COMMISSIONING "Connecting the Water Control").

5.2 Cleaning the Water Control:

Do not use corrosive or abrasive cleaning agents.

→ Clean the Water Control with a damp cloth (do not use solvents).

6. TROUBLESHOOTING

Should you experience any faults, you can find some frequently asked questions at this link: www.gardena.com

Problem	Possible cause	Remedy
No LED display	Batteries incorrectly inserted.	→ Ensure the polarity (+/-) is correct.
	Battery completely flat.	→ Decommission the PTU immediately. Store the PTU in a frost-proof place.
Manual watering via the Man. button is not possible	Water Control in idle mode.	→ Press the Man. button.
	Batteries flat (battery indicator LED lights up red).	→ Insert new (alkaline) batteries.
	Water tap closed.	→ Open the tap.
Watering programme not being carried out (no irrigation)	The valve has previously been manually opened.	→ Avoid any programme overlaps.
	Water tap closed.	→ Open the tap.
Water Control does not close	Batteries flat (battery indicator LED lights up red).	→ Insert new (alkaline) batteries.
	Minimum delivery rate less than 20 l/h.	→ Connect more drip heads.

**NOTE:**

For any other malfunctions please contact the GARDENA service department. Repairs must only be done by GARDENA service departments or specialist dealers approved by GARDENA.

7. TECHNICAL DATA

<i>smart Water Control</i>	Unit	Value (Art. No. 19031-20)
Operating temperature range (outdoors)	°C	5–55
Min./max. operating pressure	bar	0.5/12
Flow medium		Clear fresh water
Max. media temperature	°C	30
Batteries required		3x alkaline batteries of type LR6 (AA) (Mignon)
Battery life		Approx. six months with alkaline batteries (min. 2,000 mAh)
SRD:		
Frequency range	MHz	863 – 870
Maximum power	mW	25
Free field radio range (approx.)	m	100

8. STORAGE

→ The product must be stored away from children.

To put into storage:

1. Remove the batteries in order to conserve them (see chapter 3. COMMISSIONING).
2. Store the Water Control in a dry, frost-free place.

9. SERVICE

The current contact information for our service department can be found online: www.gardena.com/contact

10. DISPOSAL

10.1 To dispose of the product

The symbol means that the product is not domestic waste. Recycle it through your local collection system for electrical and electronic equipment.

This contributes to proper end of life waste management. Contact local authorities, domestic waste services, your GARDENA servicing dealer or retailer for information. Incorrect disposal may have potential negative effects on the environment and human health, due to the potential presence of hazardous substances.

10.2 Battery disposal

The batteries must not be disposed of with normal household waste. They must be disposed of in line with local environmental regulations.

1. Remove the batteries from the product.
2. Keep batteries away from children.
3. Ensure that the battery contacts do not short-circuit by placing tape over them.
4. Only dispose of the batteries when they are discharged.
5. Dispose of or recycle the batteries in accordance with the applicable local environmental regulations.

11. ANNEX

11.1 Assignment of trademarks

Apple and the Apple logo are trademarks of Apple Inc., registered in the United States and other countries. App Store is a service mark of Apple Inc., registered in the United States and other countries. Google and the Google Play logo are trademarks of Google LLC. Other trademarks and trade names are those of their respective owners.

11.2 Declaration of Conformity

GARDENA Manufacturing GmbH hereby declares that the radio equipment type (Art. 19031) is in compliance with directive 2014/53/EU. The full text of the declaration of conformity is available at the following internet address:
